The Medical Board is of opinion that cholera was ~~not~~ epidemic during the week ending 28th March 1890.

This total under "Fever" includes 16 deaths from "Measles".
 Opinion is based on the following grounds:— only one death registered during the week.

35
340

1. Whether the disease shows a tendency to increase or diminish;
2. How far this may be attributed to seasonal variations or other causes;
3. Whether the disease is confined to any particular quarter of the town or to any particular class of the population, and whether these are in any direct local connection with the shipping and port;
4. Whether the disease shows general epidemic tendency to attack all classes alike.

Dated

Madras.
1st April 1890.

C. Livethorpe Brig.-Surgeon,

Senior Medical Officer,
General Hospital,
President of the Medical Board.

Note

Further search has been made for the orig. of G.O. 25 Aug. 1892. It is 920 lines, but it is not for coming in the Record Office. It appears that the paper was never received in this Dept. for, at the time of the transfer of the '92 Public records, they were checked here with the Tables of Contents & the paper in question was then found to be missing and a note in ink made to that effect in the Tables. It is submitted that as the G.O. appears to be rather important, it may be well to call for an attested

copy of it from the Surgeon
General for record.
