*Proceedings of the Madras Government, Public Department,
6th October 1869.*

No. 31. Read the following Despatch from the Right Honourable the Secretary of State for India, to His Excellency the Right Honourable the Governor in Council, Fort Saint George; dated India Office, London, 25th August 1869, No. 13, (Sanitary.)

I herewith forward, for the consideration of your Excellency in Council, a "Report on measures adopted for sanitary improvements in India during the year 1868, and up to the month of June 1869, together with Abstracts of Sanitary Reports for 1867, forwarded from Bengal, Madras, and Bombay," forming the Sanitary Volume for the present year, in continuation of the Memorandum on Sanitary Measures and Abstracts of Reports transmitted with the Despatch of my Predecessor in Council, dated the 31st October (No. 8) 1868.

2. The abstracts given in the present volume are for the year 1867. They refer to the latest reports which have been received in this office. I consider it very desirable that the Annual Reports of the Sanitary Commissioners should, if possible, be transmitted to this country at an earlier date than at present is the case, so that the Abstracts of Sanitary Reports of the immediately preceding year may be given in each annual Sanitary Volume.

3. With reference to the Despatch of my Predecessor in Council, dated the 16th September 1868, (No. 7,) Sanitary, I request that your Excellency in Council will issue the necessary instructions for transmitting a map showing the progress of cholera, and the other additional statistical information suggested in Dr. Goodeve's letter, (copy of which was forwarded in the above-mentioned Despatch,) if possible, in time for insertion in the Sanitary Volume for 1870.

4. It appears to me that it would, moreover, forward our knowledge of the causes of disease in India if tabular statements could be given of the death-rates of children born in India of European parents, for various ages, such as—

Under one year.

One, and under two years.

Two, and under three years, &c., &c.

It would further be of importance to detail the causes of invaliding in the European and Native Army.

5. One hundred copies of the enclosed report will be forwarded for distribution, *via* Southampton.

6. With reference to the 3rd paragraphs in Sanitary Despatches, dated 30th November, (No. 10) 1868, and 31st October, (No. 8) 1868, I would again request that instructions may be given for forwarding any communication from your Excellency in Council relative to Public Health, civil or military, direct to the Sanitary Department at this office.

No. 32. ORDER THEREON, 6th October 1869, No. 1388.

The foregoing Despatch will be communicated to the Sanitary Commissioner, who is requested to arrange, in concert with the Inspectors General of the British Medical Service and Indian Medical Department, for compliance with the orders of the Secretary of State contained in paragraphs 2, 3, and 4.

*Pr^{cl} [redacted] ngs of the Madras Government, Public Department,
6th October 1869.*

2. The instructions contained in paragraph 6 will be attended to.
(True Extract.)
