*Proceedings of the Madras Government, Revenue Department,
16th May 1865.*

No. 277. Read the following letter from T. CLARKE, Esq., Member of the Board of Revenue :—

Submitting Report of the inspection of }
the Salt Works of the Madura District. } (Here enter 15th November 1864.)

No. 278. ORDER THEREON, 16th May 1865, No. 1,024.

Separate Revenue, No. 23.
Salt.

1. In this letter Mr. Clarke reports upon the Salt Department of the Madura District.

2. The length of this District along the sea-board is about 90 miles, and its average breadth is about 100 miles. The population is estimated at 18,56,406, and the average annual sale of salt during ten years has been 2,95,435 Indian Maunds, so that the consumption of salt in the District is about 13 lbs. per head.

3. The sale of salt is shewn to have fallen off since Fusly 1268 (1858-59), when the roads leading to the coast were greatly injured by inundations. A portion of the decrease in later years is ascribed to the opening of the Tanjore Railway. Mr. Clarke observes that "as the Great Southern of India Railway is extended, and salt can be carried from Negapatam by rail to the west, the necessary result of bad or no communications will be more and more severely felt in the eastern parts of this District. Trade will languish, population will migrate, and the country and revenue will suffer."

4. The Government regret that the roads of this District should have been allowed to remain in the deplorable condition pointed out by Mr. Clarke. Orders will be issued from the Public Works Department for making them serviceable for the ordinary traffic of the country so far as the means at the disposal of Government permit. The desirability of converting them into first class roads must form the subject of after-consideration.

5. The reasons given in paragraphs 11 to 14 of the Report for reducing the

Stations to be retained.	Average amount stored during ten years.	Average sales during ten years.
	Maunds.	Maunds.
Vattanam	84,191	26,031
Vyavanadapatnam ..	31,775	27,410
Attankarai	45,674	23,514
Moreecolum	26,207	19,563
Muttiregunadapatnam.	59,521	..
Stations to be closed.		
Soliagoody	29,740	26,075
Managoody	49,030	40,800

number of salt stations from seven to five are conclusive, but the measure cannot be carried until reasonably good roads are formed to the other depôts. When this is done the Government will not hesitate to carry out Mr. Clarke's proposal, as they observe from the Collector's letter,* dated 21st December 1861, No. 1,255, that the manufacture of salt can be increased to a large extent if necessary at some of the stations proposed to be retained. The Board will report upon the consequent reduction which can be made in the establishment.

* Board's Proceedings, dated 21st February 1862, No. 1,255.

6. The Government are pleased with the high testimony borne by Mr. Clarke to the labors of Rama Row, the Deputy Collector in the Salt Department of the District. They have recently promoted him, and expect that he will continue to spare no pains to improve the quality of the salt, and prevent all malpractices. He will attend carefully to the suggestion made in paragraph 19 of the Report.

7. The Board of Revenue will communicate the remarks made in paragraphs 20 to 24 to the Salt Deputy Collectors of other Districts for their information.

8. The Government will now notice such parts of the remarks of Mr. Clarke on each salt station as require orders.

*Proceedings of the Madras Government, Revenue Department,
16th May 1865.*

9. VATTANAM.—The recent sales at Vattanam have been trifling, owing to the fact that the stores have been closed in order to get rid of the salt remaining on hand at the neighbouring abolished stations of Titandadanum and Kiliyanagiri. Mr. Clarke points out, however, that the average home sales at all three stations taken together do not bear any reasonable proportion to the population of the large villages in the neighbourhood, and fears that many of these places are supplied with earth-salt from the Tondiman's country on which they border. The Board of Revenue will be requested to call the immediate attention of the Collector to this part of the Report, in order that he may take steps to discover and punish any breaches of Salt Law which may be committed in his District.

10. Mr. Clarke recommends for favorable consideration the request of the manufacturers of Titandadanum and Kiliyanagiri to be allowed compensation on account of the closing of the pans at those places. The Government are not disposed to re-open this question, which was considered and disposed of in the Proceedings, dated 7th July 1862, No. 1,470.

11. Paragraph 39 will be referred to the Public Works Department, in order that the Engineer Officers of the District may be requested to report upon the Deputy Collector's proposal that a bank should be raised in the Virasuliar, west of the road No. 8, and the stream diverted into a channel which is already in existence.

12. SOLIAGOODY AND MANAGOODY.—Soliagoody and Managoody are the two stations which are about to be abolished. The excess found in the heaps is very unsatisfactory, and all the more so because it is caused by a peculiarity in the mode of measurement adopted at the pans. The wastage here is stated to have been very large, and it is attributed partly to the length of time during which the salt has been in store, and partly to the fact that salt is measured in the same way when stored as when sold.

13. VYRAVANADAPATNAM.—Vyravanadapatnam is much frequented by an important class of traders, who complain greatly of the want of a road. The proposal to make one from Yellayangoody or Nynarkoil to Vyravanadapatnam, as well as the suggestion that a high bank should be raised so as to protect the pans at the latter place from river floods, and that a channel should be made to bring salt water direct from the sea to the pans, will be considered in the Public Works Department.

14. The store is described as being in good order, and the salt clear and white, but the quantity on hand is not sufficient to meet the demand. The manufacture should be increased without delay.

15. ATTANKARAI.—The arrangement of the pans at Attankarai, described in paragraph 63, is very creditable to the Department. The want of a road from Ramnad should be speedily supplied, and orders on this subject will be issued in the Public Works Department.

16. The salt in store is shown to be much larger than necessary, being equivalent to five years' average sales, and it is much deteriorating by age. The wastage has also been large. Under these circumstances the manufacture should be diminished, so as to reduce the store to reasonable limits.

17. MORECOLUM.—Mr. Clarke strongly supports Mr. Levinge's recommendation that a road should be made from Morecolum to join the main Road No. 15 at Yettwail. Orders will be issued in the Public Works Department on this subject, as well as with regard to widening the last mile of the sea channel by which the pans are fed.

18. PAUMBEN.—Mr. Clarke states that a great quantity of spontaneous salt is generated on the island of Paumben occasionally, and suggests that it may be collected and stored for sale there. This proposal is approved, and an outlay of Rupees 35 per mensem for the requisite establishment is sanctioned, as a temporary arrangement. A report on this experiment should be submitted after two years.

*Proceedings of the Madras Government, Revenue Department,
16th May 1865.*

19. MUTTURAGOONADAPATNAM.—Large quantities of spontaneous salt are also generated at Mutturagoonadapatnam, in a swamp which extends for miles, and cannot be effectively guarded. This salt is not liked by the people, but they nevertheless carry it off clandestinely to such an extent as to affect the home sales considerably. The cost of carrying this spontaneous salt to Mutturagoonadapatnam would be about Rupees 15-12-0 a Garce, and the Deputy Collector is of opinion that the best course is to destroy it. Mr. Clarke remarks that unless it can be effectually destroyed, it would be better to cut a canal to Mutturagoonadapatnam and convey the salt thither. Before passing final orders on the subject the Government resolve to call upon the Engineer Officers of the District, through the Public Works Department, for a report on the practicability of this proposal to dam up the fresh water in the swamp, and shut out the salt water from it at a moderate expense.

20. At this station as at Attankarai there is a large quantity of old salt in store. The Collector must give great attention to the regulation of the manufacture with reference to the average sales. The Government have in their Order, dated 24th December 1863, No. 2,378, paragraph 50, pointed out the inexpediency of storing large quantities of salt. The largest store should in no case exceed the average sales of two years.

21. The strong recommendation made in paragraph 93 of the Report, for the erection of a bridge over the Goondar, will receive early attention in the Public Works Department.

22. The suggestion made in paragraph 96, for shutting out the sea-water from the swamp at Nariapoor, should receive Mr. Levinge's immediate attention, and he should place himself in communication with the Engineering Officers of the District, with reference to the subject.

 Comm. for Pacific Islands
 21 January 1871

From

W. Mac. Lehae. Esquire

By collector of Madras

Thos. H. Dearmont General.

Fort Saint George

Ad.

In Submitting an application for pension in favor of Dorasing Sengar of Panchakali Taravai Vast Station, I have the honor to state that no medical Certificate is herewith sent as the application was discontinued consequent on the abolition of the office.

2 The applicant ceased to be borne on the Government List from the 22nd July 1860 and states that he did not apply for pension at once in hopes of again obtaining employment but that he applies now as he understands that after 55 years of age no one will be admitted into Government Service.
