*Proceedings of the Madras Government, Public Department,
6th June 1871.*

Read the following papers :—

No. 23. Petition from certain inhabitants of Triplicane, to the Chief Secretary to Government, Fort St. George, dated Madras, 19th May 1871, No. 962.

We, the undersigned inhabitants of Triplicane, beg most respectfully to intrude on your valuable time by laying these following few lines before your honour for favourable consideration :—

That, in consequence of no repairs having been effected to the wells situated in the Chepauk Palace from which the public draw water to drink, the remaining little water in them has become saltish and impure owing to the collection of a large quantity of decomposed matter especially in this season of drought, which, we think, has been the main cause of the present prevalence of cholera in the district. We beg, therefore, that your honour will be graciously pleased to move Government to pass the necessary orders for the execution of the above repairs.

For which act of kindness and charity we, as in duty bound, shall ever pray.

(Signed) S. POOROOSHOTHUM THUVARY,
and 89 others.

Referred to the Principal, Civil Engineering College, for report.

FORT ST. GEORGE,
19th May 1871.

(Signed) W. HUDLESTON,
Acting Chief Secretary.

No. 24. From the Acting Principal of the Civil Engineering College, to the Acting Chief Secretary to Government, Fort St. George, dated Chepauk, 27th May 1871, No. 137-C.

With reference to petition, No. 962, dated 19th May, from inhabitants of Triplicane, regarding the impurity of the wells in the Chepauk compound, I have the honour to forward, herewith, a plan showing their locality, with a report on the quality of the water as far as its taste, smell, and appearance is concerned.

2. No doubt, the clearing out of these wells would increase the purity of the water, especially if, as is probable, they have not undergone the process for a long time, but nothing can keep the water pure as long as the inhabitants persist in their daily practice of washing themselves so close to the well that the impurities of their bodies must more or less percolate through the soil and mix with the well water.

3. This evil is, in a great measure, obviated in some wells by a platform of impervious material surrounding it, and I would strongly recommend the plan being adopted at all the more important wells.

4. The petition above alluded to is herewith returned.

No. 25. ORDER THEREON, 6th June 1871, No. 773.

Ordered that copies of the foregoing petition and letter, with the statement* and plan* received with the letter, be forwarded to the

* In original to be returned.

President of the Madras Municipal Commission, with the intimation that, as the wells numbered 7, 15, and 16 are "very much used" by the inhabitants of Triplicane, the Municipality should construct suitable

platforms around wells 7 and 15, and clean out the three wells with as little loss of time as possible.

2. The inhabitants would, no doubt, freely use the wells numbered 8 and 14 also if they were cleaned out and platforms constructed around them. These wells are conveniently situated, and, in this season of drought, would be of great advantage to the inhabitants.
