No. 165 I.

Note by the Chief Engineer for Irrigation.

In December 1896 the Board of Revenue forwarded for remarks a letter from the Collector of Ganjam recommending the draining of the Dandu Lakshmipuram swamp by the Public Works Department. On the information supplied by the Superintending Engineer, I Circle, it was considered that the proposal might be undertaken as a famine work, and the Board was informed accordingly. A series of petitions urging that the work be carried out have also been received from the ryots concerned. In June 1898 the Superintending Engineer submitted an estimate of Rs. 27,300, which, however, the undersigned could not recommend for the sanction of Government, and as the result of correspondence on the subject the undersigned finally approved of a suggestion of the Superintending Engineer that sanction might be given to proceed with the scheme tentatively, by clearing the drainage channel, so that it might be ascertained how far it would be capable of reducing the level of water in the swamp. The Superintending Engineer now submits an estimate, amounting to Rs. 8,870, for doing this, which may be sanctioned as an ordinary work.

31st July 1899.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

ORDER—No. 741 I., dated 31st August 1899.

The following estimate is sanctioned :—

43. Minor Works and Navigation.
 Irrigation.
 Agricultural Works.
 Original Works.
 Ganjam Division.

Improving the drainage channel of the Dandu Lakshmipuram swamp.

	RS.
Estimate	8,870

2. This sanction is registered as No. 57 I. of 1899-1900.

(True Extract.)

Under Secretary to Government,

N. 6524 of 7th 22. Note by the Chief Eng: for Irrigation

In December 1896 the Board

of Revenue forwarded for
remarks a letter from the
Collector of Gaujam recommend-
-ing the draining of the Daudu
Lakshnipuram swamp by the
Public Works Department. On
the information supplied by
the Supg: Engineer, 1st circle,
it was considered that the
proposal might be undertaken
as a famine work, and the
Board was informed accordingly.

A series of petitions urging
that the work be carried out

have also been received
from the ryots concerned.
In June 1898 the Supg:

Engineer submitted an estimate
of Rs. 27,300, which, however,
the undersigned could not
recommend for the sanction
of Government, and as the
result of correspondence
on the subject the undersigned
finally approved of a suggestion
of the Supg: Engineer that
sanction might be given to

proceed with the scheme
tentatively, by clearing the
drainage channel so that it
might be ascertained how
far it would be capable
of reducing the level of
water in the swamp. The
Supg: Engineer now submits
an estimate amounting
to Rs. 8870, for doing this,
which may be sanctioned
as an ordinary work.

No: 741 J 731.899
Order thereon

The following estimate is
sanctioned:—

Irrigation
43. Minor works & Navigation
Agricultural works.
Original works.
Gaujam Division.

Improving the drainage channel
of the Daudu Lakshnipuram
Swamp.

Estimate Rs. 8870.

2. This sanction is registered

marginally noted villages, humbly beg to submit our humble grievance for your honor's kind and favorable disposal.

Dandulakshimpuram Swamp situates as a lake in the midst of these villages. Most of our lands lie on its border. Swamp itself is in most part in level to the cultivating lands. We are annually subjecting ourselves to failure of crop by immediate. Swamp has been applied for for cultivation on 3 years progressive course by some, and on pattah by some. The Govt. having considered ^{remove} ~~to remove~~ the head of subversion, proposed to drain the water and sell the swamp in plots.

We understand that ~~an~~ estimate for the work was once made for Rs. 8500 approximately and finally for about Rs. 23000 in detail. The annual subversion has brought us to a deplorable state and we are annually crying for relief. The Board has favored us with endorsement to grant Special remission in case of subversion but the order has been ignored and is not carried into effect properly on account of our poverty and misfortune. We hear that the estimate and the final report of the Executive Engineer of the district was submitted to you. We humbly crave for your Lordship's benefaction in

No. ^I 25 ^{9/6/98} G.N.

The undersigned reports
that he cannot recommend
for the sanction of Government
the cost received with the
for No 249 & it is 6 June

1898 -
In the first place there is
nothing to show that the flood
bank is of sufficient section to
turn the drainage in high flood
and again it is not shown what
lands and villages would be
affected by the raising of the flood
level. Cross sections should have
been taken from which the
probable flood level also could
be approximately calculated
and these sections should show
the description of land water
on them
2. With regard to the estimate
for necessary works they should
have been made in
detail
3. The proposals for cultivation

Swamp cannot be
accepted without ~~reasons~~.
Some proof that there is a
sufficient supply of water.

Of the Sup^r & Engr. considers
the question of draining the
Swamp upon the
underground has no objection
to submitting for the
consideration of Govt an
est^t for clearing the
drainage ch^l from where
it leaves the Swamp, about
1000 ft above the first
aqueduct, and for
improving the last
aqueduct.

To The Secretary to the Government of
Madras

PETITION

0277

REVENUE DEP.

Most honored Sir
In continuation of our petition
dated 28th March 1898 we beg to represent
that in case the Government does not like
to proceed with the whole work of Dandu
-Lakshmiapuram Swamp. Chicaole Taluk
this year the following work will in our
humble opinion save us from inundation.
There is a large canal in the middle of
the Swamp through which water flows and
enters a small arch below an old
aqueduct, this arch is quite insufficient
to receive the abundant flow of water during
the rainy season -
Thus the water is stopped in the way which
overflows the aqueduct and causes
inundation to the three villages (Chickerpet, Sora
Brijan and Dandu - Lakshmiapuram). If
the whole scheme is not carried out at
present for large estimated amount we
beg that the following simple process will
Command itself to your honor.
In our humble opinion if this arch
is enlarged by two similar arches

Madras.

REVENUE DEPT
1898
NOTED
Honoured Sir,

- 1. Amberupet
- 2. Viram
and
- 3. Dandur -
- Lakshmi -
puram.

We, the Jirayati patta
ryots of the marginally noted Government
villages, are bitterly crying every year for
the loss of crop occasioned by the swamp of
Dandur & Ashmipuram. When we make every
thing ready and promising in our fields
they are inundated by the water of swamp
when rains are a little heavy, and when
rains are abated the crops of the fields
die for want of sufficient supply of water
which is due to the intervention of this swamp.

2. We have been both directly and
indirectly trodden down by this swamp every
year and thus reduced to the utmost poverty.
Every year crop of Jirayati lands of about
Rs 3000 is being failed in the 3 villages.
Some fortunate men alone are getting
remission and even that occasionally.
Naturally officers will not like to take up
this annual bothering & succour the poor
cottage ryots.

3. When matters are such, the
Swamp itself to the fortune of the ryots has
been applied for cultivation. (Some wanted
it on progressive lease) and some on patta.
Mr. Partridge the then Principal Assistant
Collector, recommended it to be given

for

83/1119
5.5.70

for cultivation. The Collector thereupon wanted to have it drained and sold in small pieces. Without being granted to cultivation after all and with no other effect this subject has been delayed during these 3 years, in the period, we the poor Government ryots have been fully crushed down with poverty and at the same time having no gain to the Government.

4. Under these circumstances we humbly crave the Government

(1) Either to take up itself the work of draining the Swamp soon at least this year or to grant it over for ~~private~~ private enterprise or

(2) to enlarge the channel carrying the Swamp water. This will save our lands presently from inundation.

This work is therefore necessarily to be undertaken by private enterprise at least before the close of this fasali or by the Government if it wants to keep up the matter under correspondence and drain and sell the Swamp afterwards.

5. We humbly beg to state that our poverty will be inexpressible and that we have as a fact to leave our lands if our request no. 2 will not be complied with in this fasali, as we are craving to save our lands from inundation from years together.

Rapid and frequent changes of many officers has destined us to the fate of not being relieved of our misfortune.

6. W. Sengaram Esq. The late Executive Engineer of Ganjam Division, as we understand, has formed

It has not come up to Govt.

formed an opinion that the Scheme of Dandu Lakshminipuram can be easily carried out.

7. We have received several endorsements from D.P.W. Officers and Collector of Ganjam Dt. that the scheme is under consideration, but no action was taken up to date and we are crushed on account of inundation.

8. Oh Lord! our Lord, do this favour for the relief of 3 villages, we will pray day and night to your everlasting happiness and prosperity.

9. Under these circumstances we humbly pray your lordship will pass orders for the immediate execution of the work, before the rainy season sets in.

In case the whole work is not undertaken at present, the widening of the channel will at least be necessary for this year which will save the above 3 villages.

We beg to remain,
Most Honoured Sir,

Your most obedient and humble ryots

To
The Chief Engineer
Madras
or
Coatacamund.

Most Honoured Sir,

We beg to inform your honour, that the original 5 endorsements returned to us from your honour's office dated 6th June 1898 from Coatacamund, regarding our petitions dated 28th March 1898 and 18th April 1898, that the final order has not yet been decided for the commencement of the work in the Dandu Lakshminiswami Swamp or widen the canal to save us from inundation in the rainy season which has already commenced.

On account of frequent inundations we are all frightened or become down-hearted this year for replantation of paddy crops.

Therefore we earnestly solicit your honour to issue an order at an early date for the work referred to in our two petitions as above stated.

We beg to remain,
Most honoured Sir,
Your most humble and obedient
petitioners.

No: 475 GN

Office of the Supt Engineer I Circle
Waltair G. S. 1898.

Disp'd 13-8-98

From

W.C. DEMINGHAM Esqr M.A.C.E.
Supt Engineer I Circle

To

The Chief Engineer for Irrigation
Madras.

Dir

With reference to your memorandum No: I 306N dated 27th ultimo, I have, as already reported in this office No: 5826N of 5.8.98 requested the Executive Engineer, Ganjam Division to give the matter his personal attention and submit the information asked for at as early a date as practicable.

2.

I must however point out that to settle the points raised in your No: I 256N a considerable amount of levelling ^{into} to be required and there is no body to place in Special Charge of it.

3.

I must here submit that it is almost impossible to decide with any degree of accuracy how much the flood level would be raised by constructing the bank. As may be noted on the Scheme which accompanied the Estimate I have taken the duration of a maximum flood as 12 hours, and shown that this is a very extreme case.

I do not myself see any reason for concluding that Villages or tanks above the bank would be in any way affected. In a cyclonic storm, no doubt, tanks above would be breached and the flood would probably breach the protective bank, but the flood runs off so rapidly that practically no harm would be done, and the bank being but a small one would easily be repaired.

4. As I have already pointed out the Scheme is an unusual one, and it is difficult to reduce everything on paper to a certainty. That it is feasible is clear from the fact that it is simply an improvement on an existing Scheme, which has only failed for want of money and attention. The number of petitions and the readiness with which private individuals are prepared to come forward may also be taken as fair evidence that to complete it would not be attended with much risk or difficulty.

5. There is no doubt that it might be undertaken as a famine work, and the Scheme as it now stands requires no further investigation if it is to be reserved for that purpose. It seems a pity, however, to shut out a Scheme that, there is little doubt, would prove remunerative and by completing which the condition of neighbouring villages would be materially improved.

6. As regards the supply of water, it

it may be said that the Polaki Channel is fed by the Damsadhara River. It is impossible, in the absence of gauges or observations to say how much the Polaki Channel might supply. At present it may be taken to supply 6000 acres, but as the Damsadhara river is practically perennial and even in the famine year 1894, there was a bumper crop under it; there appears no reason to doubt that it is capable of irrigating a much larger area than what it is now proposed to add by reclaiming the Swamp.

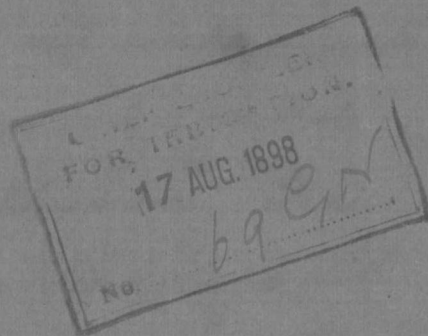

I have the honour to be,
Sir,
Your Most obedt Servt.

this Case.

Also No. 15 Gn of 95. 10/98
7 Enclosures

Sir,

In continuation of my letter No. $\frac{475}{13-8-98}$

On your memo No. $\frac{I}{30 Gn}$ of 29. 7. 1898, I have
the honour to forward 9 cross sections taken
beyond the boundary line of the Dan du
Lakshminipuram swamp. The Chief Engineer
for Irrigation in his No. $\frac{I}{25 Gn}$ of 16. 6. 98 objects
to the Scheme on the ground that the flood
level of the country would be raised, and
land submerged; also that there was no-
thing to show that the flood bank was
of sufficient level to turn the floods.

2. The sections now submitted show
pretty clearly that little is to be feared
on the score of submersion. The ground
falls rapidly towards the tankara
and the flood must pass off through
the drain. There are no data from which
to calculate the section of bank required
but as the water must pass off rapidly
outside, there will be little pressure

against the bank; and in my opinion, the section proposed is sufficient.

3. Portions of the lands of the Peiy and Surzeran at Grabarano will be reclaimed.

4. As regards the supply of water. In ordinary years a supply sufficient to irrigate the Tampara runs to waste from the Polaki Channel over the escapes A, B & C. in the sketch. In a year of draught, such as '96-'97, the ordinary difficulty of supplying lands at the tail end of a Channel would be felt; but it is to be recollected that the whole of the system of River fed Channels in the Chicacole Taluk is being rapidly improved, and with better regulation, the chances of failure of supply in years of drought is decreased.

5. As regards masonry works, it will be more convenient in every way, if the details are worked out after the estimate is sanctioned, so as to suit any modifications decided on in your office. The lump sum provision is, in my opinion, sufficient. It would take time to get plans & C ready, and the principal point to be settled now is whether the Scheme

Scheme is to be adopted or not.

6. I do not think anything more can be said pro or con the Scheme. As I have remarked, before, it is rather out of the usual line; but there are many more of a similar nature in Ganjam which might be carried out if this proves successful. That year ago the Swamp was drained to a certain extent is proved by the old works which have been allowed to fall into neglect, and the eagerness of ryots to see the Scheme carried out by Government or to attempt it themselves.

7. The Executive Engineer Ganjam urges that in event of your being unable to recommend the Scheme to Government in toto, sanction may be given to clear the Channel A to B in the tracing, so that it may be ascertained how far it will be capable of reducing water level in the Tampara. In this, I agree with him.

8. The sections & C are herewith returned.

I have the honour to be,

Sir,

Your most obedient Servant.

incorrect, it will be worthwhile
to proceed tentatively & to get for
an site sanctioned for improving
-ing drain as suggested by the S. I.

and the Western?
 The swamp must even now
 be liable to tidal submersion
 during high tides, so the
 much of the land must be
 salt & unfit for cultivation,
 without a tidal regulator,
 (for which the provision seems
 uncommonly low \$10,000 probably
 required) were the drain improved,
 this would only be accentuated.
 If these latter ~~assumptions~~ conclusions
 can be proved to be incorrect,
 then it will be worth while
 to proceed tentatively & to first
 get an estimate sanctioned
 for improving the drain as
 suggested in para 2 of the
 S.E. letter -

1. Crisno 1/374N

SIR,

With reference to your memo no. I/37GN of 11. 11. 98 and I/33GN of 14. 9. 98, I have the honour to point out that in the latter memorandum, there appears to be some confusion of direction. The points described as S and W, are really W and N respectively.

2.

By far the larger portion of drainage that enters the Swamp comes from the north. Out of 14.5 Sq miles of Combined Catchment area 13 Sq miles enter in this direction. i.e. in the direction of the proposed Stop bank. The drainage from the Western side is comparatively small and most of it is carried to the River by Surplus Channels leading from the Surplus Sluices and by other minor channels without entering the Tampara at all.

3.

Extending the drain would not answer the purpose of the flood bank. The bank is intended to arrest the sudden rush of drainage from the Northern side, which
