10TH AUGUST 1882, No. 699, PENSION.

GOVERNMENT OF MADRAS.

PENSION DEPARTMENT.

READ—the following papers:—

From the Superintending Engineer, Second Circle, dated 26th June 1882, No. 657-K.S.

From the Examiner of Public Works Accounts, to the Secretary to Government, Pension Department, dated Madras, 15th July 1882, No. 250 X.

I have the honor to forward herewith, for the orders of Government, an application for extraordinary gratuity submitted by the Superintending Engineer, Second Circle, on behalf of the family of Silamsetti Subbarayudu, late a Lock Lascar, Kistna Western Division.

2. From the Superintending Engineer's letter, printed with G.O., No. 221 I., dated the 9th March 1882, copy attached, it will be observed that the deceased met his death in the performance of public duty. Should Government feel disposed to take a favorable view of the case, there appears no objection to the extraordinary gratuity of Rs. 100 recommended by the Superintending Engineer being sanctioned under the ruling contained in Section 157 of the Civil Pension Code.

3. The delay in the submission of the gratuity application is explained by the Superintending Engineer in paragraph 2 of his letter, No. 657 K.S., dated 26th June 1882, copy enclosed.

4. Early orders solicited.

ORDER—dated 10th August 1882, No. 699, Pension.

Under Section 157 of the Civil Pension Code (5th Edition), the Right Honorable the Governor in Council is pleased to grant to Silamsetti Pulliah, eldest son of late Silamsetti Subbarayudu, late a Lascar, Revendrapad Lock, Kistna Western Division, an extraordinary gratuity of Rs. (100) one hundred, payable at Guntur, in consideration of his father having been killed while in the execution of his duty.

PUBLIC WORKS DEPARTMENT.

9th March 1882, No. 221 I.

Irrigation.
Establishment.

Read the following paper :—

No. 36. From J. W. RUNDALL, Esq., Superintending Engineer, Second Circle, to the Chief Engineer for Irrigation, dated Masulipatam Canal, 23rd February 1882, No. 2468 K.S.

I REGRET to have to report an accident in the Western Delta, by which a lascar named S. Subbarayudu has lost his life. No. 2626 of 3rd February 1882, from the Executive Engineer, Western Division.

2. A copy of the letter from Mr. Wybrow, Executive Engineer, describing the accident and the causes which led to it is also forwarded.

3. I have ascertained that the match used was some of that manufactured at Bezwada, and its failure to ignite the charge the first time was due to its being damaged. Mr. Wybrow's experiment, which gave a rate of burning of 3 inches in 15 minutes, must, I believe, have been entirely fallacious.

4. It is much to be regretted (and I believe that no one regrets it more than Mr. Wybrow himself), first, that Mr. Wybrow did not make sure that every one around had gone out of reach of danger before the match was ignited, and, secondly, that a greater length of match was not used.

5. I have delayed reporting this accident till I had received the report of the inquest held after the death of the lascar on the 6th instant, which was not originally sent to me. The inquest does not however deal with the cause of the injuries, but simply finds that the lascar died from certain injuries which are described.

From G. D. WYBROW, Esq., Executive Engineer, Kistna Western Division, to the Superintending Engineer, Second Circle, dated Duggirala, 3rd February 1882, No. 2626.

I REGRET to have to report to you the occurrence of an accident which occurred this morning, when experimenting with dynamite on the Western Delta Main Canal, resulting in a serious injury to a lascar named S. Subbarayudu, attached to the Revendrapad Lock.

2. The details are briefly as follows :—The stump of a tree for the experiment was selected on the left bank of the canal in the 8th mile, and about quarter of a mile above the Revendrapad Lock. A hole 1½ feet in depth was bored transversely to the centre of the tree, and three dynamite cartridges, together with a primer and fuze 1½ feet in length, inserted. The hole was plugged, leaving a groove for the slow match.

3. Owing to the fuze I had, having been previously injured, the 1½ feet inserted burnt very slowly, and eventually went out without igniting the charge. After waiting for an hour I withdrew the primer and remainder of the fuze.

4. I then tried experiments with the fuze and found that 3 inches in length took fifteen minutes to burn.

5. After making these experiments I substituted a fresh primer and fuze, the latter being 9 inches in length, and expected that three-fourths of an hour would elapse before the charge in the tree would be ignited. I lighted the fuze myself, and supposed that Mr. Ussher (who also was present) and the lascar had removed to a safe distance, when the charge exploded suddenly. I myself had only got away about 15 yards, and the lascar, being an oldish man, had only got 10 yards away. A splinter from the tree struck the lascar just below the knee, inflicting a deep flesh wound.

6. Measures were at once taken for staunching the blood by Mr. Ussher, whilst I rode off to Duggirala for the Dresser, who arrived within an hour afterwards.

7. The lascar was at once taken to Duggirala, and is being attended to by the Hospital Dresser, F. Chinnasawmy Pillay. The latter reports that the man is going on well, but that so severe a shock to a man of over 50 years of age is dangerous.

No. 36-A.

ORDER THEREON, 9th March 1882, No. 221 I.

RECORDED with the remark that good fuze, and an adequate length, so as to enable all concerned to get away to a sufficient distance, are essential to safety.

Copy of letter from the Superintending Engineer 2nd Circle to the Examiner Public Works Accounts Madras No. 457 H Dated 26 June 1882

I have the honor to forward herewith an application for an extraordinary Gratuity of Rs 100 in the name of Silamsetti Pulliah legal eldest son of Silamsetti Sub. Parayudu late a Lascar of Reverendrapad Lock in the Kistna Western Division killed in the execution of his duty, Vide G.O. No. 1. S.I. of 9th March 1882, and to request that the sanction of Government may be obtained for the payment of the same

2 The application has been delayed owing to the complicated domestic arrangements of the deceased, who left 2 widows in the Godavari District and a Concubine in this District.

3 The Executive Engineer first proposed to pay the gratuity to the Concubine, but I refused to send on the papers and further enquiries had to be made regarding the widows. It has now been ascertained that ^{the} son to whom it is now proposed to

to pay the gratuity supports the & widows
