Proceedings of the Madras Government, Public Department,
20th June 1866.

No. 108. Read the following letter from the Chemical Examiner, Madras, to the Acting Chief Secretary to Government, Fort Saint George; dated Madras, 12th June 1866, No. 94.

As the room built at the Medical College for the use of the Chemical Examiner is now nearly completed, I have the honor to bring to the notice of Government the necessity that exists for the construction of a verandah on the west side.

2. In this direction no shade whatever is afforded, and the consequent glare is so great as to necessitate the entire closure of the venetians. In addition, a verandah is much needed, beneath which I can place the larger furnaces I am sometimes obliged to use in poison cases. The whole operation in these cases having, of course, to be conducted by myself, it would be inconvenient working partly up-stairs, and partly below in the Laboratory. The verandah would, also, afford shelter to the Lascar in washing out apparatus, &c.

3. Under these circumstances, I have the honor to solicit the sanction of Government for the construction of the verandah, 25 feet in length and 10 feet in width, to be floored with asphalt.

4. I am informed by the Executive Engineer that as this verandah was not included in the original plan, the sanction of Government is requisite. The expense of construction, if made of corrugated iron, will not, I believe, be very great.

No. 109. ORDER THEREON, 20th June 1866, No. 613.

A plan and estimate of the verandah required for the Chemical Examiner's room will be called for in the Public Works Department.

(True Extract).
