Government of Madras.

Public **DEPARTMENT.**

G.O. No.	<i>958</i>	Press Mis.
Dated	<i>13-7-</i>	<i>1965.</i>

P 520 NO = 91

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Department,
13th September 1865.*

Read the following letter from the Principal Inspector General, Medical Department.

(Here enter 31st May 1865, No. 169.*)

No. 91. ORDER THEREON, 13th September 1865, No. 958.

The extracts appended to the foregoing letter from the Annual Reports of the Medical Officers on the working of the Vaccine Department during the year 1864, go far to show that the Returns sent in by the Vaccinators are, in most cases, not to be relied on, and, as it appears that the new scheme for a more efficient supervision of this Department will not be fully organized until late in the present year, the Government will not be in a position to judge of the result until the Report for 1866 is submitted.

2. Under the circumstances represented in paragraph 3, the Governor in Council approves of the suggestion of the Principal Inspector General, Medical Department, that the Returns of Vaccination of the Mysore Territories be excluded, for the future, from those of the Madras Presidency.

3. While disposed to attach some weight to the professional opinion reiterated by Mr. Cole, in favor of enforcing Vaccination in the case of pupils, not otherwise protected, who seek admission into the Government or aided schools, the Governor in Council considers that no further steps can be, at present, taken in the matter than those already ordered.

Proceedings, 24th February 1864, No. 66.

4. The Governor in Council appreciates the object Mr. Cole has in view in confining the operations of the General Superintendent's Staff of Vaccinators, in the first instance, within a given range of small extent.

5. First Class Vaccinator Narrainsawmy, of the Bellary District, has, it seems, served for a period of forty-two years, and it is inferred from the report of the local Superintendent that he is now incapacitated for further work. If so, he should be at once discharged.

in a position to judge of the result until the Report for 1866 is submitted.

2 Under the circumstances represented in para 3 the Governor in Council approves of the designation of the Principal Inspector General, Medical Department, that the Returns of Vaccination of the Mysore Territories be excluded, for the future, from those of the Madras Presidency.

3 While disposed to attach some weight to the professional opinion reiterated by Mr Cole in favor of enforcing vaccination in the case of pupils, not otherwise protected, who seek admission into the Government or aided Schools, the Governor in Council considers that no further steps can be, at present, taken in the matter than those already ordered. Pres: 24th February 1864 4-66.

4 The Governor in Council appreciates the object Mr Cole has in view in confining the operations of the General Superintendent's Staff of

With reference, however, to his proposal to endeavour to vaccinate every unprotected person in a given town or village, the Govt doubt very strongly the feasibility, considering the strong prejudices which are still to be overcome on the subject - If practicable, the experiment would most probably have a strong effect in removing existing prejudices.

5 of vaccinators, in the first instance, within a given range of small extent. ~~Considering, however, that native prejudices, which, it is believed, exist more or less in every town and village, have still to be overcome, it is doubtful whether every unprotected person within such range can be prevailed upon to submit to vaccination.~~

5 First class Vaccinator Harramswamy of the Bellary District has, it seems, served for a period of 12 years, and it is inferred from the report of the local superintendent that he is now incapacitated for further work. ~~The Principal Inspector General will state what he would propose in this case.~~
