If there are any other printed meteorological reports from other parts of India, I have to request that two copies of them may be forwarded to this Office; and at the same time I shall be glad to be furnished with a general account of any steps that have been taken of late years by your Government to promote a systematic registration of meteorological observations in various parts of India, and to summarize and discuss the results.

3. I request also that you will inform me how many copies of the works published by the Meteorological Committee in England will be required for the supply of observers on establishments in India.

Astronomer at Madras
for reduction. It is desirable
that these observations, as
well as those taken at
the Observatory, should be
made available for

3. I have to request that
ten copies of the results
of the observations made
both at Madras and at
the district stations, as
prepared by Mr. Rogers,
may in future be regularly

The important series of
observations made at
Dodabetta only appear
to have been published for

1847-48

1847-48, but the observations
were continued for some
years afterwards. I shall
be glad to be informed
at what date the Dodabetta
establishment was abolished
and whether the observations
subsequent to 1847-48 are
available, or were ever
printed.
