Report to accompany the estimate for constructing
an Under Tunnel on Gndapadu. branch of Madras
channel. Masulipatam canal

Amount of estimate Rs 1350

The accompanying estimate provides for the construction of an under tunnel under the Gudapad branch of the Medur channel. The line of the channel crosses low ground along which the drainage of about a square mile of land in the villages of Pennumatcha, Choragudi and Gudapad. In the first year after the channel was constructed, a breach occurred and as a temporary measure a spout was allowed under the channel but a permanent work is undoubtedly needed. The design provides for the discharge of $\frac{1}{6}$ of the theoretical discharge, this being considered sufficient. The channel bank is continued over the tunnel with a reduced width in order that it may be possible to ride along it.
