*Proceedings of the Madras Government, Public Works Department,
4th March 1869.*

No. 119. Read the following letter from the Superintending Engineer, 6th Division, to the Secretary to Government, Public Works Department, dated Tanjore, 11th February 1869, No. 1,183 :—

1. I have the honour to enclose an estimate, amounting to Rupees 2,480, for
- | | |
|---------------------------|---------------------------------------|
| 1 Estimate with appendix. | carrying a bank along the Coodamoorty |
| 1 Sketch. | from the point where the Tirutanty |
| 1 Plan. | bank ceases to some high ground over |

which the floods in the Coodamoorty are never likely to rise.

G. O. No. 540, 17th February 1868.

* Letter No. 497 in G. O., No. 2,637 of 18th August. 2. The Tirutanty, bank which was breached in January 1868, has been restored,* but in very high floods it is

possible that the bank may be turned, and, if so, the Railway embankment would probably be again breached.

3. The fact of the flood-waters being now confined to the river by the Tirutanty bank would, in high floods, or on the occurrence of breaches in the Wycondan, cause the water level to rise over the high ground on which it is now proposed to raise a bank, and after washing away a portion of Worriore, a suburb of Trichinopoly, would pass round the point marked on the plan "end of Contractor's work," whence the road rapidly falls to the barrel drain, and would again destroy the Railway embankment. It was originally proposed to raise the road from Z. southwards, and to divert it somewhat to meet some high ground to the east of Z. Y., but this entailed the destruction of some buildings, and interference with private property, and the estimate, exclusive of any compensation it might have been necessary to pay for the ground to be occupied by the bank, amounted to Rupees 3,804; the plan now proposed, of carrying a bank along the Coodamoorty river, has therefore been adopted; this entails the formation of a revetment along the yellow line X. W., across a passage to the river by which people have hitherto proceeded to the river to obtain water, and a ramp revetted with stone has been formed for their accommodation. An ordinary embankment could not be formed across this passage, as the front slope would interfere with the deep stream in high floods, as the river here turns at right angles.

4. The estimate, including provision for the revetment, amounts to Rs. 2,480.

5. The revetment wall should be commenced at once, and as there are no funds available for the work, Rupees 750 will be included in the list of requirements and surrenders for the work in 1868-69.

No. 120.

ORDER THEREON, 4th March 1869, No. 699.

CIVIL WORKS, No. 15.

The Government approve of the estimate of Rupees 2,480 for the construction of a bank along the Cooda-

moorty river near Trichinopoly, and grant authority for the immediate commencement of the revetment referred to in paragraph 5.

2. In the Government Proceedings, Public Department, of 2 July 1867, No 764, is recorded a letter from the Native Surgeon putting forth his claim to the said building, and urging its recognition on the part of Government.

This was when it was supposed the Institution was about to close, and the Building would be no longer required. But as it is now likely to be permanent. Dr. Ignatius waives any pecuniary claim he may have

against

against the building - I am not aware of the precise nature of that claim - though the amount is stated by the Native Surgeon, and as undoubtably he was the prime mover and Contributor to the Dispensary building, I am sure Government will appreciate his philanthropy and public spirit in relinquishing all claims in favor of the Government whose exclusive property it will henceforth be; and I propose taking from Dr. Ignatius a formal

of breaches in the Wyand an cause
the water level to rise over the high
ground on which it is now proposed to
raise a bank and after washing away
a portion of Worriore, a suburb of Trichinopoly,
would pass round the point marked on
the Plan "End of Contractors Work" where
the road rapidly falls to the barrel drain
and would again destroy the Railway em-
bankment. It was originally proposed
to raise the Road from Z Southwards and to
divert it somewhat to meet some high
ground to the east of Z. y. but this entails
the destruction of some buildings and inter-
ference with private Property and the Estimate,
exclusive of any compensation it might
have been necessary to pay for the ground to be
occupied by the bank, amounted to Rs 3804,
the plan now proposed of carrying a bank
along the Coomoorly River has therefore
been adopted, this entails the formation
of a Revetment along the yellow line & W
across a passage to the River by which
people have hitherto proceeded to the River
to obtain water and a ramp revetted
with

92
with Stone has been formed for their
accommodation. An ordinary em-
bankment could not be formed across
this passage as the front slope would
interfere with the deep stream in high
floods as the River here turns at right
angles.

The Estimate including provision
for the revetment amounts to Rs 2480.

The revetment wall should be
commenced at once and as there are
no funds available for the work Rs 750
will be included in the List of require-
ments and surrenders, for the work in 1868/69.

*Proceedings of the Madras Government, Public Department,
1st November 1869.*

No. 1. Read the following letter from the Acting President of the Bellary Municipal Commission, to the Chief Secretary to Government, Fort Saint George, dated Bellary, 15th October 1869, No. 110.

The Executive Engineer, Lieutenant-Colonel G. Palmer, who is also ex-officio a member of the Municipal Commission of Bellary, has requested me to submit a question to Government in the hope that his position as regards his responsibility may be defined.

2. He asks whether he, as ex-officio member, is responsible for *all* professional matters connected with the Municipality, that is to say, for all works proposed and carried out by the Municipality which would be classed as Engineering works, or whether he is responsible only for those with regard to which his advice and assistance have been asked and obtained. I have given it as my impression that he cannot be held responsible for works with regard to which he has given no advice and expressed no opinion; but I agree with him in thinking that his opinion should be asked upon all such matters.

No. 2. ORDER THEREON, 1st November 1869, No. 1487.

The Acting President of the Bellary Municipality will be informed that, as Section 16 of the Towns' Improvement Act No. X. of 1865 defines the extent to which each Municipal Commissioner is personally liable, the Government do not consider it necessary to express any opinion on the question submitted to them in the foregoing letter.
