Read the following

From the Secretary to the Govt.
of India P.W.D. No 1110 G. 2/18 April 1889.

Order thereon No. 1362 W of 21 May 1889.

Before sanctioning the adoption of this machine in public buildings in the Madras Presidency, the Govt. would like to have it practically tested here. This may best be done at the General Hospital, Madras, where all the punkahs of one ward can be connected with the machine. The experiment will be carried out by the General Superintendent P.W. Workshops at the end of the hot season, when the punkahs are not usually worked and when they will therefore be available for the trial.

2. The result will in due course be reported only a Committee composed of the Superintending Engineer & Circle, the Resident Physician General Hospital and the General Superintendent P.W. Workshops. The points to be noticed are the efficiency of the apparatus, both for day and night work, and its cost as compared with:-
