**Proceedings of the Madras Government, Public Department,
28th April 1871.**

Read the following:—

No. 111. Office Memorandum, Military Department, Fort William, dated the 13th March 1871, No. 537.

The undersigned has the honour to forward, for consideration in the Home Department, the accompanying copy of correspondence* with the Inspector-General of Hospitals, Indian Medical Service, Bengal, regarding the number of Medical Pupils likely to be required for admission into the Medical College, Calcutta, and the several Medical Schools, during 1872-73, for Civil and Military duty, respectively, and to intimate that sanction has been given, in the Military Department, for the entertainment of the number of pupils (42) required for this department.

2. The undersigned has also the honour to intimate that sanction has been given for the withdrawal of the fifty-seven Medical Pupils now employed in Regimental Hospitals in view to their entrance during the current year on their College or School course.

3. It is understood that the corresponding orders for the entertainment and distribution of pupils required for Civil duties will be issued in the Home Department.

(Signed) H. K. BURNE, Colonel,
Secy. to the Govt. of India.

MEMORANDUM from the Inspector-General of Hospitals, Indian Medical Department, to the Secretary to the Government of India, Military Department, dated Fort William, 17th June 1870, No. 289-A.

Forwarded to the Secretary to the Government of India, in the Military Department, with Statement showing the number of Native Medical Pupils likely to be required for admission into the Calcutta Medical College and the several Medical Schools during the year 1872-73. reference to paragraph 5 of this office letter, No. 285, of the 20th ultimo.

The undersigned begs to state that, at present, there are about 157 Medical Pupils doing duty in Native Regimental Hospitals and Civil Dispensaries in this Presidency. Of these fifty were admitted into the service in 1869, and the remainder this year, the balance to complete the number required in 1870-71 will be entertained as soon as the sanction of Government is received.

STATEMENT showing the number of Native Medical Pupils likely to be required for admission into the Medical College and several Schools during the year 1872-73.

FORT WILLIAM,
11th June 1870.

2 *Proceedings of the Madras Government, Public Department,*
28th April 1871.

From the Assistant Secretary to the Government of India, Military Department, to the Inspector-General of Hospitals, Indian Medical Service, dated Fort William, 23rd January 1871, No. 943.

With reference to your predecessor's Memorandum, No. 289-A, dated 17th June 1870, forwarding a Statement showing the number of Native Medical Pupils likely to be required for admission into the Calcutta Medical College and the several Medical Schools during the year 1872-73, I am directed to observe that the inclusion of the students required for admission into the Vernacular Licentiate Class in 1872-73 does not seem necessary, as it is understood this class mainly furnishes the private practitioners of the country.

2. I am to request, therefore, to be favoured at your early convenience with a return revised up to this date, giving a specific statement of Native Medical Pupils to be retained for Military and for Civil duty, each being shown separately; the numbers now employed; and the detailed reasons for the estimate you may frame of the numbers required.

From the Deputy Inspector-General of Hospitals for Inspector-General of Hospitals, Indian Medical Department, to the Secretary to the Government of India, Military Department, dated Fort William, 23rd February 1871, No. 1307.

With reference to your office letter, No. 243, of the 23rd ultimo, I have the honour to forward a Statement showing the number of Native Medical Pupils likely to be required for admission into the Calcutta Medical College and the several Medical Schools during the year 1872-73, exclusive of the students required for admission into the Apothecary and Vernacular Licentiate Classes. The numbers required for the Military and Civil Departments have been noted separately.

2. I also beg to forward a Memorandum showing the number of Native Medical Pupils now attached to Regimental Hospitals and Civil Dispensaries likely to join the Calcutta Medical College and the several Medical Schools in the months of May, June, and November next.

3. The number of Native Medical Pupils required for admission into the Medical Schools for the year 1872-73 is based upon a statement prepared in this Office, showing the average number of gain and loss among Native Doctors from 1865 to 1869. The average number of admissions per annum is 98.4, exclusive of Apothecary and Vernacular Licentiate Class of Native Doctors. I have left a margin of 27, with a view to meet the loss which may take place among the pupils during the period of their training. There is a difference of only one between the numbers which were included in the statement submitted with this Office Memorandum, No. 289-A, dated the 17th June 1870, and that given in the present return. The former was based upon statements received from the Principals of the several Schools, and the latter upon the statement of gain and loss lately prepared in this Office, which I consider the more reliable of the two.

4. With advertence to the concluding portion of paragraph 1 of the letter under acknowledgment, I would state that nearly all the students of the Apothecary and Vernacular Licentiate Class are employed in the public service, being admitted after passing their final examination, under the orders of the Government of Bengal. At the present moment there are ninety-four Bengalee or Apothecary Class and fifty-six Vernacular Licentiate Class Native Doctors serving in the different Sub-Divisions, Dispensaries, Jail and Police Hospitals, &c., of Bengal.

Proceedings of the Madras Government, Public Department, 3

Extract from the Proceedings of the Government of India in the Financial Department, dated 27th April 1870, No. 2519.

Read again the following correspondence, which issued in an Order, dated 19th February 1870, to the effect that passed Medical Pupils shall not be posted to any Civil Dispensary until it has been ascertained from the Civil Department that their services are required, and that there is Budget provision for their pay and allowance, viz.—

Letter from Government, North-Western Provinces, No. 1014, dated 30th December 1869.

Letter from Accountant-General, Punjab, No. 182, dated 22nd December 1869.

Office Memorandum from Home Department, No. 598, dated 29th January 1870.

Also keep-withs, viz.—

From Military Department, No. 1053, dated 28th February 1870.

To do, „ 1968, „ 29th March 1870.

Read for the first time—

Military Department, No. 665, dated 18th February 1870.

„ „ „ 307, „ 5th March 1870.

Home Department's „ 1234, dated 7th „ „

RESOLUTION.—On reconsideration, the Governor-General in Council is pleased to rule that, until further orders, the pay of Native Medical Pupils who may be attached to Civil Dispensaries, under orders from the Deputy Inspector-General of Hospitals of the Division or Circle, shall be passed in the Civil Department of the Presidency or Province concerned against the total grant for Medical Services.

By this order the Civil Department will be burdened for a time with an undue charge for the Native Medical Pupils, it appearing from the correspondence now read for the first time that, in posting Native Medical Pupils to Regimental Hospitals or Civil Dispensaries, Deputy Inspectors-General of Hospitals give the preference to the latter on account of the educational advantages which they possess, though all the Native Medical Pupils enrolled under the Order of 5th June 1868 will be engaged for Military service, and will, for the most part, serve as Hospital Assistants in the Military Department, in the event of adoption of the scheme for a cheaper class of Hospital Assistants for the service of the Civil Department, which is sketched in the Home Department's communication, No. 1234, dated 7th March 1870.

The Military Department should accordingly be requested to instruct Deputy Inspectors-General of Hospitals to use a proper discretion in apportioning the charge for the Native Medical Pupils to the Civil and Military Departments, when posting the pupils to Civil Dispensaries or Regimental Hospitals.

It should also be considered in that Department whether, in process of time, the posting of the pupils may not be so regulated as to attach at least two pupils, one of the first year, another of the second year, to each Hospital or Dispensary which is selected for the training of pupils, and which thus would always have one Medical Pupil of one year's training and experience who might displace (and save the charge for) a Compounder.

The Governor-General in Council, in this Department, would also request the Home and Military Departments to fix, on an early date, the maximum number of Medical Pupils, both those who are to engage for Military service generally, and those to be trained for the Civil Department exclusively, who are to be appointed in 1870-71 in the several provinces of the Bengal Presidency. The number for the two classes together need not exceed the probable number of admissions into the Medical Colleges and Schools at Calcutta, Agra, Lahore, and Nagpore, which will be required two years hence. The maximum thus ascertained might be distributed among the several provinces of the Bengal Presidency.

A similar reckoning will be necessary for the Madras and Bombay Presidencies.

The pay, allowances, and other sanctioned expenses of students in training in the Medical Colleges should be debited as follows:—

1.—Of Hospital Apprentices—to the Military Department.

2.—Of a Native Medical Pupil—to the Civil or Military Department, according as the pupil may have served his first two years of probation in a Civil Dispensary or a Military Hospital.

3.—Of Assistant Apothecaries in training for Sub-Assistant Surgeons under paragraph 46 of G. G. O., Military Department, dated 5th June 1868—to the Military Department, on the ground that Sub-Assistant Surgeons are recruited from a cheaper class, and that the indulgence of a training in the Medical College for the grade of Sub-Assistant Surgeon is conceded to Assistant Apothecaries solely to better their condition, and attract better men to the Military Department as Hospital Apprentices and Assistant Apothecaries.

Ordered that copy of this Resolution be sent to the Home and Military Departments, to the Comptroller-General of Accounts, and to the several Accountants-General and Deputy Accountants General in independent charge.

(True Extract.)

(Signed) R. H. HOLLINGBERY,
Asst. Secy. to the Govt. of India, Finl. Dept.

Endorsement by the Home Department, dated Simla, 18th May 1870, No. 2386.

Copy forwarded to the Inspector-General of Hospitals, Indian Medical Department, for information and guidance, and with a request for an early report on paragraph 5.

From the Inspector-General of Hospitals, Indian Medical Department, to the Secretary to the Government of India, dated 15th June 1870, No. 282.

With reference to your Office Memorandum, No. 2386, of the 18th ultimo, I have the honour to forward a Statement showing the probable number of Native Medical Pupils that will have to be entertained in 1870-71, with a view to their admission into the Calcutta Medical College, and several Medical Schools, during the year 1872-73; also copy of my letter, No. 205, of the 20th idem, to the address of the Officiating Secretary to the Government of India, in the Military Department.

2. I beg to state that, at present, there are about 157 Native Medical Pupils doing duty in Native Regimental Hospitals and Civil Dispensaries in this Presidency. Of these fifty were entertained in 1869 and the remainder this year, the balance to complete the number required in 1870-71 will be entertained as soon as the sanction of Government is received.

(Signed) J. T. C. ROSS, F.R.C.S.,
Secy., Insp.-Genl. of Hospitals,
Indian Medical Department.

11th June 1870.

Proceedings of the Madras Government, Public Department,
28th April 1871.

From the Inspector-General of Hospitals, Indian Medical Department, to the Secretary to the Government of India, Military Department, dated 20th May 1870, No. 206.

With reference to your Office Memorandum, No. 247, of the 12th instant, I have the honour to state, for the information of Government, that, as pointed out in my letter, No. 43, of the 22nd April 1869, the provisions of paragraph 42 of Government General Order, No. 550, of the 5th June 1868, have not yet been extended to the Medical College noted in the margin, where the period of study, according to the old rule, is three years, whereas four years (viz., two years in a

Sgra.
Lahore.
Nagpore.

Regimental Hospital or in a Civil Dispensary, and two years in the Medical College) is laid down in the above-cited General Order. In the Calcutta Medical College there is an Apothecary or Vernacular Licentiate Class, which exacts three years as the period of study, and men of this class, after passing their final examination, are employed exclusively in the Civil Department in Bengal.

2. In the Nagpore Medical School all the passed students, after their admission into the service as Native Doctors, are to be employed in the Civil Department for the present; * but in other schools and in the Calcutta Medical College, passed students are admitted into the service as 1st Class Native Doctors in the Military Department, but are employed without restriction in the Civil Department to fill vacancies as they occur.

3. With reference to paragraph 5 of Financial Resolution, No. 2519, of the 27th April last, I have requested the Principals of the Medical College and of the several Medical Schools to furnish this office with a statement showing the probable number of Native Medical Pupils or other classes of students likely to be required for admission into the Schools during the year 1872-73. On receipt of this information a general statement will be prepared and submitted to your office.

4. As regards the 2nd and 3rd paragraphs of the Financial Resolution, I would state that, as pointed out in my letters noted in the margin, Native Medical Pupils will learn much more in Dispensaries than in Regimental Hospitals, and, as the demand for Native Doctors annually is greater in the Civil than in the Military Department, I am of opinion that two-thirds of the total number of Medical Pupils admitted every year should be attached to Civil, and the remainder to Military, Hospitals.

5. When the period of education of Native Medical Pupils in all the Schools and in the Calcutta Medical College is finally decided upon, and a sufficient number of candidates obtained for preliminary training in Civil Dispensaries, the plan proposed in the 4th paragraph of the Financial Resolution, to attach at least two pupils to each Dispensary, and to dispense with the services of a Compounder, will be introduced and carried out permanently, if found to succeed after a fair trial.

6. In conclusion, I beg to request that a copy of the Financial Resolution in question may be forwarded to this office for record.

Endorsement by the Home Department, dated Simla, the 23rd July 1870, No. 3479.

Copy, with a copy of the statement mentioned, forwarded to the Financial Department for information, with reference to its Resolution, No. 2519, dated the 27th of April last.

No. 2537.

OFFICE MEMORANDUM.

Referring to the endorsement of the Home Department, No. 3479, dated 23rd July 1870, the undersigned is desired to observe that if, as it is understood, the Vernacular Licentiate Class trains students for employment as private practitioners, and is quite distinct from the class who are trained as Hospital Assistants, the General Order of 5th June 1868 does not sanction the entertainment of Medical Pupils for recruiting the Licentiate Class in the Medical College.

Proceedings of the Madras Government, Public Department,
28th April 1871.

2. An explanation on this point is requested.

SIMLA,
6th August 1870.

(Signed) R. H. HOLLINGBERY,
Asst. Secy. to the Govt. of India, Finl. Dept.

From the Under Secretary to the Government of India, to the Inspector-General of Hospitals, Indian Medical Department, dated Simla, the 22nd August 1870, No. 3889.

With reference to your letter, No. 282, dated the 15th June last, submitting a Statement of the probable number of Native Medical Pupils required for admission into the Medical College at Calcutta, and the several Medical Schools in the Presidency during the year 1872-73, I am directed to state that it is not understood why you have included the requirements of the Vernacular Licentiate Class in your calculations, and to request that an explanation may be submitted on the point. As that class trains students for employment as private practitioners, the General Order of the 5th June 1868 is not applicable to it.

From the Inspector-General of Hospitals, Indian Medical Department, to the Secretary to the Government of India, dated 1st September 1870, No. 665.

In reply to your letter, No. 3889, of the 22nd ultimo, I have the honour to state that the majority of the students of the Vernacular Licentiate Class are employed in the public service, being admitted, after passing their final examination, under the orders of the Government of Bengal. At the present moment, there are ninety-two Bengalee or Apothecary class, and forty Vernacular Licentiate Class Native Doctors serving in the different Sub-Divisions, Dispensaries, Jail and Police Hospitals, &c., of Bengal. Should the scheme proposed in your letter as per margin be eventually adopted, the services of the class of men under reference will become available under its provisions for employment as Civil Hospital Assistants.

2. Students of the Vernacular Licentiate Class are certainly not affected by the provision of G. G. O., No. 550 of 1868; but they, nevertheless, form a class of pupils in the Medical College, and as the Financial Department called for a complete statement of the probable number of pupils which will be required, two years hence, for the purpose of being trained in the several Medical Colleges and Schools of this Presidency, for employment in both the Military and Civil Departments, it was thought desirable to make it as comprehensive as possible, by exhibiting, in a separate column, the probable requirements of the Apothecary and Vernacular Licentiate classes, particularly as the students of those classes will, as already stated, constitute, in a great measure, the body of Civil Hospital Assistants contemplated.

Endorsement by the Home Department, dated Simla, 19th September 1870, No. 4232.

Copy forwarded to the Financial Department for information, with reference to Office Memorandum thence, No. 2537, dated the 6th ultimo. A copy of the orders of the 9th March referred to is enclosed.

No. 1778.

Copy, with copy of the papers noted in the margin, forwarded to the Government of Madras for information and guidance, with reference to paragraph 5 of the Financial Resolution, No. 2519, dated the 27th April 1870.

By order,
