

N. 209

Office of the Superintendent General of Vaccines
at the 14th February 1886

The Superintendent General of Vaccines
Charles Hensley

The Secretary of the General
Sanitary Department
at St George

Sir
With reference to the letter from the Collector of
Salem, (Mr Pochin) which has been forwarded to me
for report, I beg respectfully to refer to the Proceedings
of Government, dated 21st September 1886, on a similar
complaint made by the then Collector of Salem, and my
explanation thereto, which still holds good.

2. My Monthly Reports to the Inspector General will show
that neither myself nor my subordinates spare our
efforts in any way in order to prevent the propagation of
the prophylactic.

3. I state the liberty to give here a single letter
to the Collector of Salem, dated 10th January 1886, in
which I stated that I was not ready for such a journey, on hearing
Mr Carmichael, the then Collector of Vizagapatnam
the unsatisfactory state of Vaccination in his district.
I at once, unprepared as I was, started for that
Province - carried a supply of fresh lymph by opera-
ting in my followers and cooks from different
villages, and without much difficulty was able
to establish a lymph at Mysore from Am to Am-
harnig, organized and set working a staff of 6 vac-
cinators. I returned to the Presidency on the 27th May by
two afterwards accompanied with my annual report
and other official work. On the 1st June I was
nauclated in consequence of a rupture of the
of small pox during time of small pox in the
April I left Madras for the Sheringa to inspect
work - on the 16th May I left for Bangalore to
inspect the work of the Vaccinators there, and on
the 21st proceeded to Coimbatore, where I immediately
superintended the work of 2 Vaccinators at Vothy
Coimbatore, Neddiontham, Goddathur and Nory
On the 12th July I left Nory for Calicut

	Salem Talug	4274	3937	337	
	do. Nazipoor Div.	4379	3912	467	
	Total	21,824	19,798	2,026	

All the vaccinators joined me for the Salem Talug on the 1st July last year.

It will be seen therefore that, during the last year, there were 10 vaccinators at work in 8 Talugs of the Salem district from April to June, and from the 1st July, 14 vaccinators working in the Salem Talug. So that, during the last year for 9 months out of the 12 the district of Salem had never less than 10 vaccinators working in it.

The last time I was to Althor some few days ago, I found "one of the vaccinating department since I came to the district though I have been in every Talug during the last year." I can only account for my supposing that he had not been during the months of April, May, and June, to any of the Talugs where the vaccinators were working the last recess. He might have been to

21,824 cases have been operated upon during the past year, giving an average of 1818 cases per month. 1611 miles have been traversed by me, & 288 inspections made. 7229 were personally operated on by me. Besides the 7229 vaccinated cases, scarce a day had passed over during the year without my personally superintending some of the vaccinators while at their work.

I forwarded a resume of my work for the past year called for in Memo. No. 197 on the 17th instant, but this one I was unable to give a detailed account of the numbers operated upon, & the names of the talugs in which the operations have been done, will be found to be a more full account of the last year's work of the Salem Vaccine Circle.

I have the honor to be
Yours faithfully
W. H. Roalson

those places either before or after that period, and then never met any.

7. The present arrangement of providing Vaccinators during the recess to each taluk instead of keeping them all at one place in the first recess (1866) would now enable every taluk to have the service of a vaccinator for three months in every year.

Office of Supt. Genl. of Vaccine, Madras
Madras, 25th February 1868.

From
The Supt. Genl of Vaccine
Madras

To
The Secy. to the Inspector General
Indian Medl. Dept.
Fort St. George

With reference to Ticket No 658
dated 17th February, I have the honor to sub-
mit herewith copies of two letters received from
Mr. Boulth, Dy. Supt. of Vaccination of the Salem
Circle, giving an explanation of his work for
1867, from which it would appear that, he had
completed two tabugs during that year, -
one in the Salem, and the other in the North
District, systematically; in addi-
tion, a vaccination was made in each
of the Tabugs of the Salem and North
Districts comprising the Salem Circle
three months in 1867.

Have the honor to be

Sir
Your most obedt. Servt.

John Chittenden, Surgeon
Supt. Genl. of Vaccine.

to be made, our intimation to that effect will receive immediate attention.

3 I trust that this provision will obviate any further cause of complaint.

I have the honor to be,
Sir,

Your most obed^t servt.
W. MacKenzie
Inspector General,
Indian Affairs Department,

During the year I made 2081 inspections
travelling over 1611 miles - 7229 cases?
Cases came under my observation and
442 subjects were personally operated
on by me - Besides the 7229 vaccinated
cases that I inspected, I have seldom
passed a day without personally
superintending the operations of the vac-
cinator who has been under immediate
eye throughout the working season of the
past year.
