No. 22.

To His Excellency The Most Honourable The Governor General of India
in Council.

MY LORD MARQUIS,—In continuation of my despatch of 22nd January,
Dated March 6th, 1891. No. 2, I forward a copy of a letter from
the International Congress of Hygiene and
Demography, and request that you will cause to be prepared and forwarded to
me as early as practicable the information requisite to answer the questions
which are set forth in it. I shall also be glad to know whether Your Excellency
has taken any steps to bring the objects of the Congress under the notice of the
principal Native States.

2. A telegram, of which a copy is given in the margin, was sent to

good enough to state whether any reply has yet been received to the communication so kindly addressed to the Government of India by the Right Honourable the Secretary of State.

As the time is very short, the Committee will feel greatly obliged if Viscount Cross will impress upon the authorities in India the urgency of the matter.

His Royal Highness the Prince of Wales has intimated his intention of presiding at a meeting of the General Committee on Monday, March 16th, and it would be a great convenience if we could learn by that date what support the Governments in India are able to give the Congress.

We are further instructed to express the hope that His Lordship will favour the Committee by asking the Governments of India to submit the following questions to Sanitary Commissioners in India:—

1. When was your Office instituted?
2. What is your Staff (a) Europeans, (b) Natives, and their designations (not to include vaccinators)?
3. Have you control of the vaccination?
4. Do your vaccinators assist in sanitary work?
5. How many vaccinators are under your supervision, including all classes, inspectors, municipal, &c.?
6. Have you anything to do with Military sanitation?
7. If not under you, how is the Military sanitation supervised in your province?
8. Please mention concisely in chronological order the principal sanitary improvements which have been effected in your province during the past 20 years.
9. Do you think the people are becoming more disposed to adopt sanitary measures?
10. Do you think any kind of disease has been lessened by the sanitary measures adopted? If so, please name the disease.
11. Can you give figures showing the prevalence of certain diseases—Fever as a class, Cholera, Dysentery, Liver Abscess, Guinea Worm, Scurvy, Leprosy, Beri-beri, etc., among the general population, not including Military, during the ten years ending 1870, and the ten years ending 1890 or 1870, or both? This would be best shown by giving the number of deaths in ratio to the population. If you have not the information for 1890 yet prepared, please give the ten years ending 1889.
12. Can you give the death-rate of children for similar periods?
13. How many vaccinations were performed successfully in 1870, 1880, 1890? If you have not the information for 1890, please give for 1889.
14. Is there any irrigation in your province, and what do you consider has been its effect on the public health?

The information asked for in the foregoing questions is required for the use of Surgeon-General Sir William Moore, C.I.E., who has undertaken to prepare a paper on Indian sanitation; and it is thought that the questions could be answered without giving much trouble to the officers concerned.

We are also to ask that the Right Honourable the Secretary of State will be pleased to grant Sir William Moore access to the reports, &c., on Indian sanitation in the India Office, to assist him in the preparation of the papers referred to.

We are requested to add that the Committee will feel grateful if the necessary steps can be taken to bring the objects of the Congress of Hygiene and Demography under the notice of the leading Native States. The personal interest manifested by His Highness the Nizam of Hyderabad in the recent Chloroform Commission encourages the Committee to think that some at least of Her Majesty's feudatories might, with the acquiescence of the Secretary of State and the Government of India, be willing not only to nominate delegates, but also, if permitted, to become Vice-Presidents of the Congress or members of the General Committee.

We take the liberty of enclosing some printed documents which explain fully the objects of the Congress.

We are &c.,

Chairman of the Organizing Committee.

(Sd.) S. DIGBY,
Honorary Secretary for India.

(Sd.) G. T. POORE,
Honorary Secretary General.

10. Do you think any kind of disease has been lessened by the sanitary measures adopted? If so, please name the disease.
11. Can you give figures showing the prevalence of certain diseases—Fevers as a class, Cholera, Dysentery, Liver Abscess, Guinea worm, Scurvy, Leprosy, Beri-beri, etc., among the general population, not including Military, during the ten years ending 1890, and the ten years ending 1860 or 1870, or both? This would be best shown by giving the number of deaths in ratio to the population. If you have not the information for 1890 yet prepared, please give the ten years ending 1889.
12. Can you give the death-rate of children for similar periods?
13. How many vaccinations were performed successfully in 1870, 1880, 1890? If you have not the information for 1890, please give for 1889.
14. Is there any irrigation in your province, and what do you consider has been its effect on the public health?

The information asked for in the foregoing questions is required for the use of Surgeon-General Sir William Moore, C.I.E., who has undertaken to prepare a paper on Indian sanitation; and it is thought that the questions could be answered without giving much trouble to the officers concerned.

We are also to ask that the Right Honourable the Secretary of State will be pleased to grant Sir William Moore access to the reports, &c., on Indian sanitation in the India Office, to assist him in the preparation of the papers referred to.

We are requested to add that the Committee will feel grateful if the necessary steps can be taken to bring the objects of the Congress of Hygiene and Demography under the notice of the leading Native States. The personal interest manifested by His Highness the Nizam of Hyderabad in the recent Chloroform Commission encourages the Committee to think that some at least of Her Majesty's feudatories might, with the acquiescence of the Secretary of State and the Government of India, be willing not only to nominate delegates, but also, if permitted, to become Vice-Presidents of the Congress or members of the General Committee.

We take the liberty of enclosing some printed documents which explain fully the objects of the Congress.

good enough to state whether any reply has yet been received to the communication so kindly addressed to the Government of India by the Right Honourable the Secretary of State.

As the time is very short, the Committee will feel greatly obliged if Viscount Cross will impress upon the authorities in India the urgency of the matter.

His Royal Highness the Prince of Wales has intimated his intention of presiding at a meeting of the General Committee on Monday, March 16th, and it would be a great convenience if we could learn by that date what support the Governments in India are able to give the Congress.

We are further instructed to express the hope that His Lordship will favour the Committee by asking the Governments of India to submit the following questions to Sanitary Commissioners in India:—

1. When was your Office instituted?
2. What is your Staff (a) Europeans, (b) Natives, and their designations (not to include vaccinators)?
3. Have you control of the vaccination?
4. Do your vaccinators assist in sanitary work?
5. How many vaccinators are under your supervision, including all classes, inspectors, municipal, &c.?
6. Have you anything to do with Military sanitation?
7. If not under you, how is the Military sanitation supervised in your province?
8. Please mention concisely in chronological order the principal sanitary improvements which have been effected in your province during the past 20 years.
9. Do you think the people are becoming more disposed to adopt sanitary measures?
