Establishment

The — required during 1899–1900 for No. 6 Party, Tank Restoration Scheme, as detailed in the statement submitted by the Chief Engineer for Irrigation, sanctioned.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers:—

Office-note from the Chief Engineer for Irrigation, Tank Restoration Scheme, to the Chief Engineer, Public Works Department, dated 10th November 1898, No. 2648 T.

In accordance with G.O., No. 983 I., dated 18th November 1895, a temporary Tank Restoration Scheme Party was formed for investigation of irrigation sources in Ráyachóti taluk, Cuddapah district, with a view to reducing the large number of petty tanks by improving certain of them, so as to irrigate, in addition to their own ayacut, that of two or more adjacent tanks together with the tank-beds; the tanks themselves to be abandoned.

The investigations which were started in April 1896 were interrupted in the following November by the party being transferred to famine duty and are now about to be resumed. During the six months' operations considerable progress was made in mapping and collecting Financial and other information.

As a result about one-fourth of the taluk has been so investigated although no levels have yet been taken. An inspection of these maps reveals the fact that the tanks are nearly all on small jungle streams each, except in a few cases, having quite a distinct catchment and only one or two are supplied from any large stream.

The only possible chance of doing anything is to make tanks across the larger streams if there is any good basin above the possible sites for bunds, and any fairly large area commanded below.

No improvements of the nature Government had in contemplation are practicable.

Such being the case, the best way to make use of the large amount of information collected will be to convert the party which is now temporary into a permanent addition to the strength of the Tank Restoration Scheme establishment, and complete the investigation of the minor basin on the ordinary lines of Tank Restoration operations which in any case will have to be done sooner or later.

The party will in course of its work investigate all possible sites for the formation of large storage reservoirs including the two alluded to in G.O., No. 983 I., dated 18th November 1895.

A proposition statement is herewith enclosed. Please obtain the sanction of Government thereto.

Examiner, Public Works Accounts.

Office-note from the Examiner, Public Works Accounts, dated 3rd December 1898, No. 4112/B.E.

Returned with the requisite certificate.

2. The proposal to grant local allowance at Rs. 10 and 5 to sub-overseers will require the sanction of the Government of India.

3. The financial value of appointments of sub-overseers, 1st and 2nd grades, has, in accordance with the orders contained in Financial Department, Government of India, Notification No. 325, dated 12th January 1872, published in Part I of the *Gazette of India* of the 13th idem (indicating the mode of rating the value of progressive salaries for the purpose of proposition statements of establishments) been corrected by this office as sub-overseers are non-ministerial officers.

Office-note from the Chief Engineer for Irrigation, Tank Restoration Scheme, dated 14th February 1899, No. 329 T.

No. VI Party, Tank Restoration Scheme, will continue the investigation of Ráyachóti taluk (Mandiyanadi Minor Basin), Cuddapah district, in accordance with the ordinary Tank Restoration Scheme procedure, and be retained as a temporary party for such period as may be found necessary.

Order—No. 634 W., dated 1st March 1899.

The establishment required during 1899–1900 for No. 6 Party, Tank Restoration Scheme, as detailed in the statement submitted by the Chief Engineer for Irrigation, with his office-note No. 2648 T., dated 10th November 1898, is sanctioned.

2. This sanction has been registered as Provincial No. 120 W. of 1898–99, and classified as Establishment—Temporary.

B

Rem. 27.2.99

should be investigated, and a Tank Restoration Party was accordingly constituted in April 1896 to conduct the investigation. This party was transferred to Famine duty in November 1896, but during the 6 months the party was at work considerable progress was made in mapping and collecting financial and other — information.

2. The Chief Engineer for Irrigation applied for sanction to the party being made permanent, in order that the large amount of information already collected might be made useful and ~~that~~ the investigations might be completed on the ordinary lines of Tank Restoration Operations. He was asked, in Office-Note No. 435C d/ 20th January, 1899, to state whether there was any special reason why the establishment should be made permanent instead of being retained temporarily for such period as might be necessary. He replies that the party may continue temporarily for such period as may be found necessary, and it is therefore proposed to sanction the establishment under "Temporary". The proposition statement provides for an

Flag L

an increase of Rs. 22 to the establishment now employed

1 tracer on Rs. 15.

~~decrease~~ Increase of pay to 7 peons Rs. 7

The entertainment of a tracer appears necessary, and the higher rate of pay proposed for peons is in accordance with the orders of Government raising the pay of all peons in the Public Works Department.
