No. 170. Read the following letter from the Sanitary Commissioner for Madras, to the Chief Secretary to Government, Fort Saint George; dated Madras, 5th February 1869, No. 399.

I have the honor to forward, for submission to Government, the accompanying Report on the causes of death in Madras, during the year 1867, drawn up by Surgeon Henry King while acting as my Secretary.

No. 171. ORDER THEREON, 18th February 1869, No. 225.

His Excellency the Governor in Council has received with interest the foregoing Report on the causes of death in Madras during the year 1867.

2. It is satisfactory to find that the death-rate of the year was lower than that of 1866, the prevalence of small-pox alone preventing it from ranking as a conspicuously healthy year. The attention of the Superintendent General of Vaccination was called to this subject in the order of Government, dated 9th February 1868, No. 147.

3. His Excellency in Council desires to call the attention of the Sanitary Commissioner to the delay that has taken place in the submission of this Report, which did not reach the Government until the expiration of thirteen months from the period to which it relates.

(True Extract).
