G.O. No.	52	Press Mis.
Dated	13-1-	1937

Not to be folded or roughly handled

13th January 1871.

No. 52. Read the following letter from the Commissioner of the Neilgherries, to the Chief Secretary to Government, Fort Saint George, dated Ootacamund, 6th January 1871, No. 2 :—

Dr. Cunningham, while up here, appears to have examined the water of the Marlimund Reservoir, which is to feed the Ootacamund Northern Supply Channel, and found it to contain microscopic animals of different kinds.

In consequence of this, I learn that an opinion is gaining ground among the residents here that the water is unfit for drinking purposes.

2. Such animalcules, I apprehend, may be found in all water. However, to settle the point of impurity, I beg the Government will permit Mr. Broughton to make a careful analysis of the water at the outfall of the reservoir. Mr. Broughton has expressed himself as quite willing to undertake the trouble if the Government have no objection to his devoting two or three days to the work.

No. 53. ORDER THEREON, 13th January 1871, No. 57.
The Government approve of the Commissioner's proposal.
