No. 127. Read the following letter from the Inspector-General of Ordnance and Magazines, to the Secretary to Government, Military Department, Fort St. George, dated Fort St. George, 5th August 1871, No. 123-G :—

Ordnance Department.

I have the honour to report, for the information of Government, that the Superintendent of Stationery has brought to my notice that, on opening Case No. 1024, received from England ex *Medusa*, said to contain (60) sixty dozen ink-wells for schools according to a pattern (A.) furnished, it was found to contain delf-wells for pewter round inkstands, which was not included in Indent No. 65 on the Home Government; these delf-wells (pattern C.) are unsuited for Army and Regimental Schools, and were incorrectly described in the packing account received from England under the heading "For Army Schools" ink-wells (to pattern).

2. Twelve dozens ink-bottles of the pattern A. required for Army Schools have been received on the same indent in Case No. 1008, instead of that number of delf ink-bottles of the pattern B., included in the annual indent for general requirements.

3. I have, therefore, the honour to request that the Home Authorities be written to on the subject, with request that the short supplies above noticed may be now furnished, and that authority be granted to sell by auction the article (pattern C.) which is not required by the Stationery Office, sixty dozens of which have been received at a cost of 10 Annas per dozen.

Transferred to the Public Department.
