I hereby certify that I have carefully examined  
Suddhapah Sahibdar of the Dootor Sahib: I find him to  
be a man of advanced age and service, affected with an involun-  
tary tremulous motion with diminished muscular power of  
the hands and arms which much interferes with the proper  
steadiness of hand requisite for ordinary legible hand writing.  
These symptoms are indicative of incipient senile decay, and  
although he is free from actual bodily disease, I am of opinion  
that from his commencing infirmities he is not equal to the full  
and active discharge of the duties devolving on him.

There is no reason whatever to think that his disease  
or general infirmity has been caused by intemperance or other  
irregular living
