Office of the Surgeon General
 Of 360. with the Govt of Madras
 Ostaconnund - 17 July 1882
 From, H R Formels Esqre F.R.C.S. C. 38
 Surgeon General with the
 Govt. of Madras.
 To,
 The Chief Secretary to Govt.
 Public Dept.

Sir,
 With reference to letter no. 5/253
 from the Government of India,
 Home Department, dated 20 June 1882,
 In re: local
 referred under your Indorsement no.
 535 of the 8th instant, I have the
 honor to state for the information
 of Government, that in this Presidency
 there has been hitherto no regular
 classification of Hospitals and
 Dispensaries.

2. As a rule however, all Civil
 hospitals at head quarter stations,
 or at the Presidency under the
 immediate charge of a Commissioned

Medical Officers, are treated as "first class" Hospitals, that is, they are entitled to receive supplies of medicines ~~see~~ as included in first class indents.

3. Other dispensaries in the Presidency receiving in-patients, are considered the "second class" Hospitals, and are allowed medicines, according to the scale of a "second class" indent.

4. Dispensaries which are maintained for out-patients only, are considered the "third class," and as a rule receive only the scale of medicines of a third class indent. In a few instances however, where the daily average attendance of patients is high, a second class indent has been allowed.

5. I may state that in this Presidency for some years past, the State Contribution in the great majority of hospitals is limited to the partial provision of salary of the subordinate medical

Officers in charge, and in very many instances, even this contribution is not found. The only institutions of a medical character supported entirely by the State, are the Hospitals ^{and Dispensaries} of the Presidency town, which are connected with medical education, such as the General Hospital, Women and Children's Hospital, Lying in Hospital, ^{Eye Infirmary, Leprosy} ~~see~~ ^{Hospital}.

6. The relations of the State in regard to Local Fund and Municipal Dispensaries have been fixed, ever since the introduction of the Municipal and Local Funds Acts of 1871, and recent orders of the Government of India on the subject of local self government, do not touch the practice in force in this Presidency for the last ten years.

7. In regard to the classification I would advise, I am of opinion that the classification now in use in this Presidency is sufficient.

1st Class Hospitals should be maintained at the head quarters of

each revenue district. 2^d Class hospitals for reception of a few cases of accident or disease, in the chief towns of taluk head quarters, and 3^d Class dispensaries for out door relief only might be established in convenient centres, all over the Country. These latter need not be costly. A native house in any convenient town or village, affords sufficient accommodation for a medical subordinate and his stock of medicines.

Hospitals of the 2^d and 3^d class in this Presidency, are maintained entirely at the cost of local authorities, and this is the case also in regard to most of the dispensaries established at the head quarters of districts in the Mofussil, though some of these institutions possess endowed funds, subscribed and accumulated before the charge of such institutions was transferred to Municipal, or local

Board Control.

I have the honor to be,
Sir,
Your most Obedt Servant,

Wm Forster
Surgeon General
with the Govt of Madras

FROM

A. MACKENZIE, Esq., C.S.,
Secretary to the Government of India,

TO

The Secretary to the
Govt. of Madras.

Home Department.
Medical.

Simla, the 20 June 1882.

SIR,

In prescribing the series of standard forms to be used in shewing the annual working of dispensaries,* it was left to Local Governments and Administrations in filling up Statement No. I to divide these institutions into classes as each might think best. The principle adopted in classification has varied considerably. In several Provinces the extent of the aid which dispensaries have received from the State has been taken as the basis, while others have preferred the amount of hospital accommodation as indicated either by the number of beds available, or by the average number of patients during the year—either in-door patients taken alone, or both in-door and out-door patients taken together.

2. Under the new system of local self-government a great change will take place in the relation of the State to dispensaries. Most, if not all, of them will become local institutions, entirely supported by local funds. Under these circumstances it is desirable that the general principle of classification should be followed in all Provinces, so that the results may be easily compared. A decision on this point will be reserved for consideration when the new system of local self-government has come into operation; but meanwhile the Governor General in Council would be glad to know what principle of classification His Excellency the Governor in Council would recommend for adoption.

I have the honour to be,

SIR,

Your most obedient servant,

Secretary to the Government of India.

7000. 4. 1882. 1882.
