Proceedings of the Madras Government, Public Department,
29th March 1871.

No. 137. Read the following letter from the Collector of Kurnool, to the Chief Secretary to Government, Fort Saint George, dated Kurnool, 15th March 1871, No. 71:—

I have the honour to forward the accompanying report regarding the Civil Dispensary at Cumbum for the year 1870.

2. A new building will be undertaken shortly out of the sum of Rupees 500 paid from the surplus of the Famine Relief Fund.

ANNUAL Medical Report of the Civil Dispensary, Cumbum, for the year 1870.

	In-patients.	Out-patients.
Remained on the 31st December 1869	2	33
Admitted in the year from 1st January to 31st December 1870 ...	13	2,501
Total	15	2,534

Remaining on the 31st December 1870	2	41
Average daily sick for the year	1½	32½

I.—General observations bearing upon the climate, season, atmospheric phenomena, their influence upon the public health of the district, presence or otherwise of epidemic diseases.

The chief prevailing diseases are Fevers, Rheumatism, General Dropsy, Bronchitis, Dysentery, Diarrhoea, and Ulcers among the people, which are injurious to the public health.

The prevailing season is not as favourable as last year.

II.—A detailed narrative of any epidemic diseases which may have existed during the year from its first appearance until its subsidence, and whether its origin or progress has been influenced by atmospheric changes, &c.

There is no appearance of epidemic Cholera in the district, but the Small-pox made its appearance during the month of May and continued till the end of July. It was not of a very malignant character, and its attacks were only restricted to the younger members of the community, very few of whom fell victims.

III.—Remarks on the principal diseases and classes of diseases, medical and surgical, which have been most prevalent.

Two Secondary Syphilis, two General Dropsy, one Diabetes, one Ulcer, four General Debility, one Contusion, one Wound, and one Fracture of in-patients admitted during the year.

The out-patients were 2,501; viz., Fevers, 1,161; Rheumatism, 60; Syphilis, 8; General Dropsy, 32; Nervous system 7; Eye, 82; Ear, 84; Absorbent, 4; Respiratory system, 72; Digestive, 668; Urinary, 31; Generative, 2; Locomotive, 8; Cellular, 4; Cutaneous, 28; Contusion, 33, and 27. Of these deaths have occurred among the in-patients, 10. Of these, 10 were Rheumatism, two General Dropsy, and one General Debility. There were five deaths among the out-patients, viz., two Dysentery, one Diarrhoea, one Abscess of Cellular

*Proceedings of the Madras Government, Public Department,
29th March 1871.*

Tissue, and one General Debility, which is not worthy of remark.

There were 27 admissions of European out-patients in this year, viz., seventeen Fevers, three Rheumatism, one Dysentery, one Hepatitis, four General Debility, and one Contusion. All these cases met with success with the exception of one which was a child of about six months old suffering with Centual Fever.

There are no special cases worthy of notice.

IV.—Special cases which have been particularly worthy of notice.

1st.—Remarks on the success which has attended the efforts to make the Dispensary self-supporting; if any obstacle exists point out what appears the best mode of removing them.

The contributions are pretty well raised since the last report towards the erection of a substantial building for Civil Dispensary. The thatched hut used as Civil Dispensary has tumbled down, and foundations of the new building have been raised, and the construction will be commenced very shortly.

No system of this kind is introduced.

2nd.—If a Lying-in Hospital has been established give an account of it, and state what efforts have been made to introduce a more rational system of treatment of puerperal women in the town.

CUMBUM,
1st January 1871.

(Signed) TAKERAM,
Second-class Hospital Assistant,
In Medical charge, Cumbum.

No. 138. ORDER THEREON, 29th March 1871, No. 416.

From the report above recorded, it appears that the Civil Dispensary at Cumbum is much resorted to. The number of out-patients has considerably increased during 1870.

2. A suitable building which was much required is under construction.

(True Extract.)

Chief Secretary.

To the Collector of Kurnool.

29 March 1871 No 416

From the report above sent it appears
that the Civil Dispensary at Worcester is
wanted to be the number of patients
considerably increased during 1870.
The question of building a new
building which was much required
under consideration.
