Proceedings of the Madras Govt
Read the following:-

3RD DECEMBER 1889, No. 981, PUBLIC.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following paper:—

From A. REA, Esq., M.R.A.S., First Assistant, Archæological Survey Department, to the Chief Secretary to Government, dated Bangalore, 15th November 1889, No. 371.

In submitting my programme of tour for the ensuing field season, I have the honor to state that, by request of Dr. Burgess, I sent it to him in September last. I have just had a letter from him by this mail, in which he asks me to send it direct to the Government of Madras.

2. After consultation with Dr. Burgess, I submit the following. To allow of the previous seasons' drawings now in office being inked in and reports written on them, it seems imperative to delay my taking the field as early as hitherto. The past two seasons' drawings of remains in the Kistna district have been completed and a full report of these antiquities written out. Those now being proceeded with are, a report on Vijayanagar, and drawings from the Bellary, Anantapur, North Arcot and Chingleput districts. These drawings have accumulated from time to time, for we have always been able to produce more of them while on tour than could possibly be inked during the time spent at head-quarters. This is accounted for by its taking much more time to ink a drawing than to draw it out in pencil. It is therefore decidedly advisable to have these arrears worked up by extending the time spent at head-quarters. Another important factor which has been considered is, that, as this season is to be devoted to a tour in the Southern districts, the rains will not be completely gone from there till after the new year.

3. The season's work would be undertaken as follows:—In December I should make arrangements for having the marble sculptures now at Amarāvati and Pedda Ganjam packed and sent to Madras. For this I would request that a sum of Rs. 200 might be placed at my disposal for coolies and materials for packing and boat to Madras. I have no means of accurately estimating the expense, but I hardly think it will exceed this amount, and everything will be done as economically as possible.

4. On completion of this work, I should make arrangements for moving the camp to Madura, where I should begin work as soon as the rains had ceased, or after Christmas. In Madura, the great temple and other remains will be surveyed and full drawings made of the palace. In connection with this last, I should be greatly aided if the Consulting Architect could favor me with the loan of Mr. Chisholm's drawings of Tirumal Naik's choultry.

5. From Madura I shall proceed to Tirupparankunram, and survey the large temple and copy the inscriptions there. I shall also visit some ancient caves with inscriptions which—the Collector lately informed me—exist near Vikramangalam. I will make a tour south towards Rāmesvaram, visiting Devipattanam, where there is a very important old temple with inscriptions.

6. Unlike the past two seasons' work—devoted to investigation and excavation in the Kistna and other districts—this will be composed principally of survey. In case, however, it should be necessary to make any excavations, I would request that a small sum—say, Rs. 300—be placed at my disposal. Numerous Roman coins have been found at places in the district (Madura), and the Collector lately sent me a description of some large and ancient bricks which had been found in a mound near a village. It is thus possible that Roman or other very ancient remains may exist, and I should be sorry to leave them unexplored should I find any.
