About 2 1/2 months ago (that is, middle of December/80) the bowels became irregular and somewhat constipated. While on the "Kudreakutt" a very high hill and the climate of which is very cold, he began to feel the cold and the bowels began to be decidedly constipated. The sudden and great change to the cold of the hill, especially when somewhat out of sorts seemed to have a bad effect and he caught "a cold and cough". Returned to Mangalore on the 14th January 1881 since which time he has been feeling unwell and weak.

Bowels have been irregular. Has had nights sweats from about the 10th of January, called in to see her on the 27th of

I, Surgeon M. L. Byrne, Acting Civil
Surgeon, Mangalore, do hereby certify
that M. P. Bouyer Esq., of the Madras
Civil Service, is in a bad state of health,
and I solemnly and sincerely declare that
according to the best of my judgment
a change of air is essentially necessary to
his recovery, and do therefore recommend
that he may be permitted to travel
on a sea voyage to the station for an
interval of six months.

Mangalore. M. L. Byrne Surgeon
12th March 1881. by Civil Surgeon.

I further certify that the state of M.
Bouyer's health is such as to render it
highly inconvenient for him to travel to
Bombay or Madras to appear before a
Medical Board; and that it is most
desirable that he should be allowed to
travel direct to sea as soon as possible.
