ENCLOSURES. 2

Relative to altering the
position of the flagstaff on
the rock fort at Lucknow

FINF ARTS EXHIBITION

KENNETH HENBRI carried away the Society's 8th prize. There are charming "bits" of painting in all of them, they make good pictures, or in other words, there is an artistic purpose running through them. Yet they are disappointing, for, though the monotony of color might be overlooked when they are not all placed together, there is a more conspicuous defect in the treatment of the "background, where there are masses of it in the foreground. The painter has allowed his "touch" to run away with him, for in trying to render these characters of the heads, which of course is most distinct in the foreground, he has failed to preserve either the form of the mass of foliage or the formation of the ground beneath it. The defect was especially noticeable in Nos. 80, 81. The Principal's walk, "Avalanche," in the shrubs on the banks in the foreground, and in No. 102, is the sleeping underground, which covers the ground in front. No. 126, "Landscape, Solitude, Darguth," would have made an

15

In his letter on the subject, Mr. G. says: "I appeared in the London Times on the 15th. The *Standard* said: 'Mr. G. is a man of great ability & great energy.'"

The progress made with lava & gas and
trench operations in the Maricao
in the half-year ending 30th Sep-
shows that the area of minor re-
upon it the beginning of the half-year was
miles, of which 7,833 had been completely
These areas had been respectively advanced
of the half-year by 1,126 and 1,784 square
ing the totals up to 9,810 square miles and
which 3,017 had been completed—a larger
had been made in the whole of the year.
During the half-year estimates amounting to
were sanctioned, and the cost of the estab-
employed on investigation during
period was Rs. 64,391, or 25.4 per cent. of the
estimates. Though the figures show a great
ment in all respects on previous years,
outturn is still, it is thought, capable of great
efforts will, the chief Engineer for Irrigation
made to bring it down to a smaller proportion
with the amount of estimates. The total sum
motes sanctioned from the commencement of
up to 30th September 1888 was Rs. 12,511,
which the total expenditure incurred (excluding
ment charges and tools and plant) was Rs. 2

the records of the Civil Hospitals and Dispensaries, and the Madras Presidency for 1887, have only now come from the Government Press. However, better than ever, it may perhaps be said, even as to this statement. The figures show that in the year 1857 there were 934 dispensaries, an increase of 316 over in 1856. The increase occurs entirely under the Rural Dispensaries and mainly in the districts of Coimbatore, South Canara, Karnool and Malabar. There is a great increase in the treatment of in-patients as compared with the two preceding years. The number of in-patients in hospitals (2,994) was, however, 280 in excess in 1886. The increase is ascribed to the larger epidemic of cholera which marked the year under review. The total number of dispensaries in which provision for in-patients is ordinarily available was 3,381 beds, against 163 with 3,320 beds in 1856. The number of out-patients treated was 2,128,159 in 1886, against 14,366, against 2,127,357 in 1856. The daily attendance, however, a considerable decrease in the number of patients to the Presidency has resulted. The figures

port of the Salvation Army for the past year is to be published. It appears from the "Field" which is made up to Christmas day, that the conducts operations in 18 different countries, and a total number of corps or branches is 2,587, of which 1,033 are in England, 1,000 in the United States, 683, and officers 7,167. This return shows that in the course of the year of 375 corps, 100,137 junior soldier corps, and 1,423 officers, during the twelve months no fewer than 2,300,000 have been held and 3,400,000 houses have been visited by the officers. 15,442 to persons in the United States sought salvation at the pentecost form. Ten "stump poles" have been opened and nearly 200,000 copies of the *War Cry* and a half million copies of the *Young Soldier* are and six million copies of the *Young Soldier* are sold. In the coming year 250,000 is demanded.

KUMBA-ABISHREGAM AT
TRICHINOPOLY

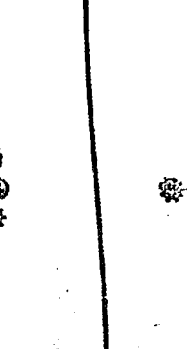

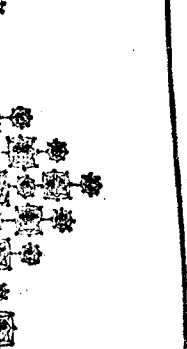

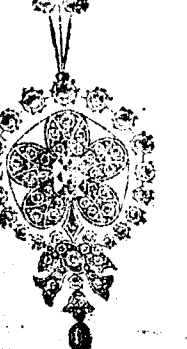

Our Tichinopoly correspondents write under date
An incident.—A native portion of this town has
been unfair for the past fortnight owing to grand
sales in the suburbs of the city.

see one or two temples in one town; and, in consequence, a very large sum of money was contributed by them towards defraying the necessary expenses. According to the Sirga system of the Hindus, the consecration or dedication of a new or an old temple involves very elaborate ceremonies, rites and other observances, in order to give full efficacy to the transaction. None but Brahmins can perform these ceremonies and rites, Brahmins should moreover be clothed, fed and otherwise satisfied. According to the Sirga system, thousands and thousands of Brahmins were daily fed at the station by the Chakras at different centres in the town, and there has been plenty of dirt, trouble and bother among the crowds that have been daily flocking to the Fort. Extraordinary police arrangements have been made to keep order. To-day is the last and most important day, and thousands of people are still flocking to this town. The S. I. R. Company do not seem to be aware of the importance of the occasion, otherwise they might have arranged to run special trains, and come in for a good windfall. Yesterday, crowds of people had to be sent away from Railway stations simply because the ordinary trains could not accommodate more passengers than those they were already carrying. I found it a difficult task to get admission to the platform of the Kullachi Railway Station yesterday evening, and I had to fight my way up to the train, so dense was the throng that had gathered at the Railway yard with the hopes of being able to travel to Trichinopoly by railway. Masons, smiths and other artisans have been very busy all these days in the temple on the Fort Rock. Improvements and repairs on a very large scale have been effected, and a very spacious, golden kalasham or platter has been placed, surmounting the top of the little gopuram or tower on the summit of the Fort Rock. The Rock itself will be illuminated this night, and a very grand procession of the presiding deity will go round the Rock, accompanied by music, dancing girls, and sacred ministers, &c. The British flag-staff, which has been 10 years on the gopuram, has been removed to a less prominent position, as the Hindus found its old position did not give to the presence of the god. This day is being observed by Hindus as quite a jovatsa festival.

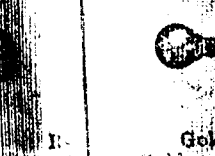

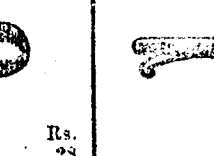

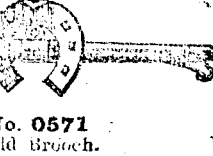

B. BAY says the *Educational Record*, is to have a Central Grammar. Government has granted a site on the Esplanade near the E. P. S. S. High School to the existing Bombay Gymnastic Institution, together with a grant of Rs. 7500 on conditions which will have the effect of greatly increasing the efficiency of the Institution and of converting it into a head quarters of physical education to Bombay. It is always a regret to find no such place where the highest standard of education is given any particular subject, whatever it may be, is maintained, and where the equivalent of the best, and the teachers are "authorities" on the subject, and really know what they are about. Such an institution exercises a stimulating effect on all similar institutions within reach of its influence, and does good far beyond its own walls. The conditions imposed by Government include the admission of the undergraduates of the Esplanade College free, and the admission of all *bona fide* students of the public schools of Bombay, whether Government or aided, on specially favourable terms.

THE SENATE DEBATE ON THE PROPOSED HIGH SCHOOL EXAMINATION.

improve the knowledge which they are tabulated and that there is an irresistible tendency in our time to lower all examinations to the level of the candidates appearing for them and capability of the examiners to their own nominal and *** but it will be a great mistake to think that the establishment of any new examination, accompanied by an improvement in the existing one, will reflect the least improvement in the

he might say, to the minimum of six times, whilst the number of men to the Government Service would be the number of men who would be educated would be greater than the number of men of higher culture in the country. The number of men entering the Government Service would be roughly the same as the number of vacancies that occurred; and the condition of things might be such that the number of graduates, when these arrangements were made, would be equal to the number of vacancies. There was another objection brought

and to the employers in the country who, he said, would be so glad that the market value of improved P. S. oil from lowering the market value would turn out a much improved article—and that would be accepted in many markets, not only in the market of the Presidency town, or in the towns of the districts and provinces of this Presidency, but also in the markets of Hyderabad, Bikaner, Ajmer and Burmah. He believed that if this Agency would only take the lead and say that it sent out men with secondary education fit to take up the post in several and various branches, they should achieve for this Presidency a glorious and honorable position in India—a position that could not be attained by any other province.

feeding Europe with wheat at 32s. per qr. The fact seems overlooked, however, that there are a great many virgin soils besides those of America not yet exhausted. The Board of Trade returns show that during the past eleven months the imports from Russia have increased prodigiously. No sooner has the British farmer overcome nomadism than another springs up to take his place. The world is wide, and although when there are bad seasons wheat may be expected to rise in price it is not easy to see the *rationalité* of the doctrine just now taught by the States, that population is increasing more rapidly than the production of food. The same causes that have led to wheat being imported at 28s. per qr. are just as likely to come into operation again next year, and there seem nothing to hinder them from so doing. There can be nothing gained in causing farmers to entertain false notions, or repose in a fancied security, devoid of substantial reality.

A question that is being considered just now in England is the probable future price of wheat. Has the rise experienced this winter any element of firmness in it? The pamphlet recently issued by the Corden Club answers this question in the affirmative, and most of the statisticians and theorists who pretend to be prophets will have it that the United States have become tired of feeding Europe with wheat at 32s. per qtr. The fact seems overlooked, however, that there are a great many virgin soils besides those of America not yet exhausted. The Board of Trade returns show that during the past eleven months the imports from Russia have increased prodigiously. No wonder that the British farmer overcomes one antagonist than another springs up to take his place. The world is wide, and although when there are bad seasons wheat may be expected to rise in price it is not easy to see the rationale of the doctrine just now taught by the statisticians that population is increasing more rapidly than the production of food. The same causes that have led to wheat being imported at 28s. per qtr. are just as likely to come into operation again next year, and there seem nothing to hinder them from so doing. There can be nothing gained in causing farmers to entertain false notions, or repose in a fancied security, devoid of substantial reality.

SIMPSON AND CO.
Mount Road, Madras.**"SPORTING."****WHEELLESS LEVER CHRONOGRAPHS.****GUARANTEED 5 YEARS.**

Pendul Racing Meters have greatly met the demand of the Turf to and have stood the test of comparison with the most expensive products. Chronographs; the complicated works are very accurately set together, and the manufacture is of the soundest material and workmanship.

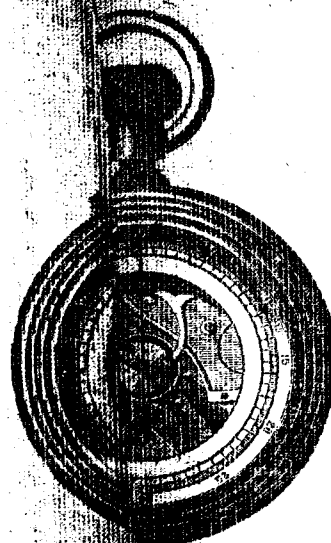

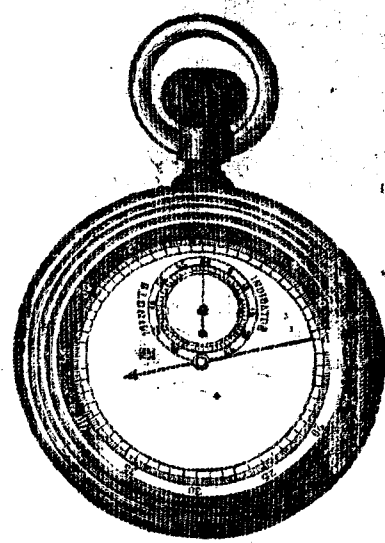

WINDING.—A slight pressure on the top button starts the Chronograph, the back; the second stops it; and the third brings it flying back to zero.

ADJUSTMENTS.—Are Patent-lever, full Ruby Jewels with the "New Type" face, and Breguet Spiral Spring adjusted to Heat and Cold positions.

The "New Type" Chronograph is at the back of the Watch with Centre Second which is entirely independent of the works of the Watch.

Dear Sir,—The Chronograph you sent me I required for the Don Races, and must say that it adequately suited the purpose. The minute being recorded, the fly pin showed to the 25th part of a minute the winner came in.

In my opinion it is a very fine Watch to time the horse with. There is only one other Watch of the same description on the field, and it talked pretty as mine. I send you this by express as acknowledgement.

Sir,

I have the honor to inform
You in reply to your letter No ¹⁵⁵⁸ 27-11-59 that
I have not yet had a reply from
the Executive Engineer, but that I have
examined the flagstaff and find that
it is in the same level as before. It is on
the top of the Mantapam a few yards
to the South west of its old position.
The position of the small temple on the
top of the Mantapam has also been moved
a few yards to the South.

2. I would suggest the issue of a
Government order forbidding any further
change in the position of the flagstaff,
for any reason whatever.

I have &c

HEADING *Special and Miscellaneous*

QUARTER MASTER GENERAL'S OFFICE,

Octacamund,

6 December 1889.

It is requested that the heading, number, and date of this communication may be quoted in any subsequent correspondence on this subject.

No. 3561 *A.*

From

BRIGADIER-GENERAL M. PROTHEROE, C.B., C.S.I.,

QUARTER MASTER GENERAL,

To

THE SECRETARY TO GOVERNMENT,

MILITARY DEPARTMENT.

SIR,

In returning the copy of the Madras Times, received with P. G. No. 7120 dated 17 October 1889, I am desired to report that in December 1888 the Collector of Trichinopoly represented that, when carrying out certain repairs to the temple on the rock at Trichinopoly, the manager proposed to remove the tower over the belly god, in which the flagstaff was placed, and to fix a gilt pinnacle on the top. As this could not be done without altering the position of the flagstaff they applied for permission to remove the same.

2. The proposal being recommended by the General Officer Commanding Southern District, who was of opinion that the alteration, considering the position of the flagstaff on the summit of the rock, would not be of any consequence, was duly approved, on the understanding that the expenses attending the removal were borne by the managers of the temple, and that the flagstaff itself was not in any way obstructed from view.

By me accompanying of
letter. No. 39 of the 28 November 1889 from
the Collector of to the Officer Commanding.
Trekinnopolis. It will be observed that as the
flagstaff is on the same level as before, no
change in its conspicuousness would appear to
have taken place.

I have the honor to be
Sir
Your obedient servant.
Colonel
For Quarter Master General
J. W.
