and that the total amount that shall be raised and expended in the said town of Nellore, as so declared to be united as aforesaid, during the half-year ending on the 30th April 1867, for the purposes specified in Section 25 of the said Act, shall be Rupees 9632, of which sum 25 per cent., or Rupees 2408, shall be contributed by Government to the Municipal Fund.

3. Owing to the difficulty which arose in first bringing the Act into operation, and in collecting reliable data on which to work in fixing the valuation and assessment on houses and shops, considerable delay has been caused, and the Commissioners have been unable to attempt any important works. It will, however, be perceived that there is at present a fair balance to the credit of the Commissioners, which will assist materially in conservancy operations for the ensuing year.

*Proceedings of the Madras Government, Public Department,
12th July 1867.*

4. But although no important operations have been undertaken, the minor provisions of the Act have been gradually introduced, such as the cleaning of the streets and roads, the prevention of encroachments upon them, and the general cleaning of filthy houses and lands. By these means, the people are being prepared for the more extensive sanitary operations which it is hoped will be commenced this year.

8. It will be seen, therefore, that considerable works of a permanent nature will, it is hoped, be undertaken in the coming year, without resorting to the issue of debentures for the purpose. As these works will not be required to be constructed from year to year, a considerable sum will be ~~set~~ free in the future for further conservancy operations.

9. As regards the expenditure on account of the repairs to roads, &c., it is proposed that, out of the sum allotted, a monthly outlay be made for the purpose of engaging laborers to keep the roads in proper repair. Certain roads or streets will be placed under the charge of one man, whose duty it will be, under the general superintendence of the Nuisance Inspector, to keep in order, by repairing from time to time as occasion may require, the roads allotted to his charge.

10. The expenditure on account of the Police is more than was originally proposed, but owing to the straggling nature of the town, it has been found quite impossible to work a smaller force effectively.

11. The following is the statement submitted by the Superintendent of Police, under Section 30 of the Towns' Improvement Act, of all sums received and expended by him in the past year :—

No. 116. From the Acting President of the Municipal Commission, Nellore, to the Acting Under Secretary to Government, Fort Saint George; dated Nellore, 13th June 1867, No. 2.

I have the honor to acknowledge receipt of your Official Memorandum, No. 167, dated 11th instant, and, in reply, beg to state that the municipal expenditure of last year amounted to Rupees 4810 only, because nothing was done except to pay the Police, the office, and scavengers' establishments. Many of the streets and roads in the town are in the greatest dis-repair, for it is long since anything has been done to them. We have still to construct drains at the sides of the streets, urgently needed. We are only now giving out the contracts for the construction of latrines, dust boxes, rubbish pits, toll-houses, &c. The state of the town renders it imperative that something should be done without delay, for it is the general complaint as yet, that the roads, &c., are in a worse state than when there was no Municipal Commission. The estimate for Rupees 2573-10-9 has been framed with the strictest regard to economy, in consideration of the actual wants of the community, and I trust the amount may be sanctioned by Government. Of course, there are large expenses in starting, which will not occur every year. Hereafter, it may be possible to reduce the amount of the actual expenditure.

2. I have further to observe that it has been found necessary to increase the Police Force of the town, which is one item that has largely swelled the estimate.

Referred to the Inspector General of Police for his remarks, with reference to the proposed changes in the constitution and pay of the Police Force.

No. 118.

ORDER THEREON, 12th July 1867, No. 823.

With the first of the foregoing letters, the President of the Municipal Commission, Nellore, submits a report on the working of the Towns' Improvement Act in Nellore during the half-year ending on the 30th April 1867, and estimates of probable receipts and intended expenditure for the current year ending on the 30th April 1868.

2. The receipts actually realized by the Commissioners during the past half-year slightly exceeded the estimate under the same head. Rupees 7443-6-10 were realized; and this sum, with the Government contribution of Rupees 2408, and Rupees 710-5-3 transferred to the credit of the Municipality by the late Conservancy Association, gives a total of Rupees 10,561-12-1. The actual expenditure amounted to Rupees 4810-0-4 only, leaving a balance of Rupees 5751-2-9.

3. While admitting that some difficulty may, as stated by the President, have attended the introduction of the Act, the Government do not consider that the Commissioners have availed themselves of the funds at their disposal as fully as might have been expected, the balance exceeding the whole amount of the Government contribution.

4. During the current year, it is proposed to raise and expend, for the purposes specified in Section 25, a total amount of Rupees 25,073-10-9, or, adopting the Police charges as revised by the Inspector General of Police, Rupees 25,093-11-1. The Government contribution is to be calculated on this amount, as provided in Section 27 of the Act, and not on the amount to be raised by the Commissioners only: deducting, therefore, the sum of Rupees 863, arrears remaining uncollected during the past half-year, on which it is obvious the Government are not bound to contribute again, the State contribution will be Rupees 6057-10-9½. This sum, with the amount which the Commissioners undertake to raise, will amount to Rupees 21,515-10-9, and, including the balance at the disposal of the Commissioners, to Rupees 27,266-13-6, or more than Rupees 2000 in excess of the intended expenditure.

5. On the understanding that the Commissioners will use every exertion to carry out the more permanent works which it is proposed to construct, and will fully utilize the large sum at their disposal for strictly conservancy purposes and the thorough repair of roads, the Government will not refuse to contribute an amount equal to 25 per cent. on the sum actually expended during the current year. But the President will take care that, in the event of any balance standing to the credit of the Commission on the first of April next, the rate payers and the Government shall not, in future, be called on to contribute a sum in excess of actual requirements.

6. The slight alteration in the boundaries of the Municipality on the north side will be made in accordance with the proposed Notification submitted by the President.

7. The bye-laws proposed are, in accordance with Section 145 of the Act, approved and confirmed, as altered and amended, and will be published for a period of one month in the *Fort Saint George* and *District Gazettes*.

8. The following Notifications will accordingly be published:—
