OFFICE NOTE.

From I

To R.

With reference to our conversation about arrangements to prevent possible future trouble in connection with the works on the East Coast Railway which will affect Irrigation works. it seems advisable that

(a) Superintending Engineers should be furnished with index plans showing the line as marked out before the masonry works are designed and should be asked to state all the requirements of this Branch of the Department as regards any canals, channels &c crossed or affected.

(b) When the works are designed for such canals, channels or

for

for any streams crossed near anicuts, aqueducts or other Irrigation works, the plans should be sent to the Superintending Engineers Concerned for his Countersignature in acknowledgment that all Irrigation or Navigation requirements have been duly provided for.

2. The Superintending Engineers Concerned are

as far as Ellore - Supg Engineer 2nd Circle.

&

from Ellore Northwards (Godavari - Vizagapatam and Ganjam District) Supg. Engineer 1st Circle

3. If you will get orders issued on the subject in the Railway Branch I will issue instructions to the Supg. Engineers Concerned.

Yrs. &c.

Offr Note from Secretary to Govt Irrigation Branch Dy 10th Sept. 1920

FOR ORDERS.

I think that Mr Walsh's visit is reasonable and that orders to this effect should be issued to the Engineers in Chief East Coast railway –

When Surveys begun in Chief Engr's the Railways in the W.G. it should be done for the Canal departments and time & cost that Mr Walsh now asks for his departments –
