CIVIL MEDICAL FORM No. 32.

(Certificate for retirement on invalid pension or gratuity.)

CERTIFIED that I have carefully examined S. Subbraya aiyar

son of

a Clerk Sub Registrar's office

in the Registration Department

His age is by his own statement 48 years and by appearance about 48 years.

I consider S. Subbraya aiyar to be completely and permanently incapacitated for further service of any kind or in the Department to which he belongs in consequence of stricture of urethra and Perineal Fistula (Gonorrhoea)

His incapacity does not appear to me to have been caused by irregular or intemperate habits.

STATEMENT OF CASE.

1. Rank. Clerk Sub Registrar's office
2. Name. S. Subbraya aiyar
3. Department or Office. Registration
4. Marks of identification. an oblique linear scar in the right arm pit. Three small circular scars over the left knee cap.
5. Age. 48 years
6. Service. known
7. Sick leave granted during the service. Not known
8. Disease or cause of Disability. Stricture of Urethra & Pereneal Fistula
9. Abstract statement of case showing how the disease or disability was contracted, the results of the treatment adopted. In case the disease or disability is believed to have been caused by irregular or intemperate habits, the reasons for such belief should be stated.

Previous History: He gives history of having suffered from Gonorrhoea for several years and that it was followed by stricture about three years ago. He used to pass urine with great effort and straining. Last year the stricture became worse, and in consequence scrotum became swollen and painful, in short he suffered from Extravasation of urine and its consequences namely high fever, suppuration and destruction of the perineum terminating in three fistula.

I examined this clerk this morning (27.2.98) and found him suffering from Pereneal fistula three in number; one near the anal aperture, another on the perineum and the 3rd on the scrotum, the stream of urine flows in drops through all the fistula and a small quantity per urethra. It is not possible to pass No 2 Catheter into the bladder. He suffers on days of Catheterization from constitutional disturbance, temperatu rising to 103° - any change in the diet give rise to fever, and from repeated attacks of the same he has lost flesh, weighs 97½ lbs, suffers from anorexia, constipation, furred tongue and offensive breath.

There is some tenderness over the region of bladder from cystitis - Restlessness at night from repeated calls to micturition. His health is so much broken down that I am of opinion that nothing short of surgical operation will restore his health and free passage for the flow of urine. He declines to be operated. I therefore consider him to be unfit for further service.

He has had 7 months sick leave and has not improved in health in the least.

(Signed) M. Thummon Singh MD
Ag Dist Medl & Santy Officer

The man is still suffering from Urinary Fistula - the parts being simply riddled with these fistula. He declines having any operation done.

I consider him quite unfit for any further Service.
