I have the honor to forward an Estimate amounting to Rs 165-4-10 for the supply and fixing of a Rotatory force pump at the inception of the Southern drain of this Hospital. The pump is required for the purpose of flowing the laundry water over the grass plots in the hospital grounds, this being the most advantageous economical and practicable means of disposal of this water. As the pump is urgently required to carry on work already commenced may I ask that the sanction of Government be obtained for it at an early date.

I have the honor to be
