Dated	22-7-1870.	

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Department,
22nd July 1870.*

No. 101. Read the following letter from the Vice-President of the Municipal Commission, Nellore, to the Chief Secretary to Government, Fort Saint George, dated Nellore, 30th June 1870, No. 23:—

1. Statement of Receipts and Disbursements for 1869-70.
2. Audit Report.
3. Annual Report.
4. Two Plans.
5. Vaccination Statement.

I have the honour to forward Statements of Receipts and Disbursements, together with Audit and Annual Reports of the Nellore Municipality, for the official year 1869-70.

2. The report herewith submitted was approved of by the Commissioners at a special meeting held this day.

Annual Report of the Proceedings of the Municipal Commissioners of Nellore, for the year ending on the 30th April 1870.

The number of Commissioners appointed for the year were thirteen. Twenty-five meetings were held at which the average attendance was six.

2. At a meeting held on the 23rd May 1870, one Kasikala Subba Rao, Head Accountant in the Office of the Range Officer, was appointed to audit the accounts, receiving a sum of Rupees 50 as remuneration. His report, together with the certified statements of receipts and expenditure in the usual form, are enclosed.

3. The balance in hand at the close of last year amounted to Rupees 685-13-1; the receipts from all sources during the year were Rupees 17,240-11-4; and the expenditure Rupees 17,525-1-7, leaving, therefore, a balance, on the 30th April 1870, of Rupees 401-6-10. Of the receipts Rupees 921-0-4 were arrears, the rest, Rupees 16,319-11-0, collections on account of the year under review. Out of the total amount expended Rupees 16,876-5-1 were for purposes falling within the provisions of Section 25 of the Act.

4. NEW WORKS—(1) *Buildings*.—Under this head there was an expenditure of Rupees 644 odd, the greater part of which sum was spent in the construction of two latrines. These buildings are each of the dimensions noted in the margin, and are built of brick-in-chunam. A plan of one of them is enclosed.

(2) *Roads and Drains*.—Among works under this head may be noticed the new road into the town by the Survepalli gate, which was mentioned by the Commissioners in their last report as being in progress; the bastion has now been removed, and the road completed at a cost in this year of Rupees 300 and odd.

5. REPAIRS—(1) *Buildings*.—The expenditure under this head only amounted to Rupees 280, of which the greater part was spent in repairing latrines and dust-boxes. No particular remarks are called for.

(2) *Roads*.—Four roads and some streets in the town were repaired at a cost of Rupees 2200.

6. EXPENSES NOT UNDER SECTION 25.—The two chief items under this head were Rupees 137 for the Cutcherry square reservoir, and Rupees 316 for the market site. In G. O., No. 438, dated 12th April 1870, the Commissioners were directed to report fully as to the scope and present state of advancement of the former project, sending plans if possible. The following is what has taken place on this subject, in connexion with which the proposal of raising water from a channel at some little distance to fill the reservoir may be mentioned. At a meeting held on the 6th March 1867, the President laid before the meeting the plans and estimates for constructing a reservoir in the Cutcherry square; it had been already excavated, but it was estimated that a further sum of Rupees 549 was required, exclusive of the cost of a parapet wall. There had been a sum of money originally subscribed by the people for this work, and the balance of that sum,

22nd July 1870.

Rupees 600-12-9, was handed over to the Commissioners by the former Town Improvement Committee. It was accordingly resolved at the meeting that this sum should be expended in completing the reservoir. It had been proposed to fill the reservoir by a direct channel from the tank, distant about a mile, but the consideration of this was postponed until funds should be available. From that time the work on the reservoir has been progressing and is now completed, with the exception of the parapet wall, at a total cost to the Municipality (inclusive of the

	RS.	A.	P.	
For the year ending 30th				
April 1868,.....	469	9	0	Rupees 600 handed over by the former Committee) of
„ „ „ 1869...	823	4	0	Rupees 1429-14-0. At a meeting of the 1st February 1869
„ „ „ 1870...	137	1	0	the President proposed that the Commissioners should take into
				consideration the question of erecting a bucket pump at the two-
Total...	1,429	14	0	arch skew-bridge ; the object was to supply the town with water
				from the irrigation channel at that place, by a channel along the
				ramparts to the west part of the town, by a second channel from

the pump to the Cutcherry square reservoir, and thence, after filtration, by conduits to the east part of the town. Supposing the cost of the pump to be Rupees 500, the cost of working it Rupees 15 a-month, and the interest on the money laid out Rupees 5, Mr. Dykes calculated, from information received from the Honorary Secretary of the Government farm, that, for Rupees 20 a month, the town would be supplied with 61,440 gallons of water a day. The meeting on that occasion approved of the proposal, and Mr. Blair was further addressed on the subject; it then appeared that the cost of the pump would not be more than Rupees 300 or 350. Ultimately the pump was ordered and has recently (15th June 1870) been received from Madras. An estimate for Rupees 486-7-0 has been sanctioned for putting up the pump, and it is proposed to begin the work at once. To complete the project, channels from the pump to the reservoir and other parts of the town have to be made, estimates have also yet to be passed for building a parapet wall to the reservoir, and for preparing it for filtration. A plan of the reservoir has been already forwarded to Government with the last year's report; the Commissioners now enclose a plan showing the site where it is proposed to erect the bucket pump. As regards the market project, the Commissioners observe that as yet funds have not been available for establishing a market: the sum of Rupees 316 mentioned above was spent in levelling the site, which work has now been completed.

7. **POLICE.**—The usual yearly statement of receipts and expenditure, furnished by the Police Superintendent under Section 30 of the Act, is submitted with this report. The amount under each head of the account is Rupees 5073-15-11.

8. HEALTH.—The health of the town has been good, during the last year the total number of deaths has been only 287 out of a population of nearly 23,000. Of the total number of deaths thirty were from fever, eight from small-pox, and 128 from cholera, which latter was rather more prevalent than usual. Two large festivals occurred in February last, and on that occasion certain sanitary arrangements were made, six temporary latrines built, an increased conservancy establishment employed, and medicines distributed, the cost of which arrangements was Rupees 44-1-6. There was no outbreak of disease on that occasion. A statement of vaccination is enclosed, from which it will be seen that out of 971 cases 947 were successful.

NEELORE,
28th June 1870.

(Signed) C. J. KNOX,
Vice-President.

22nd July 1870.

No. 102. ORDER THEREON, 22nd July 1870, No. 911.

	64	0	4
	16,319	11	0

2. The actuals, with the exception of the receipts from tolls, accord closely with the estimates. In the resolution of the Municipal Commissioners, recorded in the Proceedings of Government, 18th May 1869, No. 116, it is stated that the

tolls were sold on the 8th April 1869 for Rupees 5010. The cause of the large deficiency in collection should have been noticed in the report. The actual miscellaneous receipts were much below the estimate, but the Government surmise that in the latter were included the miscellaneous items, which in these statements appear under the head of arrears.

3. The only correction which it appears necessary to make in the classification of expenditure is the transfer of the outlay on new works and repairs in connexion with the Town Police station to the head "Police." The Police expenditure appears to have been adjusted under the instructions of the Accountant-General. The estimated cost of the Police was Rupees 6765-5-7. Three-fourths of this are Rupees 5074-0-2, and the Commissioners appear to have paid Rupees 5073-15-11, the sum entered in the statement furnished by the Superintendent of Police! That statement should

have been prepared in detail, and should have shown the entire cost of the Town Police, and all sums received by him on account of it. He must have received the full cost, though, under the arrangements prescribed by the Accountant-General, only three-fourths of this come directly from the Municipality. The Government observe, from these and former statements, that the actual expenditure on police in Nellore corresponds to a pie with the estimates. This is rarely the case in other towns, and suggests the question whether the accounts of the town force are in Nellore kept separately by the Superintendent, so that the Municipality shall be charged only what it is strictly liable for. The whole cost appears to have been Rupees 6765-5-3, which the Commissioners have paid, by actual disbursement Rupees 5073-15-11, and by set-off Rupees 1691-5-4.

*Proceedings of the Madras Government, Public Department,
22nd July 1870.*

4. Assuming the Commissioners to have paid the full cost of the police, their expenditure under Section 25 is Rupees 18,568-11-5, and their current receipts accruing under the Act independent of the State contribution, Rupees 13,476-4-8, and adding the correct State contribution, Rupees 4625-3-6, the gross current receipts are Rupees 18,501-10-2. The latter sum and not the expenditure must, therefore, be taken as the limit. Including the sum set-off, the Commissioners have received State aid to the extent of Rupees 4070-11-4, and, therefore, Rupees 554-10-2 are now due to them.

5. The expenditure under every head has been within the allotments.

6. The information now supplied as regards the reservoir project is incomplete, as it is not stated what the cost will be of preparing the reservoir for filtration, or of making the distribution channels referred to. The provision of 800 rupees for the current year was intended to meet the cost of the "connecting channel," (apparently that from the pump to the reservoir,) but it now appears that the sum will only suffice to pay for the pump, and the cost of erecting it. Including this sum the project will have cost Rupees 2229-14-0. The Commissioners appear to have undertaken the work without any matured plans, or estimates of the ultimate cost.

7. Cholera appears to have been prevalent during the year, having caused 128 deaths. The report does not contain any information as to the working of the ordinary conservancy establishment. The outlay was about the same as in the previous year, and was within the allotment.

8. The working of the Act during the year appears to have been satisfactory.

receipts from tolls, accord closely with the estimates. In the resolution of the Municipal Commissioners recorded in the proceedings of Government 18th May 1869 N. 116 it is stated that the tolls were ~~old~~ on the 8th April 1869 for Rs. 5010. The cause of the large deficiency in collection should have been noticed in the report. The actual miscellaneous receipts were much below the estimate but the Government surmise that in the latter were included the miscellaneous items, which in their statements appear under the head of arrears.

3. The only correction which it appears necessary to ~~make~~ in the classification of expenditure the transfer of the outlay on new works & repairs in connection

New works -	1972 - 15 - 5.
Repairs -	2580 - 8 - 9.
Contingency -	4585 - 4 - 7.
Police including expenditure on stations & establishment -	5103 - 3 - 9.
	<u>2634 - 4 - 7.</u>

Purposes other than their special fund in Rs. 25 -	
Slaughter house -	110 - 2 - 0.

Kachari square reservoir -	137 - 1 - 0.
Advances recoverable -	85 - 0 - 0.

Balance	648 - 12 - 6.
	<u>401 - 6 - 10.</u>
	<u>17926 - 8 - 5.</u>

with the Town Police Station to the head Police. The Police expenditure appears to have been adjusted under the instructions of the Accountant General. The estimated cost of the Police was Rs. 6765 - 5 - 7. Three fourths of this are Rs. 5074 - 0 - 2, and the Commissioners appear to have paid Rs. 5073 - 15 - 11. The sum entered in the statement furnished by the Superintendent of Police. That statement should have been prepared in detail & should have shown the entire cost of the town police, and all moneys received by him on account of it. He must have received the full cost, though, under the arrangements prescribed by the Accountant General, only three fourths of this come directly from the Municipality.

Municipality. The Government must observe from these & former statements that the actual expenditure on police in Bellare corresponds to a fair with estimates. This is rarely the case in other towns, & suggests the question whether the accounts of the town force are in Bellare kept separately by the Superintendent, so that the Municipality shall be charged only what it truly liable for. The whole cost appears to have been Rs. 6765-5-3, which the Commissioners have paid, by actual disbursement Rs. 5073-15-11 & by set off Rs. 1691-15-4.

4. Examining the Commissioners have paid the full cost of the Police their expenditure under section 25 is Rs. 568-11-5 and their current

current receipts accruing under the Act independent of the State contribution, Rs. 13,476-4-8. & adding the correct State contribution Rs. 4625-5-8 the gross current receipts are 18,501-10-2. The latter sum & not the expenditure must therefore be taken as the limit. Including the sum set off, the Commissioners have received state aid to the extent of Rs. 4070-11-4 & therefore Rs. 554-10-2 are now due to them.

5. The expenditure under every head has been within the allotments.

6. The information now supplied as regards the reservoir project is incomplete, as it is not stated what the cost will be of preparing the reservoir for filtration or of making

making the distribution channels referred to.

The provision of 800 Rs. for the current year was intended to meet the cost of ^{the} connecting channel (apparently that from the pump to the reservoir) but it now appears that ~~the sum~~ it will only suffice to pay for the pump and the cost of erecting it. Including this sum the project will have cost Rs. 2229 14 0. The ^{missioners} appear to have undertaken the work without any matured plans, or estimates of the ultimate cost.

7. Cholera appears to have been prevalent during the year having caused 128 deaths. The report does not contain any information as to the working of the ordinary conservancy establishment

254
establishment. The outlay was about the same as in the previous year, and was within the allotment.

8. The working of the act during the year appears to have been satisfactory.
