Debilitas

V. Annagay Moodlin Et 50.
Clerk Superintendent of Pension Office
Temperament Phlegmatic
Habits Regular

1st March 66. Patient has been under treatment since the 1st February 66, for general debility and pains; his vision is impaired and the least exertion, he says, produces fatigue and hurried breathing, which unfit him for the efficient performance of his duty.

The treatment consisted of laxatives and tonics, and though benefited by their use, he is prematurely aged and worn out in my opinion not likely to recover, so as to be equal to the discharge of his office duties. I therefore recommend that he be transferred to the superannuation list.
