JANUARY.

Emigration.

Replying to enquiry as to whether any further remarks should be addressed to the Government of the Straits Settlements with regard to statistics of mortality in 1889 among emigrants from India, and requesting the Government of India to consider the question of increasing the wages of indentured emigrants.

GOVERNMENT OF MADRAS.
PUBLIC DEPARTMENT.

READ—the following papers:—

From the Honorable W. C. BENETT, C.S., Officiating Secretary to the Government of India, Revenue and Agricultural Department (Emigration), to the Secretary to the Government of Madras, dated Simla, 26th September 1890, No. 1417—62-2-E.

In continuation of my endorsement, No. 137—E, of the 21st August 1889, I am directed to forward, for the information of His Excellency the Governor in Council, a copy of the annual report on Indian Immigration in the Straits Settlements for 1889, and to inquire whether, with regard to the statistics of mortality furnished in the report, the Government of Madras would desire that any further remarks should be addressed to the Colonial Government on the subject, in addition to those contained in Government of India letter, No. 1015—E, of the 30th July last, a copy of which was forwarded to the Government of Madras with my endorsement, No. 1016, of the same date.

Reference—dated 20th October 1890.

Referred to the Collector of Tanjore for remarks.

(Signed) J. F. PRICE,
Chief Secretary.

From J. THOMSON, Esq., Acting Collector, Tanjore, to the Chief Secretary to Government, dated Vallam, 28th November 1890, No. 854.

Referring to endorsement, No. 2872, of 20th October last, in the Public Department, forwarding, for remarks, the annual report on Indian Immigration in the Straits Settlements for 1889, I have the honor to submit copies of the Head Assistant Collector's, Negapatam Emigration Agent's, and Civil Surgeon's observations thereon.

2. It will be observed that the Emigration Agent recommends a fortnight's rest in depôt at Penang, while the Colonial Secretary (paragraph 7 of his letter) speaks of 4 or 5 days, and that he denies that the class of cooly sent to the Straits is inferior to that sent elsewhere. The Civil Surgeon's acquaintance with returned emigrants who seek his assistance has not impressed him favorably as to the climate, healthiness of estates, wage, term of contract, and work. His suggestion that intending emigrants should be made fully aware of prices where they purpose going is practical and can and should be adopted. Mr. Cobb objects to the Straits emigration *in toto* considering that there is a home demand for labor, that the Straits emigrant is far from properly remunerated, and that the East Coast native constitution is unequal to the Straits climate.

3. The Straits Settlements will of course get a better class of men physically by means of their having a competent agent in Negapatam. But that does not relieve this Government of the obligation of seeing that the conditions of climate, labor and wage there are such as the ordinary cooly should be subjected to, and Mr. MacGregor's report, paragraphs 6, 9, 10, and 17 to 19, and the tables and causes of mortality, are such, in my view, as to indicate grossly-careless treatment or ill-treatment of the immigrants, and that the India Government should insist on a higher rate of wages, shorter term of contract, and more attention to housing and no doubt clothing, or prohibit

READ—the following papers:—

From the Honorable W. C. BENETT, C.S., Officiating Secretary to the Government of India, Revenue and Agricultural Department (Emigration), to the Secretary to the Government of Madras, dated Simla, 26th September 1890, No. 1417—62-2-E.

In continuation of my endorsement, No. 137—E, of the 21st August 1889, I am directed to forward, for the information of His Excellency the Governor in Council, a copy of the annual report on Indian Immigration in the Straits Settlements for 1889, and to inquire whether, with regard to the statistics of mortality furnished in the report, the Government of Madras would desire that any further remarks should be addressed to the Colonial Government on the subject, in addition to those contained in Government of India letter, No. 1015—E, of the 30th July last, a copy of which was forwarded to the Government of Madras with my endorsement, No. 1016, of the same date.

Reference—dated 20th October 1890.

Referred to the Collector of Tanjore for remarks.

(Signed) J. F. PRICE,
Chief Secretary.

From J. THOMSON, Esq., Acting Collector, Tanjore, to the Chief Secretary to Government, dated Vallam, 28th November 1890, No. 854.

Referring to endorsement, No. 2872, of 20th October last, in the Public Department, forwarding, for remarks, the annual report on Indian Immigration in the Straits Settlements for 1889, I have the honor to submit copies of the Head Assistant Collector's, Negapatam Emigration Agent's, and Civil Surgeon's observations thereon.

2. It will be observed that the Emigration Agent recommends a fortnight's rest in dépôt at Penang, while the Colonial Secretary (paragraph 7 of his letter) speaks of 4 or 5 days, and that he denies that the class of cooly sent to the Straits is inferior to that sent elsewhere. The Civil Surgeon's acquaintance with returned emigrants who seek his assistance has not impressed him favorably as to the climate, healthiness of estates, wage, term of contract, and work. His suggestion that intending emigrants should be made fully aware of prices where they purpose going is practical and can and should be adopted. Mr. Cobb objects to the Straits emigration *in toto* considering that there is a home demand for labor, that the Straits emigrant is far from properly remunerated, and that the East Coast native constitution is unequal to the Straits climate.

3 The Straits Settlements will of course get a better class of men physically by means of their having a competent agent in Negapatam. But that does not relieve this Government of the obligation of seeing that the conditions of climate, labor and wage there are such as the ordinary cooly should be subjected to, and Mr. MacGregor's report, paragraphs 6, 9, 10, and 17 to 19, and the tables and causes of mortality, are such, in my view, as to indicate grossly-careless treatment or ill-treatment of the immigrants, and that the India Government should insist on a higher rate of wages, shorter term of contract, and more attention to housing and no doubt clothing, or prohibit

the emigration. The physically-better class selected in the circumstances stated will only drag out a longer existence.

ENCLOSURES.

From H. V. COBB, Esq., Acting Head Assistant Collector of Tanjore, to the Collector of Tanjore, dated Negapatam, 17th November 1890, No. 1922.

In returning Government reference, dated 20th October 1890, with your endorsement, No. 7150, of the 20th ultimo, I have the honor to observe that it is not quite clear to me whether you desire a general expression of opinion on the emigration from Negapatam to the Straits, or whether you wish that my remarks should be confined to the question of mortality referred to by the Government of India. I propose, however, to adopt the former view, and accordingly make the following observations.

2. The emigration depôt established here is, in my opinion, an excellent institution. The fact that there have been so many rejections shows that the Superintendent is really doing his duty. Under existing arrangements, kidnapping or anything approaching thereto is impossible. The recruiter may, and probably does, hold out false inducements to many would-be emigrants. These promises are, however, ruthlessly dispelled by the plain and unvarnished truth which is put before every man, woman and child, when brought to the depôt, by not only the Superintendent, but also by the Emigration Agent, whose duty it is to inspect the emigrants a few hours before they sail. I have myself, since my arrival, seen this inspection held, and was pleased with the thorough and efficient manner in which it was conducted. Here, however, it should be said that although the emigrants are told exactly what pay they will receive during the whole period of their contract, yet they cannot and do not the least understand what it really means. Political economy is a science unknown to them, and a disquisition on the fact that the value of wages is dependent on food prices would present but little meaning to their untutored minds. All their grasp is that, whereas here their earnings would not exceed, say, Rs. 4 a month, in the land of promise to which they are going their monthly wage will commence at Rs. 7-4-0 and will be raised to Rs. 9 after the first year. They do not know that in point of fact they would do better with Rs. 3 here than Rs. 9 there, and that they will have the mortification of seeing *

* Paragraph 19 of the report.

their fellow-countrymen employed on free labor earning Rs. 25 or Rs. 30 a month for exactly similar work.

Till contract wages have been doubled, I for my part would be glad not to see a single cooly leave our ports. The planters of Coorg, the Nilgiris and Malabar are crying aloud for labor, and till they are supplied I look with disfavor upon official attempts to bolster up recruitment for foreign lands, especially when such recruitment is attended with a minimum wage and a maximum mortality.

3. As regards the question of mortality, in spite of the remarks of the Acting Colonial Secretary in paragraph 7 of his letter, dated 19th June 1890, No. 3251, I still think that there is considerable truth in the point raised by my predecessor as to prostration caused by sea-sickness. A more important consideration however—and one which the Port officer urges strongly—is that the Straits climate is totally different to that of the East Coast of India, whence most of the emigrants are drawn. I am informed that in the Straits there is constant rain all the year round. If, then, men are to be recruited at all, I would urge that the most suitable for the purpose are West Coast natives, who are acclimatized to a heavy rainfall.

4. As stated above, however, I am altogether averse to emigration, which is beset with misrepresentations here and hardships there. If it is to continue, the wages rate must at any cost be raised, and then, and not till then, will the number of deaths euphemistically ascribed to "debility"—which, I take it, is another method of expressing "want of proper food"—be satisfactorily reduced.

5. I enclose true copies of a letter on the subject from the Civil Surgeon and of some remarks made by the Port officer on paragraph 3 of the present report.

REMARKS of the Port officer on paragraph 3 of the Head Assistant Collector's report.

The Port officer as Emigration Agent has had considerable experience in the subject extending over two years, and points out that the majority of the coolies are fresh caught in the jungles. The voyage is just long enough to pull them down; the most of them have never even been on ship and of course are sea-sick the whole five days of the voyage. Were they received in a depôt at Penang and fed up for a fortnight before being sent to the estates, they would have a chance. It is absurd to say the stamp of cooly sent is inferior; the same sort of people are sent to Mauritius and Natal, but the voyage is longer, and they arrive at their destination strong and healthy.

(Signed) P. JAMES,
Emigration Agent.

From S. PATRAO, Esq., Acting Civil Surgeon, Negapatam, to the Head Assistant Collector, Negapatam, dated 15th November 1890, No. 417.

I have the honor to return herewith annual report on Indian Immigration Agent for the year 1889 and its enclosures received by me from the Port officer, Negapatam, on the 14th instant.

1. It is indeed very deplorable to go over the long list of deaths among the Indian emigrants in the Straits Settlements during the year 1889, and I consider that the excessive death-rate is generally due to the unhealthiness of most of the estates and the climatic influence, the low rate of wages and the long term of their contract, or overwork.

2. The Indian cooly, who is mostly tantalized by the recruiters, finding that his wages at the Straits Settlements would be far better than what he would earn here, hardly gives ear to what is told him in earnest by the Emigration Agent and Protector, but exposes himself to the risk of trying his fortune in a strange land the description of which has already been given to him by the recruiters in the most commendable terms.

3. I had occasion to see some of the returned emigrants who sought admission into the municipal hospital during the last one year. I have been in medical charge and found many of them suffering from chronic diarrhoea and dropsy, which clearly show that among the coolies who return from the Straits, most of them with a very few exceptions are subject to some disease or other contracted during their sojourn there, and as these men are found quite helpless and destitute with regard to their means and health, it is a question open to answer whether those who go there with the hopes of earning their fortunes or at least bettering their prospects, do really obtain their object in view.

4. However I would suggest—

(a) that the emigrants after they are landed at their destination should be given at least a week's rest before they are sent for work;

(b) that a shorter period of contract and liberal wages should be offered, as the wages are too small for the work taken owing to the high prices of provisions, &c. In conclusion, I would solicit that a table showing the prices of the several articles of food current at the Straits should be posted at the depôt here for the guidance of the coolies, so that they may be able to see things as they are, and not to be misguided.

Exd. A. Raitt.

the 15th Nov: 90.

I am to add that
Govt is of opinion
that some stipulations
should be made as to
the minimum wages
to be paid to contract
labourers. They ^{now} cannot
of course expect the same
terms as free labourers
who find their own way
to the work, but if the
latter class receive as
much as from 20 to
30 rupees a month this
Govt is of opinion that
contract labourers shd

not be forced ^{paid} to accept
less than Rs. 9 ^{a sum which}
^{appears to be sufficient for}
^{if even that} ~~to live and~~
~~keep in good health on.~~
~~In the opinion of this~~
~~Govt an immigrant has~~
~~the right to expect not~~
~~merely to live in decent~~
~~comfort but to be able~~
~~to save something to~~
~~send to his family or to~~
~~take back with him.~~

I am accordingly
request that the ques-
tion of increasing the
ages of indentured
migrants may be taken

From orders

into consideration
at an early date as
it seems probable
that many of the
deaths attributed
to debility & diarrhoea
^{have been} ~~are~~ primarily due
to ^{want} ~~insufficiency~~
of means ^{to procure sufficient}
^{wholesome food} ~~From orders~~

10-1-91

10-1-91

You might also add
 simulation as to the minimum
 to be paid. Contract labourers
 of course expect the
 terms as free labourers,
 find their own way to the
 site settlements; but if free
 labourers are getting Rs 25 to
 30 p. m. some arrangements
 should certainly be made whereby
 Contract labourers should not be
 forced to take as little as Rs 9,
 which appears for the wages
 to be barely suff. for man to
 live & keep in good health
 or in those parts. A migrant
 has the right to expect, not merely
 to live in decent comfort & with a
 full supply of food, but ~~not~~ to
 be able to save something to send
 back to his family or to take
 back with him, as the coolies
 who go to Ceylon from S. India
 habitually do.

It is submitted that such has been
that this fact does not imply anything
anything implying & assuming what it says
^{in para 6 of the Dr's Report better consideration.}
The latter report refers to the calendar
year 1889 and the letter mentioned by
Lubin was not written until the 30th
Aug. The reports at Singapore began
to work under the new conditions only on
the 1st Jan'y 1890. There is no submission
been so sufficient time to see the
effect of any of the reforms at Singa-
papore & in the Straits Settlements. The
reports of the San'ty Agents for 1889 show
that there has been a very heavy mortality
amongst the coolies who are being used
50 per mille. The tables at the
end of the report do give the belief
that this high mortality may have
been in large due to preventable causes.
"Dysentery" and "dyscholera" are
it would appear from the ^{Prominent Sickness} ~~Report~~
~~not of the reports~~ as responsible for no
less than 71.8 per cent of the deaths
in 1889. There were 572 deaths and
out of those 207 were from dysentery
and diarrhoea. In the
province of Malakka which 162 out
of 249 deaths were from dysentery. This
could hardly be the effect of climate
or of the local physique of the coolies
as there sent to the Straits Settlements
seem to have been all of the same
class those going to other States
being up anything like worst physically.
It seems highly probable that what is mainly
at the bottom of the heavy death rate in

GOVERNMENT OF MADRAS.

5. I enclose true copies of a letter on the subject from the Civil Surgeon and of some remarks made by the Port officer on paragraph 3 of the present report.

REMARKS of the Port officer on paragraph 3 of the Head Assistant Collector's report.

The Port officer as Emigration Agent has had considerable experience in the subject extending over two years, and points out that the majority of the coolies are fresh caught in the jungles. The voyage is just long enough to pull them down; the most of them have never even been on ship and of course are sea-sick the whole five days of the voyage. Were they received in a dépôt at Penang and fed up for a fortnight before being sent to the estates, they would have a chance. It is absurd to say the stamp of cooly sent is inferior; the same sort of people are sent to Mauritius and Natal, but the voyage is longer, and they arrive at their destination strong and healthy.

(Signed) P. JAMES,
Emigration Agent.

From S. PATRAO, Esq., Acting Civil Surgeon, Negapatam, to the Head Assistant Collector, Negapatam, dated 15th November 1890, No. 417.

I have the honor to return herewith annual report on Indian Immigration Agent for the year 1889 and its enclosures received by me from the Port officer, Negapatam, on the 14th instant.

1. It is indeed very deplorable to go over the long list of deaths among the Indian emigrants in the Straits Settlements during the year 1889, and I consider that the excessive death-rate is generally due to the unhealthiness of most of the estates and the climatic influence, the low rate of wages and the long term of their contract, or overwork.

2. The Indian cooly, who is mostly tantalized by the recruiters, finding that his wages at the Straits Settlements would be far better than what he would earn here, hardly gives ear to what is told him in earnest by the Emigration Agent and Protector, but exposes himself to the risk of trying his fortune in a strange land the description of which has already been given to him by the recruiters in the most commendable terms.

3. I had occasion to see some of the returned emigrants who sought admission into the municipal hospital during the last one year. I have been in medical charge and found many of them suffering from chronic diarrhoea and dropsy, which clearly show that among the coolies who return from the Straits, most of them with a very few exceptions are subject to some disease or other contracted during their sojourn there, and as these men are found quite helpless and destitute with regard to their means and health, it is a question open to answer whether those who go there with the hopes of earning their fortunes or at least bettering their prospects, do really obtain their object in view.

4. However I would suggest—

(a) that the emigrants after they are landed at their destination should be given at least a week's rest before they are sent for work;

(b) that a shorter period of contract and liberal wages should be offered, as the wages are too small for the work taken owing to the high prices of provisions, &c. In conclusion, I would solicit that a table showing the prices of the several articles of food current at the Straits should be posted at the dépôt here for the guidance of the coolies, so that they may be able to see things as they are, and not to be misguided.

For orders.

It is submitted that the question calls for serious attention. The full effect of the establishment of the new dépôt at Negapatam will not be known until it has been in existence some time. It will probably go far towards effecting all necessary changes on this side, but the question is whether sufficient care is taken of the coolies over there.

FROM J. Thomson

ESQUIRE,
Collector,
TANJORE,

TO The Honorable Mr. J. J. Prier,
Chief Secretary to Govt. Public Dept.
Madras.

SIR,

Referring to endorsement No. 2872 of 20th October last in the Public Dept. forwarding for remarks the annual report on Indian Immigration in the Straits Settlements for 1889 I have the honor to submit copies of the Head Assistant Collector, Malapattam Emigration Agents and Civil Surveys' observations thereon.

2. It will be observed that the Emigration Agent recommends a fortnight's rest in depot at Penang while the Colonial Secretary (para 7 of his letter) speaks of 4 or 5 days and that he desires

in connection.

that the class of Coolies sent to the Straits is inferior to that sent elsewhere. The Civil Surgeon's acquaintance with returned Emigrants who seek his assistance has not impressed him favorably as to the climate, healthiness of estates, wages, term of contract and work. His suggestion that intending Emigrants should be made fully aware of prices when they purpose going is practical and can't should be adopted. Mr Cobb objects to the Straits Emigration in toto considering that there is a heavy demand for labour, that the Straits Emigrant is far from properly remunerated and that the East Coast native constitution is unequal to the Straits climate.

3. The Straits Settlements will of course

get a better class of men physically ⁴⁸ by means of their having a competent Agent in Negapatam. But that does not relieve this Government of the obligation of seeing that the conditions of climate labour & wages there are such as the ordinary Cooly should be subjected to and see Macfarlane's report, paras 6, 7, 10 & 17 to 19, and the tables and causes of mortality are such, in my view, as to indicate grossly careless treatment or ill treatment of the immigrants and that the India Government should insist on a higher rate of wages shorter term of contract and more attention to housing and no double clothing, or prohibit the emigration. The physically better class selected in the circumstances stated, will only drag out a longer existence.

the Coolies who return from the Straits, most of them with a very few exceptions are subject to some disease or other contracted during their sojourn there and as these men are found quite helpless & destitute with regard to their means and health, it is a question open to answer whether those who go there with the hopes of earning their fortune or at least bettering their prospects do really do so.

I would suggest,
4. How ever Emigrants after they (a) that the at their destination are landed given at least a week's should be if they are sent for work rest before shorter period of contract (b) that a real wages should be and liberties wages are too small offered, as it taken owing to the for the want of provisions &c. In high prices, I would solicit that conclusions showing the prices a table.

2. The Indian Coolie who is mostly enticed by the recruiters finding that his wages at the Strait Settlements would be far better than what he would earn here, hardly gives ear to what is told him in earnest by the Immigration Agent and Protector. He exposes himself to the risks of a long and tedious voyage and the description of which has already been given to him by the recruiters in the most commendable terms.

3. I had occasion to see some of the returned Emigrants who sought admission into the Municipal Hospital during the last one year. I have been in the medical charge, and found many of them suffering from ^{diarrhoea} diarrhoea and dysentery which clearly show

the amount

of the arbitrariness of fact
 in para of with Rs 3 here
 I still think that they will

STRAITS SETTLEMENTS

ANNUAL REPORT

ON

INDIAN IMMIGRATION AGENT

FOR THE YEAR

1889

BY

A. M. MACGREGOR

Indian Immigration Agent

Straits Settlements

PUBLISHED BY AUTHORITY

SINGAPORE

PRINTED AT THE GOVERNMENT PRINTING OFFICE

1890

ANNUAL REPORT ON INDIAN IMMIGRATION, FOR THE YEAR 1889.

INDIAN IMMIGRATION OFFICE,
Singapore, 27th March, 1890.

SIR,—I have the honour to submit my Annual Report on the Indian Immigration Department for the year 1889.

2. Two thousand seven hundred and forty-seven (2,747) Immigrants under indenture arrived during the year, with 174 dependants, being 1,937 less than in 1888. Twenty-six (26) were rejected by the Medical Officer in Penang, and were returned to India, 23 were redeemed from their contracts before leaving the depôt, and 11 refused to sign their agreements and were prosecuted.

3. Of the 2,747 arrivals, 1,599 were for service in the Colony, 1,148 for the Native States, viz.:—

Perak,	803
Selangor,	69
Sungei Ujong,	142
Johor,	134

4. Fifteen thousand two hundred and eighty-five (15,285) Immigrants not under indenture arrived, being a decrease of 527 on last year; and 14,099 returned to India.

5. Enclosures *A* and *B* give the names of the ships that arrived and departed from Penang with Indian Immigrants during the year.

DESERTIONS.

6. Two thousand four hundred and eighty-five (2,485) Statute Immigrants deserted, of whom 1,114 were arrested. I shall deal with the causes for desertion later on.

BIRTHS.

7. The births given in the table below were reported:—

	Male.	Female.
Penang and Province Wellesley,	67	47
Malacca,	11	5
Perak,	1	...
Sungei Ujong,	...	...
Selangor,	...	...
Johor,	...	...

DEATHS.

8. Enclosure *C* shows the deaths that occurred amongst the Statute Immigrants in the Colony, and *D* those that occurred in the Native States.

9. It will be seen the rate of mortality in Selangor is considerably less than last year, the percentage for the whole State being 5.91, against 13.06 for 1888. Sungei

Ujong, however, was very unfortunate during part of this year, and thus shows a heavy mortality. This was chiefly due to an unfortunate selection of site for the lines for men employed on the new Railway works, and the following extract from Dr. TRAVERS' report on this subject will show the great improvement which has taken place:—"During the latter part of the year 1888 and up to June, 1889, all the coolies lived in the newly felled jungle, lines being built for them close to their work on the earthworks along the railway trace. In January, several cases of dysentery and diarrhoea occurred among them, the number attacked increased rapidly, one set of lines being affected after another until, in June, Messrs. HILL & RATHBORNE agreed to take all the coolies out of the jungle and to let them live on the sea shore, lines were built for them in the village, and they left the jungle at the end of June; from that day the sickness decreased, and whereas in May and June there were 23 deaths and a daily total of some 70 sick, in November and December there were only 2 deaths and from 18 to 20 sick." The health of Linsum Estate has also improved, and Dr. TRAVERS is giving the matter his earnest attention, and only a few days ago I inspected all the coolies in Sungei Ujong, and was greatly pleased with their appearance, indeed the greatest care and attention is given to this most important question by the Residents and Medical Officers and there is every reason to believe that the unfortunate loss of life which has taken place will not recur.

10. The health of the coolies on Kemendor Estate in Malacca and Batu Pahat Estates (viz., Cambus, Letty Brook and Stoke Rochford) in Johor was at one time very bad, and committees of enquiry were held, and considerable improvement has resulted. Kamuning Estate in Perak is a new clearing, and seems for the present to be unhealthy.

CONTRACTS.

11. Two thousand five hundred and fifty-six (2,556) contracts with Immigrants on arrival were executed, and 121 contracts were renewed in this Office. Besides these, 69 were executed in Selangor and 134 in Johor.

CERTIFICATES.

12. One thousand four hundred and sixty-eight (1,468) certificates under section 9 of the Ordinance were issued in this Office, and 1,738 were issued by the Assistant Agent in Singapore.

GENERAL REMARKS.

13. The number of Immigrants not under indenture that arrived is about the same as last year, but the falling off in the number of Statute Immigrants is easily accounted for.

14. The medical examination has been very strict, the rejections at Negapatam being about 50 per cent. of the coolies presented, but I believe it is generally admitted that we now get men of better physique and it is to be hoped that the new depôt will still further improve matters.

15. Although the new depôt at Negapatam only commenced work from the 1st January, 1890, all necessary arrangements were completed in 1889, so it may properly be mentioned in this report.

16. A Medical Officer of considerable Indian experience and thoroughly conversant with three Indian languages, viz., Tamil, Telugu and Hindustani, was appointed to take charge of it, and from the experience gained by him during the year 1888 in passing coolies for the Straits Settlements while Medical Officer on one of the Immigrant steamers, I have every hope of a better class of cooly being sent here, while his knowledge of the language will enable him to thoroughly explain to all comers what work they will be expected to perform and the wages they will receive, which will prevent the disappointment so often felt by Immigrants on arrival owing to the misrepresentations of the recruiters.

17. The depôt will, I believe, also tend to bring about an increase in wages, and possibly a reduction in the term of contract, both of which are, I consider, much needed, and I am happy to say I have at last succeeded in inducing two employers of Statute Immigrants to try new systems, one being contracts for one year with a daily wage of 20 cents, and the other allowing extra wages for extra work, and cancelling all advances to coolies who work steadily, and it is only reasonable to suppose that when the other coolies in depôt hear of these terms they will decline anything less favourable, and those who are willing to give liberal terms will get first choice.

18. The low wages given, especially in the Native States, I consider seriously affects the health of the coolies. The price of provisions is considerably higher than in the Colony, and the weaker coolies especially suffer in this respect, as they cannot work every day, and the numerous deaths from debility which figure so prominently in returns annually submitted may, to some extent, be thus accounted for.

19. The low rate of wages, combined with despair at being bound to serve for a period of three years, is, I believe, the chief cause of desertion. Living in lines under a certain amount of discipline is always distasteful to the Tamil cooly, and when he sees himself surrounded by his own countrymen who can earn about treble his wages and live as they choose, he becomes desperate and either deserts or goes to hospital, which, in only too many instances, ends in death.

20. The Chinese planters in Malacca in the early part of the year gave cause for some anxiety, owing to their want of knowledge of the Tamil. The provisions of the Ordinance were, however, strictly enforced, and due punishment was promptly inflicted. The estates being visited monthly by the Assistant Indian Immigration Agents also ensures the good treatment of the coolies.

I have, &c.,

A. M. MACGREGOR,
Indian Immigration Agent, S.S.

To The Hon'ble
The Colonial Secretary,
Straits Settlements.
