Ooby Municipal Council

Sir,
I am directed by the Managing Committee of St Bartholomew's Hospital to lay the following before the Municipal Council.

2. That Mr Assist. Apothecary E. J. Baptist gets his promotion and a rise of pay. This means an increase of Rs 25 a month.

3. The appointment of a man of Mr Baptist's class & education has been thoroughly appreciated in Ooby as well as at the Hospital & it would be a pity to lose him. It would also be a pity to again change the medical subordinate in charge of the Hospital.

4. I have therefore the honor to ask whether the Municipality is prepared to pay all or any of this increase of Rs 25 a month. Possibly Government may meet the Municipality half way in the matter.

THE OBSERVATORY,

N^o 42

Madras, 22nd February 1895

FROM

THE GOVERNMENT ASTRONOMER,

Madras.

TO

The Honble Mr. J. I. Prie,
Chief Secretary to Government.

SIR,

I have the honor to address you on the following matter.

2. At present the Clocks on the Madras Railway are set daily by an electric current sent from the Central Station, the time being taken from a Chronometer which is itself checked by the ^{report} of the noon gun. On the South Indian Railway there is, I believe, no satisfactory method of obtaining the correct time.

3. Both these railways are now anxious to have a time signal supplied to them daily from the Observatory and I have the honor to request permission to supply such a signal.

4. If permission is granted the simplest way of

of carrying out the project will be to have the wire which now runs from the Observatory to the Central Telegraph Office and the Post Office led through the Egmour Station of the South Indian Railway and the Central Station.

The current from the Observatory would at each station be passed through a relay which would transmit the necessary signal from a local battery along each line. The necessary arrangements for this would have to be made by the railway Companies themselves.

5. No extra expense to the Observatory is involved in carrying out this proposal and, as is usual elsewhere, I propose that no charge should be made for supplying the signal. The general rule in all such cases ought, I think, to be that the Observatory sends the signal into the lines provided for the purpose without charge but has no responsibility as to anything that may occur beyond its own lines.

6. The Agent and Manager of the Madras railway has expressed his willingness to permit towns near the railway which may desire to

receive

receive the signal to obtain it on a small annual charge sufficient to cover the necessary expense, and I believe the Agent of the South Indian Railway will also be willing to do this. I may say that I have recently had applications for time signals from Bangalore, Madras, and Negapatam and that each of these stations could easily be served by a signal if my proposals are sanctioned.

7. In conclusion I would point out that the importance of distributing accurate time as widely as possible is so great that I consider that the Observatory ought to take advantage of every opportunity of increasing its usefulness in this respect.

I have the honor to be,
Sir,
Your most Obedient Servant,
C. Muecke Smith
Govt. Astronomer.
