Railway.

Read the following paper :—

From the Collector of the Vizagapatam District, to the Secretary to Government, Revenue Department, dated Vizagapatam, 6th October 1890, No. 3234.

With reference to G.O., No. 5474, dated 5th September, regarding the improvement of irrigation works in the Pálkonda taluk, I have the honor to suggest the desirability of steps being taken to secure the execution of some of the earthwork of the East Coast Railway in the northern half of this district during the coming cold season. One great difficulty for some years to come will be that of procuring labor for the various works in progress in that part of the district. In addition to the railway there will probably be extensive irrigation works to be carried out in Pálkonda, a road 25 miles long will be constructed by the Local Fund Department from near Rájam to near Párvatipur, and Government have just promised me a grant of Rs. 20,000 or Rs. 30,000 for the Párvatipur-Rayaghada road in the Agency if I can expend the money next year. None of these works can be pushed on this season, but everything is ready for the commencement of the earthwork of the East Coast line, and the Chief Engineer, who has just returned from Simla, informs me that he has every reason to believe that the member of the Viceroy's Council in charge of the Public Works Department would give his support to a proposal from the Madras Government that it should be commenced. Such a step would be greatly to the advantage of the other works which are under contemplation, and I trust that Government will see its way to bringing the proposal to the favorable notice of the Government of India.

No. 6283, Revenue.
