E

Proceedings of the Madras Government, Public Department,

27th July 1870.

No. 122. Read the following letter from the Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, Fort Saint George, dated Madras, 1st July 1870, No. 1443 :—

I have the honour to submit, for the sanction of Government, an estimate, amounting to Rupees 43,060, for the alterations, additions, and improvements proposed to be carried out at the Lying-in Hospital, Madras, and called for in G. O.,

Eight Plans.
One Abstract Estimate.
One Specification Report.

No. 409, dated 9th February 1869. The outlay incurred last year on these works amounted to Rupees 3520, so that the net sum required to complete is Rupees 39,540. An estimate was included in the general one, amounting to Rupees 16,840, by the Range Officer for constructing a breast wall and railing round the compound. This was asked for by the Medical authorities, but as the cost amounts to a large sum, and the work is not specially referred to by Government in the above order, I have struck the item out of the general estimate. I also forward eight plans of the buildings which have been approved by the Inspector-General of the Indian Medical Department, the Sanitary Commissioner, and Superintendent of the Hospital.

2. The estimate of Rupees 5250, referred to in G. O., No. 2864, dated 2nd September 1869, is included in the above, and was kept back by me until one for the whole of the additions and alterations proposed could be submitted. Out of this estimate, however, certain works were carried out, owing to their importance, on emergency last year. They consisted of an earth-store, sweepers-passage, Native and European latrine, ablution yard for natives and bath-room cistern, additional piping for laying on water, bow window in the examination room and night closets, the cost of the whole amounting to Rupees 3520, which is the sum deducted at the foot of the estimate. These works were also approved in paragraph 4 of the order in the Public Department received with the above order under reply.

No. 103, 25th January 1869.

3. A sum of Rupees 1440 was sanctioned in a separate allotment in G. O., No. 4010, dated 27th December 1869, for a temporary contagious ward and removing the floors and cleaning the walls of this Hospital, and the work was carried out at a cost of Rupees 1439, but is not included in the estimate now submitted.

4. The walls of the building have been examined, and the Executive Engineer reported that they were sufficiently strong to allow of their being raised for an upper story. The estimate, therefore, allows for this upper story on both wings, as well as for alterations to the ground-floor, raising the walls on the north side for the roof of the night privies, additions to matrons' quarters, night closets on upper story, alterations to cook-room, store-room, and masalchis' godown, dead-house, disinfecting-room and native latrine, contagious disease ward, and waiting shed for patients, all which works have still to be carried out.

Transferred to the Public Department, with reference to the orders in that Department, No. 103, dated 25th January 1869, and with an intimation that no funds are likely to be available for the work in the current official year.

FORT SAINT GEORGE,
5th July 1870.
