No. 75. Read the following letter from the Acting President of the Municipal Commissions in Tanjore, to the Acting Chief Secretary to Government, Fort Saint George, dated Vallam, 3rd March 1870, No. 30.

I have the honour to submit, in the prescribed forms, estimates of receipts and charges proposed to be raised and expended in the Municipal Towns of Tanjore, Negapatam, Mayaveram, Combaconum, and Mannargudi, during the year 1870-71, as also lists of the names of the persons to be appointed as Commissioners.

2. I beg also to enclose five estimates of Police charges as received from the Superintendent of Police.

3. The Commissioners of Tanjore propose to revise the Municipal boundary so as to include a tank outside the Fort which supplies the town with drinking water; and in Mannargudi the southern boundary is revised in order to include two large burning-grounds, which previously had been omitted. I recommend, therefore, that these alterations may be sanctioned accordingly.

No. 76. ORDER THEREON, 12th April 1870, No. 429.

With the foregoing letter the Acting President of the Municipal Commissions in Tanjore submits the Municipal Budgets for 1870-71 for the five towns situated in that district, viz., Tanjore, Negapatam, Combaconum, Mayaveram, and Mannargudi.

2. The Commissioners of Tanjore propose to raise by taxation under the Towns' Improvement Act, Rupees 43,500, and

expect to have a balance on the 1st May 1870 amounting to Rupees 19,500. The Government remark that the estimated receipts from the several taxes are entered at exactly the same amounts as in the budget of 1869-70. The rejection of registration of carts as a source of revenue ought to operate in 1870-71, as it did in

1868-69 largely to increase the tolls. In the latter year, when carts were registered during one half-year only, the tolls yielded 3900 rupees more than they are now estimated to produce. The Government also note with surprise the omission of "Miscellaneous" as a head of receipt; seeing that, in 1868-69, Rupees 7425 were received under that head from sources, *e.g.*, cattle pound surplus, pandal fees, &c., which it is apprehended cannot cease to exist in 1870-71. The Government are thus led to remark that the present estimate of receipts does not appear to have been framed with sufficient reference to the actuals of the current year and 1868-69.

3. The Commissioners have over-estimated the Government contribution, which they have entered at Rupees 17,705. They have calculated it on the

expenditure only without any reference to the amount of the current receipts, which is opposed to the Act. The correct amount of the contribution accepting the Commissioners' estimate of receipts is Rupees 14,500; and the income of the Commissioners will be Rupees 77,500.

4. The estimated expenditure has been shown with a most commendable amount of detail which much facilitates the review of this portion of the budget. The following items, viz., Rupees 6512 entered under "New Works" for the construction of a market and three slaughter-houses, Rupees 2178 for road avenues, and Rupees 25 for subscription to the *Fort Saint George Gazette*, must be transferred to the head "Purposes other than those specified in Section 25." The charge for "Public Works Establishment," amount-

ing to Rupees 1248, must be debited rateably to new works and repairs; and with reference to the transfer of Rupees 6512, (construction of a market, &c.,) to purposes other than those specified in Section 25, Rupees 333-5-1 out of the charge for establishment will be debited to that work. The Government presume that the tank watchmen, on whose account Rupees 624 (against Rupees 336 in 1869-70) have been entered under conservancy, are intended to preserve sources of drinking water from contamination. On this understanding the charge is passed under "Conservancy." The Statement B. (abstract of proposed expenditure) will, with reference to the above remarks, be revised as shown in the margin of this paragraph.

5. The proposed expenditure is thus in excess of the estimated receipts by Rupees 3205, and must be reduced by the Commissioners with reference to their resources. The Government anticipate that the Commissioners will easily effect the required reduction in the expenditure under Section 29, which is not of a very urgent character. The Commissioners' estimate of the cost of lighting appears excessive. It amounts including establishment to Rupees 2-6-4 per mensem for each lamp. The rate in Madras is Rupees 1-1-0. The estimate of receipts, and the purposes to which the expenditure is to be devoted, are approved and sanctioned.

6. In Negapatam, it is proposed to raise from current sources Rupees 36,777, but the Commissioners expect to have no balance in hand at the beginning of the year. The Government contribution amounting to Rupees 10,883, or one-fourth of the expenditure under Section 25, and the grant made from District Road Fund, (G. O., 27th May 1867, No. 1190, Revenue Department,) for the maintenance of Road No. 36, Rupees 4990 being added, the total amount at the disposal of the Commissioners will be Rupees 52,650.

7. The proposed expenditure is unobjectionable. The increase in the estimate for conservancy above that for the current year is due to the addition of twenty-six scavengers, of two scavenging carts, and of eight peons. It is observed that, though the sum of Rupees 4990 for the maintenance of Road No. 36 is entered under road repairs, it has been rightly excluded in calculating the Government contribution.

8. The estimates for Negapatam are approved and sanctioned.

9. The estimated receipts in Combaconum amount to Rupees 34,260, and it is expected that the balance from the current year will be Rupees 3000. The exclusion of certain items of expenditure from the sum on which the State contribution must be struck, will reduce its amount from Rupees 12,420 as calculated to Rupees 11,180, and the gross receipts from Rupees 49,680 to Rupees 48,440.

The items of Miscellaneous receipts should have been shown as the inclusion of some of them, in the sum, Rupees 2500, entered in the estimate may have been improper, and might necessitate a further reduction of the State contribution. The cause of the large increase anticipated in the house-rate above both the actuals of 1868-69,* and the estimate of 1869-70† should have been explained. If the sum entered in the estimate includes arrears, these, it is observed, should have been separately shown.

10. The estimated expenditure amounts to Rupees 49,680, or Rupees 1205 above the revised estimate of receipts. Under new works a provision of Rupees 3700 has been made for the purchase of a site and the erection of a Municipal office, and of Rupees 1000 for improvements consisting of flight of steps, &c., to be constructed for certain tanks. The necessity of the former outlay is not explained, and the tank improvements, though possibly useful and desirable, are not within the scope of Section 25. The same remarks apply to the charge of Rupees 120 for a mid-

The Government regret to observe that the Commissioners propose to diminish their expenditure on conservancy by Rupees 3336, the estimate for 1869-70 having been Rupees 13,836. In order to bring their expenditure within their income, the Commissioners are recommended to defer the tank improvements, and to reduce the estimate for the Municipal office.

Proceedings of the Madras Government, Public Department,
12th April 1870.

11. The Government wish to be informed what are the arrangements in force at Combaconum involving a charge of Rupees 240 for medical attendance on the Town Police Force.

12. The estimate of receipts as above modified, and the proposed expenditure as far as covered by it, are approved and sanctioned.

13. The Government notice with satisfaction that the Municipal Commissioners of Mannargudi propose to introduce in 1870-71 both the house-rate and the tax on carriages and animals, which they have hitherto refrained from levying. The former is expected to yield 2000 rupees, and the latter 250. The Government believe that both these estimates will be found within the mark. They also note the decrease in the estimate of the receipts from trades-tax below that for 1869-70,* and the actuals for 1868-69†. The Commissioners have over-estimated the Government contribution at Rupees 5285, the correct amount as explained below is Rupees 3422-12-0.

14. The following items of expenditure entered under New Works and Conservancy, viz.—

	RS.	A.	P.

must be transferred to the head "Purposes other than those specified in Section 25;" as the first, third, and fourth do not fall within the scope of that Section, and the object of the second is unexplained. These transfers reduce the expenditure under Section 25 to Rupees 13,691, and consequently the State contribution to Rupees 3422-12-0. The Government observe that the expenditure of 8000 rupees on the river channels was sanctioned in the last budget. Full particulars of the character of the project, and the amount of work done, should be given in the next annual report. The Range Officer will be instructed through the Public Works Department to give the Commissioners every assistance in his power in the prosecution of those works, which are of a kind specially requiring professional knowledge for their

execution. From the inclusion of a sum of Rupees 2336 in the Police Budget to meet the cost of Police huts, the Government presume that the Commissioners have not availed themselves of the sanction granted in the last estimates for Rupees 2204 for the same purpose. The Government contribution being reduced as above shown the Commissioners must restrict their expenditure on the items entered under "New Works" and referred to in the beginning of this paragraph to Rupees 5491-12-0.

15. The estimates as above modified are approved and sanctioned.

16. The Mayavaram Commissioners propose to raise Rupees 16,102, which with the anticipated balance, and the Government contribution amounting to Rupees 4054-11-4 (not Rupees 4434) will place at their disposal a sum of Rupees 20,356-11-4. The anticipated receipts from the principal items of revenue (except house-tax) are, the Government observe, below both the actuals of 1868-69 and the estimates for 1869-70.

17. The following items must be transferred from the heads under which they appear in the Commissioners' estimate, to "Purposes other than those specified in Section 25":—

The proposed expenditure under Section 25 is thus reduced to Rupees 16,218-12-5, and the State contribution to the sum entered above, viz., Rupees 4054-11-4.

18. The expenditure thus revised will be as shown in the margin. The total, Rupees 20,736, is in excess of the estimated receipts by Rupees 379-4-8, and if the Commissioners cannot provide for this excess by unanticipated receipts or by savings, some of the works named above must be deferred till next year.

19. The estimates as modified are approved.

PROCEEDINGS of the MADRAS GOVERNMENT.

Read the following letter from the

President Municipal Comm.
mission Tanjore dated
3rd March 1870 No. 30.

Order thereon no 429. 12 April 1870.

With the foregoing
letter the A. President of
the Municipal Commission
in Tanjore submits the
Municipal budgets for
1870-71 for the five towns
situated in that District
viz. Tanjore, Nagapattinam,
Combaconum, Nagarcot
and Mannargudi.

2. The Commission
of Tanjore propose to raise
by taxation under the
Towns Improvement Act
Rs 43,500 and expect to
have

Received
20 April 1870

have a balance on the 1st May 1870 amounting to Rs. 19,500. The Govt. remark that the estimated receipts from several taxes are entered at exactly the same amounts as in the budget of 1869-70. The rejection of registration of carts as a source of revenue ought to operate in 1870-71, as it did in 1868-69 largely to increase the tolls. In the latter year, when carts were registered during one half year only, the tolls yielded 3900 Rs. more than they are now estimated to produce. The Govt. also note with surprise the omission of miscellaneous as a head of receipts being that in 1868-9 Rs. 7,425 were received under that

Rates on houses & built	10,000
Rates on lands	1,500
Tax on carts, trade &c.	15,000

that head from sources e.g. cattle pound surplus, pandal fees, &c., which it is pretended cannot cease to exist in 1870-71. The Govt. are thus led to remark that the ^{present} estimate of receipts does not appear to have been framed with sufficient reference to the actuals of the current year and 1868-69.

3. The Commissioners have over estimated Govt. contribution which they have entered at Rs. 17,700. They have calculated it on the expenditure out without any reference to the amount of the current receipts, which is opposed to the Act. The correct amount of the contribution accepting the Commissioners estimate of receipts is Rs. 14,500, and the

income of the Commissioners will be Rs 77,500.

The estimated expenditure has been shown with a most commendable amount of detail which much facilitates the review of this portion of the budget. The following items viz. Rs 6512 entered under New Works for the construction of a market and three slaughter houses, Rs 2178 for road mencies and Rs 25 for subscription to the Fort, Saint George Gazette, must be transferred to the head purposes other than those specified in Sect. 25. The charge for "Public Works establishment" amounting to Rs 1248, must be

New Works and repairs; and with reference to the transfer of Rs 6512 (construction of a market etc.) to purposes other than those specified in Sect. 25, Rs 335.5.1 out of the charge for establishment will be debited to that head. The Govt. presume that the tank watchmen on whose account Rs 624 79 (against Rs 336 in 1869-70) have been entered under Conservancy are intended to preserve sources of drinking water from contamination. In this understanding the charge is passed under Conservancy. The statement B (Abstract of proposed expenditure) will with reference to the above remarks be revised as shown

shown in the margin of this paragraph

5 The proposed expenditure is thus in excess of the estimated receipts by 3205, and must be reduced by the Commissioners with reference to their resources. The Govt anticipate that the Commissioners will easily effect the required reduction in the expenditure under Sect. 27, which is not of a very urgent character. The estimate of receipts and the purposes to which the expenditure is to be devoted are approved and sanctioned. The Commissioners estimate of the cost of

The Govt contribution amounting to 10,883 or one fourth of the expenditure under Sect. 25 and the grant made from District Road Fund (Ch. O 24th Aug 1864 Rs 1190 (Rev. Dept^t) for the maintenance of Road No 36, Repees 4990, being added the total amount at the disposal of the Commissioners will be Rs 52,650.

7 The proposed expenditure is unobjectionable. The increase in the estimate for conservancy above that for the current year is due to the addition of 26 scavengers, of two scavenging carts, and of eight peons. It is observed that

though

though the sum of Rs 1,990 for the maintenance of Road No 36 is entered under Road Repairs it has been rightly excluded in calculating the Govt contribution.

8 The estimates for 1968-69 are approved and sanctioned.

9 The estimated receipts in Combarakom amount to Rs 34,260, and it is expected that the balance from the current year will be Rs 3,000.

The exclusion of certain items of expenditure from the sum on which the State contribution must be struck, will reduce its amount from Rs 12,420 as calculated to Rs 11,180 and the gross receipts from 19680 to 48,440.

The items of Miscellaneous receipts should have been shown as the inclusion of some of them, in the sum Rs 2,500 entered in the estimate ~~may~~ have been improper and might necessitate a further reduction of the State contribution. The cause of the large increase anticipated in the House rate above both the actuals of 1968-69 and the estimate of 1969-70 should have been explained. If the sum entered in the estimate includes arrears, then it is observed should have been separately shown.
