No. 165 I.

Note by the Chief Engineer for Irrigation.

In December 1896 the Board of Revenue forwarded for remarks a letter from the Collector of Ganjám recommending the draining of the Dandu Lakshmipuram swamp by the Public Works Department. On the information supplied by the Superintending Engineer, I Circle, it was considered that the proposal might be undertaken as a famine work, and the Board was informed accordingly. A series of petitions urging that the work be carried out have also been received from the ryots concerned. In June 1898 the Superintending Engineer submitted an estimate of Rs. 27,300, which, however, the undersigned could not recommend for the sanction of Government, and as the result of correspondence on the subject the undersigned finally approved of a suggestion of the Superintending Engineer that sanction might be given to proceed with the scheme tentatively, by clearing the drainage channel, so that it might be ascertained how far it would be capable of reducing the level of water in the swamp. The Superintending Engineer now submits an estimate, amounting to Rs. 8,870, for doing this, which may be sanctioned as an ordinary work.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

31st July 1899.

Order—No. 741 I., dated 31st August 1899.

The following estimate is sanctioned :—

SIR,

With reference to your endorsement no 1/51 G.N dated the 12th ultimo on the Proceedings of the Board of Revenue dated the 7th ultimo herewith returned, with all its enclosures, I have the honor to state that the Executive Engineer Ganjam Division reports that, since he wrote to the Collector the two letters which form the enclosures to the above reference he inspected the tampara of Dandu Lakshimipuram referred to and is of opinion that the work of draining the tampara may be undertaken by this Department as a famine relief work and that the land applied for cultivation may be sold by public auction instead

instead of putting a private individual in possession of the land and allowing him to do the required work. I entirely concur in the opinion expressed by the Executive Engineer as there is every reason to hope that the sale proceeds that may be expected will be much more than the anticipated expenditure.

2. The Executive Engineer says that the Estimate is now under preparation and that it will be submitted shortly.

No.1001 G.N.

From

J.C.Larminie Esquire,M.I.C.E.,Superintending
Engineer First Circle.

To

The Chief Engineer for Irrigation.

Berhampore,7th January 1897.

Sir,

With reference to your Endorsement No.1/51 G.N.

dated the 12th Ultimo on the Proceedings of the Board of Revenue dated the 7th Ultimo herewith returned with all its Enclosures, I have the honor to state that the Executive Engineer, Ganjam Division, reports that since he wrote to the Collector the two letters which form the enclosures to the above reference, he inspected the tampara of Dandu Lakshmipuram referred to and is of opinion that the work of draining the tampara may be undertaken by this Department as a famine relief work and that the land applied for cultivation may be sold by public auction instead of putting a private individual in possession of the land and allowing him to do the required work. I entirely concur in the opinion expressed by the Executive Engineer as there is every reason to hope that the sale proceeds that may be expected will be much more than the anticipated expenditure.

2. The Executive Engineer says that the Estimate is now under preparation and that it will be submitted shortly.

I have the honor to be &c.

/signed/ J.C.Larminie

Superintending Engineer First Circle.

No.20 M, dated 14 th January 1897.

Copy forwarded to the Board of Revenue, Land Revenue, for information with reference to its enquiry dated 7th December 1896 on General No.6332 of 1896.

2. The undersigned agrees with the Superintending Engineer.

/signed/ W.Hughes

Chief Engineer for Irrugation

P.W.D.

Resolution

The last paper read above will be communicated to the Collector of Ganjam for information with reference to his letters dated 8th November 1896 & 27th November 1896 Nos.3337/ver & 3918/ver respectively.

2. It is requested that the letter and ~~the~~ Enclosure forwarded to the Chief Engineer in original with the Board's Reference dated 18th December 1896 may be returned to this office.

To,

The Chief Engineer
Madras

Most Honored Sir,

We, the Jirayati pattadars of the marginally noted villages, humbly beg to submit our humble grievance for your honor's kind and favorable disposal.

pirrupet.
am
dulakshmi.
am.

Dandulakshmipuram swamp situates as a lake in the midst of these villages. Most of our lands lie on its border. Swamp itself is in most part in level to the cultivating lands. We are annually subjecting ourselves to failure of crop by immediation. Swamp has been applied for for cultivation on 3 Year's progressive cowle by some, and on pattah by some. The Govt. having considered to ~~remone~~ remove the pest of submersion, proposed to drain the water and sell the swamp in plots.

We understand that an estimate for the work was once made for Rs, 8500 approximately and finally for about Rs 23000 in detail. The annual submersion has brought us to a deplorable state and we are annually crying for relief. The Board has favored us with endorsement to grant Special remission in case of Submersion but the order has been ignored and is not carried into effect properly on account of our poverty and misfortune. We hear that the estimate and the final report of the Executive Engineer of the district was submitted to you. We humbly crave for your Lordship's benefaction in

10

to order atleast (the part work proposed) the enlargement of the canal carrying swamp water to sea. It will not cost more than about Rs, 5000 and at the same time save so many lives of the 3 villages on your honor's name –

For this act of charity

we shall as in duty bound ever pray.

25—12—97
Chicacole

E. 19

The undersigned regrets that he cannot recommend for the sanction of Government the estd. received with the G.O. No 249 G.I. dt 6 June 1898 –

In the first place there is nothing to show that the flood bank is of sufficient section to turn the drainage in high floods and again it is not shown what lands and villages would be affected by the raising of the flood level. Cross sections should have been taken from which the probable flood level ~~also~~ could be approximately calculated ~~and these sections should have the description of land taken on them~~

2. ~~with regard to~~ the estimate for masonry works ~~they~~ should have been made in detail

3. The proposals for cultivating

Swamp cannot be accepted without ~~reasons~~ some proof that there is a sufficient supply of water.

If the Supd. Engr. considers the question of ~~draining~~ the swamp urgent the undersigned has no objection to submitting for the consideration of Govt. an estt. for clearing the drainage chl. from where it leaves the swamp, about 1000 ft above the first aqueduct, and for improving the two aqueducts

or improving the drainage of lands around
