*The Director-General of Stores,  
India Office,  
Whitehall,  
London, S.W.*

S. 13798.

16th December, 1898.

In reply to your letter No. 2884 W. dated 14th

November, 1898, I have the honour to state that 60 cans of Varnish were shipped by the S.S. "Nubia", but there is nothing in the returned packing account to show whether the reported loss of half a gallon was due to evaporation or leakage, spread over the whole or part of the consignment, or to the non delivery of one tin. I have therefore to ask that I may be favoured with full information on this point to enable me to determine, if possible, the question of responsibility for the missing quantity.

I regret that I am unable in any way to account for the discrepancy in the weight of the resin, as from the records of this Department it appears that 6 lbs. were packed at the India Store Depot, and the value is so trifling

The Secretary to Government,

Public Works Department,

Copy of letter from H. A. Moss Esquire, General Superintendent, P. W. Stores, to the Suptg. Engineer 5<sup>th</sup> Circle, No 103 S. dated 2<sup>nd</sup> January 1899.

With reference to your No. 19<sup>th</sup> S. dated 14<sup>th</sup> January 1899 forwarding the Director General of Stores letter No. S. 13798 dated 16<sup>th</sup> December 1898, I have the honour to report that the loss in varnish was caused by the leakage of one half gallon tin that was damaged in transit.

I am inclined to think that there must be a mistake in the records the Director General of Stores refers to, where it appears that 6 tbs of resin were despatched. The packing account per S. S. Pindari 6-8-97, shows gross weight of the case of resin with its contents to be 8 tbs which was correct. It is impossible to check the weight of the contents and case again now, as both have been used, but a case with 6 tbs of resin was received per S. S. Goleonda 30<sup>th</sup> September 1898 and the gross weight was 13 tbs. It is therefore very unlikely that the case in the former instance weighed so little as 2 tbs.
