9. Abstract statement of case showing how the disease or disability was contracted, the results of the treatment adopted. In case the disease or disability is believed to have been caused by irregular or intemperate habits, the reasons for such belief should be stated.

This overseer has been on leave since the 11th March last, on account of Scrivener's palsy (right hand). He appeared before me in the early part of last month, with a view to getting an extension of leave to enable him to have further rest and treatment. On examination I found that there was marked wasting of the muscles of the right hand, especially about the thumb and forefinger. Muscular power of this hand was diminished. There was wrist drop. On being asked to write, the fingers grew tremulous, he is unable to grasp the pen firmly. The writing is shaky and he complained of their growing stiff and painful when he writes or draws for a little while. He was placed on nerve tonics and galvanism and massage applied to the hand, which was given complete rest on a splint. In spite, however, of regular and continued treatment, the condition of the hand remains unchanged, and in my opinion there is very little likelihood of its improving. I therefore consider that he is unfit for further service.

Memoandum

Dated, Madras, 27th April 1899

With reference to his letter no 760 GWS dated 1st April 1899, the Superintending Engineer I Bore, is requested to be so good as to have Mr La Fontaine sent to the District Medical Officer in view to his being invalided. That officer, may, at the same time, be informed that Mr La Fontaine is incapable of doing the hard work that falls to an overseer of the Public Works Department; that after repeated trials he has been again and again reported against for failure to do his work; and that unless he is invalided, he must be dismissed, and will consequently lose all his claims to pension.
