SIR,

Calcutta, the March 1891.

As some difficulty has been experienced in consequence of the refusal to enter Government service of students who have received medical instruction either wholly or in part at the expense of the State on the condition of their entering Government service after qualifying as Assistant Surgeons or Hospital Assistants, I am directed to enquire whether it is the practice in execute security bonds with such students, or, in the case of minors, with their lawful guardians on their behalf, at the commencement of their course of study, binding them, in the event of their being successful in qualifying for the branch of the Subordinate Medical Service for which they intend to study, serve the Government for a definite period.

The Governor General in Council is of opinion that, if this is not already done, an agreement to the above effect should be taken from students whose education at a medical institution is aided by Government, at the beginning of their career at that institution, as it would obviously be too late to attempt to enforce service after the completion of their course of study.

If an agreement such as that referred to is usually taken, I am to request that a copy of the form prescribed in may be forwarded for the information of the Government of India.

I have the honour to be,

SIR,

your most obedient servant,

C. J. LYALL,  
Secretary to the Government of India.
