OFFICE OF SURGEON-GENERAL

WITH THE GOVERNMENT OF MADRAS,

Cotacaimund
Madrass, 7 September 1891.

From

W. F. de Labeck Esq. M.D.
THE SURGEON-GENERAL WITH THE

GOVERNMENT OF MADRAS,

To

THE *Chief* SECRETARY TO GOVERNMENT,
Public DEPARTMENT.

Cotacaimund

SIR,

In returning the papers referred to me for report under your endorsement dated the 5th September 1891, I have the honor to state that the duties of the Civil Surgeon in connection with Railway accidents as laid down in para 35 of the printed rules meet with my approval. I would however suggest that a provision be made in the rule that in the event of the Civil Surgeon being otherwise urgently engaged he may on receipt of a requisition from the Railway authorities depute the Assistant Surgeon to the scene of the accident.

I have the honor to be,

Sir,

Your most obedient Servant,

W. F. de Labeck Esq.
Surgeon-General with the Govt. of Madras.

Revised rules for
reporting accidents
on Indian Railways

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following

*Letter from the Government of India, P.W. Department
No 636 R. J. dated 6th August 1891.*

I am directed to acknowledge the receipt of your letter No 1578 R dated 4th July 1891, submitting a memo by the Consulting Engineer together with précis of the views of the local Railway authorities on the draft rules for reporting accidents on Indian Railways.

2. With reference thereto, I am to point out that Public Works Department letter No 86 R. J. dated 20th February 1891, invited criticisms not only as regards the duties which it is proposed to assign to Railway administrations but also as regards the duties of Civil Officers, the District Police and Civil Surgeons; and I am accordingly to request that the Government of India may now be favored with the views of the Madras Government on the draft rules, in so far as they relate to the duties of the officers and Departments referred to above.

3. I am at the same time to ask that a copy of the rules for reporting accidents on the Madras Railway may be furnished with your further reply.

Order thereon No 1756 R dated 26th August 1891.

Communicated to the Departments concerned for favor of report with copy of letter from the Government of India No 86 R. J. dated 20th February 1891 and enclosure.

2. The Consulting Engineer for Railways
will be requested to furnish a copy of the
rules applied for in para 3 of the letter
read above.

Revised Rules for reporting Accidents on Indian Railways.

Simla, the 20th February 1891.

SIR,

In forwarding for information copy of a draft Resolution prescribing revised
rules for reporting accidents on Railways in India, which it is proposed to issue
in accordance with section 84 of the Indian Railways Act, 1890, I am directed to
request that the rules may be carefully scrutinized by the Railway Administra-
tions under your control, and that the Government of India may be favoured
with any suggestions as regards alterations, modifications and additions which
may seem desirable in connection with the duties therein assigned to the depart-
ments and officers concerned.

I have the honor to be,

SIR,

Your most obedient Servant,

F. B. HEBBERT,
Offg. Under-Secretary.

Draft Resolution referred to.

[DRAFT.]

(Accompaniment to the Government of India, Public Works Department,
No. 86 R.T., dated the 20th February 1891.)

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY TRAFFIC.

Simla, the 20th February 1891.

Read the following extracts from the *Indian Railways Act, No. IX of 1890*,
in regard to Accidents :—

Report of railway accidents.

(a) *Indian Penal Code, Act XLV of 1860, Section 320.*—The following kinds of hurt only are designated as "grievous":—

- First.*—Emasculation.
- Secondly.*—Permanent privation of the sight of either eye.
- Thirdly.*—Permanent privation of the hearing of either ear.
- Fourthly.*—Privation of any member or joint.
- Fifthly.*—Destruction or permanent impairing of the powers of any member or joint.
- Sixthly.*—Permanent disfigurement of the head or face.
- Seventhly.*—Fracture or dislocation of a bone or tooth.
- Eighthly.*—Any hurt which endangers life, or which causes the sufferer to be, during the space of twenty days, in severe bodily pain, or unable to follow his ordinary pursuits.

the railway administration working the railway and, if the accident happens to a train belonging to any other railway administration, the other railway administration also shall, without unnecessary delay, send notice of the accident to the Local Government and to the Inspector appointed for the railway; and the Station Master nearest to the place at which the accident occurred or, where there is no Station Master, the railway servant in charge of the section of the railway on which the accident occurred shall, without unnecessary delay, give notice of the accident to the Magistrate of the district in which the accident occurred, and to the officer in charge of the police-station within the local limits of which it occurred, or to such other Magistrate and police-officer as the Governor General in Council appoints in this behalf.

Section 84.—The Governor General in Council may make rules, consistent with this Act and any other enactment for the time being in force, for all or any of the following purposes, namely :—

- (a) for prescribing the forms of the notices mentioned in the last foregoing section, and the particulars of the accident which those notices are to contain;
- (b) for prescribing the class of accidents of which notice is to be sent by telegraph immediately after the accident has occurred;
- (c) for prescribing the duties of railway servants, Police Officers, Inspectors and Magistrates on the occurrence of an accident.

Section 85.—Every railway administration shall send to the Governor General in Council a return of accidents occurring upon its railway, whether attended with personal injury or not, in such form and manner and at such intervals of time as the Governor General in Council directs.

Section 103.—If a Station Master or a railway servant in charge of a section of a railway omits to give such notice of an accident as is required by section 83 and the rules for the time being in force under section 84, he shall be punished with fine which may extend to fifty rupees.

Resolution.—In accordance with the above sections of the *Indian Railways Act, No. IX of 1890*, the following rules are hereby laid down for reporting and investigating railway accidents.

RULES FOR REPORTING AND INVESTIGATING RAILWAY ACCIDENTS.

Duties of the Railway Administration.

1. Every railway servant is required to report to the nearest Station Master, with as little delay as possible, any accident on the railway which may come to his notice.

2. The Station Master will obtain from the railway servant making the report answers to so many of the questions given in Form No. 1 (*vide* Appendix A) as may be necessary with regard to the accident reported. The answers given must be as short and concise as possible, and the form, after being jointly signed by both the Station Master and the railway servant making the report, will be carefully filed for future reference.

3. The Station Master, after recording the particulars of the accident in Form No. 1, will immediately advise the persons mentioned in Appendix B by telegraph according to the clause under which the accident may come. In order to reduce the length of the telegraphic advices, which are to be sent to the officers named in the different clauses of Appendix B, the Station Master will address such messages as follows. A telegraphic message from, say Adamwahan, advising an accident under Class A should be worded:—

From

A. D. W. (Adamwahan.)
S. M. (Station Master.)

To

L. H. R. (Lahore.)
[And any other station that may be required.]

Acct. Class A.—[Then enter particulars as ordered in Appendix B for an accident falling under Class A.]

Class A [or other letter] will denote clause of Appendix B of these Rules: and "Acct." will be the code signal for "All concerned—Accident rules, Appendix B," *i.e.*, for the officials who are to have a copy of the message sent to them under the special clause of that paragraph to which letter "A" refers.

N.B.—The presence of a superior officer at a station does not relieve the Station Master of his individual responsibility under this order. Guards, Permanent-way Inspectors, and Drivers should not, as a rule, telegraph to "All concerned," but they may send separate or joint messages to their own departmental officers if they consider it necessary to do so.

4. In cases of emergency when assistance is urgently required, the Station Master may telegraph short particulars to "all concerned" before completion of the joint report with the remark, "details to follow;" but so soon as the report is completed, further information must at once be telegraphed.

5. Signallers receiving accident messages are to immediately inform the Station Master on duty, although the message may not be addressed to him, so that every preparation may be made for rendering all the assistance which is required.

6. After despatching the telegrams required in paragraph 3, the Station Master will send by the first opportunity a written copy of the report on Form No. 1 (*vide* Appendix A) to the District Traffic Superintendent for information. In the case of all accidents coming under Class A, a copy of this written report will also be sent by the Station Master to the nearest Magistrate, and in Classes A and C to the senior policeman present at the station, as also to the Inspector or Deputy Inspector of Police of the District. A copy of the report on Form 1 must also be sent to the senior policeman present at the station in cases under all other classes of accident where any malicious attempt to cause damage or other breach of the Criminal law is apparent.

7. The railway servant who reports an accident to a Station Master must also, without delay, submit a written report in Form No. 1 (*vide* Appendix A), to the officer under whom he is directly serving, who will take such action departmentally, and will furnish such advice to the Head of his Department as he may consider necessary.

8. These written reports, referred to in paragraphs 6 and 7, should not be mere copies of the entries of the original report filed in the Station Master's office, but should give the fullest particulars known regarding the accident at the time the written report is despatched.

9. On receipt of the Station Master's written report, the District Traffic Superintendent will, in all serious cases coming under Class A, send a copy of the Station Master's report by the earliest possible opportunity to the Traffic Superintendent (or Traffic Manager) and to the Agent (or Manager). He will then in all necessary cases convene a Committee to hold a departmental investigation into the accident. The constitution of this committee will, to a great extent, depend on the nature of the accident; for trivial accidents, the Traffic Inspector, the Platelayer, and the Locomotive Foreman of the length on which the accident occurred will suffice. For more serious accidents, the District Traffic Superintendent, the Executive Engineer, and the District Locomotive Superintendent will form the committee; it being desirable in all possible cases that the three executive departments should be represented. Notice should in every instance be given to the Police Officer of the date of the investigation in order that he may, if necessary, arrange to attend it himself or to depute some subordinate to represent him. In more serious cases the Agent (or Manager) or some special officer deputed by him may himself conduct the investigation. Failing any telegraphic instructions from the Agent (or Manager), the District Traffic Superintendent will arrange for the meeting of the committee at the earliest possible moment.

10. In the absence of the Agent (or Manager), the senior railway officer present will act as President, and he will record the evidence, which, in the case of a witness who understands English, shall be signed by such witness. In other cases, it will be certified at foot by the President that the evidence has been explained to the witness, and acknowledged by him as correct.

11. The finding, if unanimous, will be signed by the President and Members; in other cases a separate opinion may be signed by any member or members, and attached to the proceedings.

12. The President will send the proceedings through the Traffic Superintendent (or Traffic Manager) to the Agent (or Manager), who will issue orders thereon. District officers may take such copies or notes of the proceedings as are temporarily required for their own purposes, and for submission to the Heads of their Departments.

13. The steam-boat ferry service (if any) is to be considered to form a portion of the railway, and the preceding rules, where they apply, are to be observed in all cases of accident thereon; but accidents in workshops, or accidents unconnected with the working of the railway, will be reported by the department concerned in Form No. 1 without passing through Traffic Manager (or Traffic Superintendent).

14. Joint enquiries must invariably be held in every case of fatal accident, Class A (i) (ii) and (iii) (*vide* Appendix B), and in every case when the accident would under these rules require to be reported to the Director General of Railways, *vide* paragraph 15.

15. The Agent (or Manager) on receipt of the telegram from the Station Master (*vide* paragraph 3) will in all cases coming under section 83 of the Indian Railways Act, 1890, send the usual advice by wire direct to the Government Inspector, the Director General of Railways, and the Secretary to the Local Government in the Judicial Department. The Local Government in this case is to be the Local Government of the District in which the accident occurs and not necessarily the Local Government which controls the line on which the accident occurs. The Agent (or Manager) will also issue necessary instructions to ensure the report in Form 1 being sent by the Station Master direct to the Magistrate of the District, if in his opinion the accident falls under Section 83 (d) of the Indian Railways Act, 1890, and has not been reported by the Station Master, in the first instance, under Class A. On receipt of the written report, and of the proceedings of the Committee of the Inquiry, the Agent (or Manager) will, in the case of any accident falling under Class A (i), (ii) and (iii), communicate the result of the enquiries to the Magistrate, and on the conclusion of the proceedings will, if necessary, submit the final report to the Government Inspector and to the Local Government.

16. As regards the rules for the guidance of the Railway Police enjoining that the police are to take cognizance of breaches of Railway rules and regulations, when a charge is made and duly signed by a responsible officer, such as a Station Master, or his Assistant in charge, it is to be distinctly understood that before handing over to the police for safe custody a railway employé alleged to have committed a breach of Railway regulations bringing him within the provisions of the Indian Railways Act, 1890, the Station Master, or other responsible officer, should, in all possible cases, obtain the approval by wire, or otherwise, of the Head of the Department concerned.

Duties of the Railway or District Police.

17. In accordance with regulations, the Government Railway Police, or in the event of there being no Government Railway Police, the District Police will make an investigation in all cases when a railway accident causes death, or grievous hurt; or in all cases when the action has, *prima facie*, been caused by a criminal act.

18. In case of very serious accidents, the Assistant Inspector General of the Government Railway Police, if any, or the District Superintendent of Police where there is no Government Railway Police, shall proceed without delay to the scene of the accident. If either officer be himself unable so to proceed, he shall depute an officer who in the case of the District Police, shall be an Assistant Superintendent of Police, if there be one, or where there is no such officer, an Inspector of Police. If in such cases the Police Officer is unable to proceed to the accident, he shall at once inform his Departmental Superior and the nearest Magistrate in the District.

19. On the police deciding that the accident is one that must be investigated, the Police Officer concerned will at once advise the Agent (or Manager) and the District Traffic Superintendent by wire of the date and hour of the proposed enquiry, so that if possible, the police enquiry and the departmental enquiry prescribed under paragraph 9 may be held jointly. As the police enquiry must be held forthwith, the District Traffic Superintendent will be held responsible for giving the very earliest advice to all the officers concerned, so that all three Executive Departments may, if possible, be represented at the joint enquiry. The presence of a railway officer should, if possible, be secured in all cases when the police investigation is not held at the same time as the joint enquiry; but the absence of such an officer cannot be allowed to stop the police enquiry, which, as stated above, should be held as soon as possible after the serious accident has taken place.

20. The result of the police enquiry should at once be reported to the Magistrate and to the Agent (or Manager) of the Railway.

21. If the enquiry be held by the Government Railway Police, immediate information shall be given to the District Police, either direct or through the Magistrate of the District. Should the assistance of the District Police be called for, the District Police shall afford all necessary assistance, and shall, if occasion arise, carry the investigation beyond the limits of the Railway premises. But the Assistant Inspector General of the Government Railway Police is primarily entrusted with the duty of enquiry within such limits. Subject to any provisions elsewhere contained in these rules, the further prosecution of the case, on the conclusion of the police enquiry, shall rest with the Government Railway Police.

Duties of the Civil Officers.

22. It shall be in the discretion of the Magistrate of the District or of the Sub-divisional Magistrate, on receiving information of the occurrence of a serious Railway accident coming within the meaning of sub-section (a) of section 83 of the Indian Railways Act, 1890, either—

- (a) himself to proceed to the scene of the accident, and make enquiry,
- (b) to depute a Subordinate Magistrate to make enquiry; or
- (c) to direct investigation to be made by the Government Railway or District Police, as the case may be.

23. On deciding that a Magisterial enquiry is to be held, the Magistrate of the District or the Sub-divisional Magistrate, as the case may be, shall at once advise by telegraph the Agent (or Manager,) the District Traffic Superintendent and the Government Inspector of the date and hour of the proposed Magisterial enquiry, so that the Railway Administration may be able to summon the requisite expert evidence. The Superintendent of Police on receiving an order under head (c) will proceed as previously directed in paragraph 19.

24. Should a Magisterial enquiry be held, it will, as a rule, supersede the Railway Departmental enquiry prescribed under paragraph 9 and also the police enquiry under paragraph 17 if such enquiries have not already been held.

25. The Agent (or Manager,) and the District Traffic Superintendent on receiving telegraphic advice from the Civil Officer that a Magisterial enquiry is to be held, will arrange for all railway officers being present at the enquiry whose evidence they think will be required.

26. The Magistrate or other officer shall summon any railway servant, and all other persons whose presence he may think necessary; and in cases where technical points are concerned, the Magistrate should be careful to call for and take the evidence of the officers of the Railway or other professional persons. In summoning the railway servants, he will take care not to summon so many of the employés, especially of one class, on the same day, as to cause inconvenience to the working of the railway.

27. If, in course of the enquiry, the Magistrate wishes for the assistance of the Government Inspector or of the Agent (or Manager) of the railway, or for the attendance of any officer of the railway, to explain or give evidence upon any matter relating to railway supervision, management or working, he will issue a requisition to such officers to attend the Court. In very serious accidents, it will be generally advisable for the Magistrate to receive either the evidence of, or report from, both the Government Inspector and the Agent (or Manager) in regard to the accident, before finally concluding his enquiry. Should a Railway Departmental enquiry have been held before the Magisterial enquiry, a copy of the evidence taken before the officers who conducted the Railway Departmental enquiry, and of their report should be furnished to the Magistrate.

28. On the conclusion of the enquiry, the Magistrate will decide whether any *prima facie* evidence exists for the prosecution of any of the railway servants under the Indian Railways Act, 1890; and if so, will arrange for their prosecution.

29. A copy of the decision arrived at by the Magistrate at the conclusion of the enquiry should be forwarded to the Agent (or Manager) of the Railway, and if considered necessary, to the Local Government.

30. Magistrates through whose jurisdiction a railway passes, shall maintain a list of railway officers (such list to be furnished by the Railway Administration) to whom summonses may be sent for service on subordinate railway servants, and the Local Government shall furnish the Agent (or Manager) with a list of Magistrates or other officers to whom reports of accidents should be made.

Duties of the Government Inspector.

31. On receiving notice of an accident serious enough in his opinion to warrant enquiry being held, or in any case on requisition from the Magistrate conducting the enquiry under paragraph 26, the Government Inspector shall proceed himself or by Deputy to the scene of the accident, to note the facts and to enquire generally into the causes that led to the accident. In such cases, he will, if practicable, be present at the joint enquiry held by the railway officers and the police under paragraphs 9 and 19, or at the Magisterial enquiry held under paragraph 22, the object being that as far as possible only one enquiry should be held for one accident. And when present at such inquiries, the Government Inspector should be allowed, either directly, or through the Magistrate, to put any questions to the witnesses that he thinks would elucidate the facts under enquiry.

32. The Government Inspector shall assist the Magistrate in his enquiry as far as he can in person or by deputy, whenever called upon to do so.

33. He shall submit his report, to the Director General of Railways, forwarding a copy to the Agent (or Manager) of the Railway concerned, and also, in the event of a Magisterial enquiry being held, to the Magistrate who conducts the enquiry.

34. In all serious accidents, the reports of the Government Inspector should be submitted in the form adopted by the Inspecting Officers of the Board of Trade, in order to admit of their reproduction in a uniform shape in the publication of the quarterly accident returns. Such reports should contain—

- (1) A brief description of the accident.
- (2) A description of the locality of the accident.
- (3) A detailed statement of the evidence taken.
- (4) The conclusion arrived at by the Inspecting Officer.
- (5) An appendix stating the damage done.
- (6) A sketch illustrative of the accident. (Where necessary.)

Duties of the Civil Surgeon.

35. The Civil Surgeon of the District, the Police Surgeon in a Presidency town or any District Medical Officer, at the requisition of either the Agent (or Manager) of the Railway or of the Magistrate of the District, or of the Assistant Inspector General of the Government Railway Police or the Superintendent of the District Police, as the case may be, shall proceed to the scene of any railway accident attended with serious personal injury, for the purpose of rendering medical aid, or of rendering, at the enquiry, any professional evidence that may be required, and it shall be the duty of such Civil or Police Surgeon or District Medical Officer to proceed accordingly.

Accident Returns.

36. With reference to section 85 of the Indian Railways Act, 1890, quarterly returns of all Railway accidents in the form shown in Appendix C shall be submitted to the Government of India not later than three weeks after the close of the quarter to which they refer, together with all necessary remarks and explanations by the officials of the railways concerned, and by the controlling authorities by whom the returns are forwarded.

37. With a view to secure uniformity in the system of reporting accidents, attention should be paid to the following rules regarding the nature and classes of accidents that should be exhibited in the returns, and regarding the classes of railway servants to be included therein.

The nature and classes of accidents to be exhibited are—

- I.—All cases of cattle run over without exception.
- II.—All cases of injury to the way, stock or works, whether attended or not by injury to life or limb.
- III.—All accidents of any kind likely to have endangered life or limb or to have caused serious loss of property. Such for example as cases of trains running over chairs placed on the line, or of fires in trains, not resulting in injury to the way, stock or works, &c.
- IV.—All cases of injury to life or limb from causes connected with the working of railways.
- V.—All cases of dead bodies being found on a railway.

VI.—All deaths of passengers, or intending passengers, in stations or trains from causes unconnected with the working of railways.

VII.—In case of fire attributed to sparks from the engine, it should be recorded whether the engine is fitted with a spark-arrester, and, if so, the pattern should be stated, as also the description of the fuel used. In cases in which there is reason to suppose that the sparks escaped from the ashpan, it should be stated what, if any, precaution has been taken to check the escape of sparks therefrom.

VIII.—In cases of running over cattle, it should be invariably stated whether the engine is fitted with a cow-catcher; and, if so, the pattern should be specified.

The classes of Railway servants to be included are—

IX.—All persons employed in stations, including police.

X.—All persons employed in the maintenance of Way and Works, exclusive of men entertained for special works, that is, for railway works involving no risk from the working of trains e.g., spurs in a river on which railway work-people are employed.

XI.—All persons employed on trains or running engines, also all gate-keepers.

38. In reporting accidents under class I, the condition of the fencing should be reported.

39. Accidents coming under class VI should not be embodied in the general returns, but reported in a separate list in the form adopted in the returns now circulated (Part V).

40. As regards classes II and III, it is not intended that accidents of a trivial nature, such as petty accidents in shunting, &c., shall be included in the quarterly returns. All should be, however, recorded in the office of the Agent (or Manager) of the railway concerned, to whom it is left to decide what may be omitted from the returns as trivial.

41. Accidents not coming under any of the classified heads in Parts I, II and III of the returns now circulated, but of such a kind as to have caused, or to be likely to cause, loss of life or personal injury, should be entered in Part IV.

42. Accidents connected with the bursting of boilers should be shown separately from those connected with the bursting of tubes. A detailed account of each recorded case of the bursting of a boiler should invariably be given in the general statement appended to Part I.

43. The specimen entries in this and other parts explain sufficiently the nature of the accidents which should be included therein.

44. In preparing the Returns of Accidents the orders laid down in Public Works Department Circular No. XIX Railway, dated the 18th September 1890, should be carefully adhered to.

Appendix A.

FORM NO. 1.

Railway—Accident Report.

N. B.—The questions in this report entered in *italics*, are those to some of which answers will probably be required to be given by the railway servant making the report to the Station Master, see circular for reporting accidents, para. 2. The questions entered in Roman are those to which answers may be given in the subsequent written report, vide paras. 10 and 11 of same circular.

1. *Station or mileage at which accident occurred.*
2. *Time and date of accident.*
3. *No. and description of train.*
4. *Nature of accident.*
5. *Cause of accident.*
6. *Persons injured, nature and extent of their injuries.*—The result of medical examination; caste, sex, age, occupation, &c., to be given.
7. *Individual numbers of vehicles damaged, extent of damage; position of vehicle or vehicles in relation to engine.*—How disabled vehicles were disposed of.
8. *Damage to Permanent-way.*
9. *Particulars of damage to property in train, or within station limits.*—Rough estimate of cost of damage.
10. *Speed of train.*
11. *Probable (actual) detention to train to which accident occurred, and to other trains.*
12. *Assistance required if any.*
13. *If necessary to transfer goods or mails, state number and description of vehicles required.*
14. IN CASE OF OBSTRUCTION ON LINE, CATTLE RUN OVER, &c.—
 (a) *What was cause of obstruction?* (b) *Did it appear wilful or accidental?*
 (c) *Is any one suspected?* (d) *Was the line fenced?* (e) *If so, the state of the fencing?* (f) *Was the engine fitted with a cow-catcher?* (g) *Has obstruction been removed?*
15. IN CASE OF TRAINS PARTING, BROKEN TYRES, WHEELS, AXLES, HOT AXLES, FIRES IN TRAINS—
 (a) *How far was vehicle from engine?* (b) *How many vehicles on the train?* (c) *Was engine fitted with a spark-arrester?* (d) *What class of fuel was being used?*
16. IN CASE OF DEATHS IN TRAINS—
 (a) *Give description of deceased, caste, name, age, sex; whether railway servant, passenger, or trespasser. Cause of death* (b) *If passenger. No. and class of ticket.* (c) *Number of persons in same compartment.*
 (d) *List of property belonging to deceased, and how disposed of, residence, employment or vocation.*
 (e) *State what has been done with body; whether made over to the police, buried, or sent to Civil Surgeon.*
17. IN CASE OF DEAD BODIES OF INJURED PERSONS DISCOVERED ON LINE OR WITHIN STATION LIMITS—
 (a) *State in what position body was lying, and give details of any apparent injury to the body or other circumstances which may have caused death or injury.*
18. IN CASE OF DERAILMENTS, TRAINS PUT ON A WRONG LINE, COLLISIONS, &c.—
 (a) *State whether points and signals were properly fastened or set in the right direction, if line clears were duly observed, and signals respected, also whether lights were visible, flags properly exhibited, &c.*
19. IN CASES OF VEHICLES BLOWN AWAY FROM STATIONS—
 (a) *State how the vehicles were fastened and how they broke adrift.*
20. *How long was road blocked and to what extent?*
21. *Measures taken to re-establish traffic.*
22. *Time assistance sent for, and time arrived.*
23. *Station arrived from.*
24. *Cause of delay, if any, in getting assistance.*
25. *Measures taken in regard to persons to whom accident is supposed to be due. Give their names, staff numbers and designations.*
26. *What became of injured persons?*
27. *Site of accident, mileage if on straight or curved grade, whether with or against train.*
28. *Sketch showing lines at site of accident, and position of vehicles.*
29. *Remarks.*

Question No.

Below write replies to as many of the above questions as may be required.

Station Master.

Copy forwarded to the (a) _____ for information in continuation of telegram sent _____. The (b) matter has been duly reported to the Manager, to the Heads of Departments of the railway, and to the railway Police, who will take all necessary steps for instituting the usual departmental enquiries, upon completion of which a further detailed report will be sent you by the Manager.

(a).

(a) To be sent to District Traffic Superintendent, and signed by Station Master, see para. 10 of rules for reporting accidents and in class A cases, to the Magistrate of District ditto.
 and to the Senior Policeman at the station ditto.
 or to the District Officer of his department signed by any railway employé, reporting a railway accident, see para. 10 of rules for reporting accidents.

(b) This sentence may be struck out except in reports of class A accidents sent by Station Masters to the District Magistrate.

Appendix B.

Telegraphic Reports of Accidents.

CLASS A.—ACCIDENTS RESULTING IN LOSS OF LIFE, OR GRIEVOUS HURT TO PERSON, OR IN SERIOUS INJURY TO PROPERTY.

- (i) Persons killed or injured from any cause whatever when either travelling by train or intending to do so, whether passengers or railway servants.
- (ii) Servants of the railway or of contractors killed or injured from any cause whatever while working or walking within railway limits. [Slight abrasions or bruises which are incidental to a man's ordinary duties need not be reported.]
- (iii) Trespassers or others within railway limits killed or injured from any cause whatever.
- (iv) Collisions between trains one of which is a train carrying passengers.
- (v) Derailment (of any train carrying passengers or of any part of such train.)
- (vi) Collisions between engines, trains, vehicles, or trollies not coming under heads (i), (ii), (iii) or (iv), but resulting in serious injury to property, road, or stock.
- (vii) Serious damage to railway stock or to public or private property.

On the occurrence of an accident under any of the above heads, the following persons are to be advised by telegraph:—

- | | | |
|--|---|---|
| Agent (or Manager). | (a) District Traffic Superintendent. | } Of district on which the accident occurs. |
| (a) Traffic Manager (or Traffic Superintendent). | (a) District Locomotive Superintendent. | |
| (a) Locomotive Superintendent. | (a) District Engineer. | } Of length on which the accident occurs. |
| (a) Chief Engineer (or Superintendent of Way and Works). | (a) Traffic Inspector. | |
| (a) Superintendent of Police. | (a) Platelayer. | |
| | (a) Locomotive Foreman. | |
| | (a) Carriage and Wagon Examiner. | |
- (a) or such officers as may be prescribed by the Railway Administration concerned.

These accidents must also be reported to the Magistrate of the district in which the accident occurs, and when the accident comes under heads (i), (ii) or (iii), to the nearest railway Medical Officer. In serious cases of loss of life to passengers, where a local Medical Officer is nearer than any railway Medical Officer, he should be communicated with.

The following information is to be given when reporting by telegraph an accident under Class A.

- Mileage at which the accident occurred.
- Time, and date, of accident, and number of train.
- Nature of accident.
- Cause of accident as far as known.
- Probable detention to traffic.
- Assistance required.

CLASS B.—Running into or over cattle,* level-crossing gates, or obstructions of any kind, not causing an accident under Class A.

On the occurrence of an accident under the above head, if loss of life occurs, or grievous hurt to person, or if damage is done to the line or rolling-stock, the accident would come under Class A; but if no damage is done, the following officers alone should be advised by telegraph:—

- | | | |
|--|---|---|
| (a) Traffic Manager (or Traffic Superintendent). | (a) District Traffic Superintendent. | } Of the district on which the accident occurs. |
| (a) Locomotive Superintendent. | (a) District Locomotive Superintendent. | |
| (a) Chief Engineer (or Superintendent of Way and Works). | (a) District Engineer. | |
| Superintendent of Police. | (a) Platelayer. | Of length on which the accident occurs. |
- (a) or such officers as may be prescribed by the Railway Administration concerned.

The following information is to be given when reporting by telegraph an accident under Class B.

- Mileage where the accident occurred.
- Date of accident and number of train.
- Whether the obstruction was removed or thrown off the line.
- Nature of the casualty.
- Whether the engine was fitted with a cow-catcher.
- Nature of the obstruction.
- And in the case of cattle being run over, if the line in the vicinity of the site of the accident was fenced, and the state of the fencing.

CLASS C.—(i) Passengers, intending passengers, railway servants, or others dying from natural or other causes in trains on the line, at stations, or within railway limits, excluding natural deaths in staff-quarters.

(ii) Dead bodies found on the line.

On the occurrence of a casualty of the above nature, the following officers should be advised by telegraph:—

- | | | |
|---|--|---|
| Agent (or Manager). | (a) Traffic Manager (or Traffic Superintendent). | } Of district on which accident occurs. |
| (a) Locomotive Superintendent. | (a) Chief Engineer (or Superintendent of Way and Works). | |
| (a) Superintendent of Police. | (a) District Traffic Superintendent. | } Of length on which accident occurs. |
| (a) District Locomotive Superintendent. | (a) Carriage Examiner. | |

Nearest Surgeon or Assistant Surgeon attached to the Railway.

(a) or such officers as may be prescribed by the Railway Administration concerned.

* N.B.—The term cattle does not include sheep, goats, pigs, dogs, vultures, alligators, &c.

The following information is to be given when reporting by telegraph an accident under Class C.

Mileage, if known, at which death occurred, time, date, and number of train.

Cause of death, if known.

- CLASS D.—(i) Vehicles blown away from stations.
 (ii) Trains put on a wrong line.
 (iii) Averted collisions.
 (iv) Derailments within, or outside, station limits not coming under Class A (v).
 (v) Trains parting.
 (vi) Fires in trains or in railway limits.
 (vii) Damage to telegraph, and telegraph failures.
 (viii) Damage to the line of such a nature as to render it unsafe for the passage of trains, or to probably cause delay to trains.
 (ix) Any other unusual occurrence affecting, or likely to affect, the safety of persons, or causing, or likely to cause, serious delay to traffic or mails or damage to the line, works or railway stock.

On the occurrence of an accident under any of the above heads, the following officers should be advised by telegraph :—

- Agent (or Manager).
 (a) Traffic Manager (or Traffic Superintendent.)
 (a) Locomotive Superintendent.
 (a) Chief Engineer or (Superintendent of Way and Works)
 (a) Superintendent of Police.
 (a) or such officers as may be prescribed by the Railway Administration concerned.
- (a) District Traffic Superintendent.
 (a) District Locomotive Superintendent.
 (a) District Engineer.
 (a) Traffic Inspector.
 (a) Locomotive Foreman.
 (a) Platelayer.
 (a) Carriage Examiner.
- Of district on which accident occurs.
 Of length on which accident occurs.

The following information is to be given when reporting by telegraph an accident under Class D.

- Mileage where the accident occurred, time, date, and number of train.
 Nature of accident.
 Cause of accident.
 Whether or not traffic can be worked through.
 Damage done.
 How long the line is likely to be blocked.
 Assistance required.

CLASS E.—Engine failures which do not cause an accident coming under any of the preceding classes of this paragraph.

- Should be reported by telegraph to :—
- Agent (or Manager).
 (a) Traffic Manager (or Traffic Superintendent.)
 (a) Locomotive Superintendent.
 (a) or such officers as may be prescribed by the Railway Administration concerned.
- (a) District Traffic Superintendent.
 (a) District Locomotive Superintendent.
 (a) Locomotive Foreman.
 (a) Traffic Inspector.
- Of district on which accident occurs.
 Of length in which accident occurs.

The following information is to be given when reporting by telegraph an accident under Class E.

- Mileage, time, date, and number of train.
 The nature of the accident.
 The cause which produced it.
 Whether or not assistance required.

Appendix C.

PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c., on the _____ Railway during the—quarter of 18 _____, with the number of persons killed or injured thereby.

KEY.

This table distinguishes the different classes of accidents included in this Part, and is referred to by the figures in column

	NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL ALL CLASSES.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
1. Collisions between passenger trains, or parts of passenger trains						
2. Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line ...						
3. Collisions between goods trains, or parts of goods trains						
4. Collisions between light engines, ...						
5. Passenger trains, or parts of passenger trains leaving the rails...						
6. Goods trains, or parts of goods trains, engines, &c., leaving the rails ...						
7. Trains or engines travelling in the wrong direction through points ...						
8. Trains running into stations or sidings at too high a speed ...						
9. Trains running over cattle on the line ...						
10. Trains running over obstructions on the line ...						
11. Trains running through gates at level-crossings ...						
12. The bursting of boilers of engines ...						
12A. The bursting of tubes of engines ...						
13. The failure of machinery, springs, &c., of engines...						
14. The failure of tyres ...						
15. Ditto of wheels ...						
16. Ditto of axles ...						
17. Ditto of brake apparatus ...						
18. Ditto of couplings ...						
19. Ditto of tunnels, bridges, viaducts, or culverts ...						
20. Broken rails ...						
21. The flooding of portions of permanent-way ...						
22. Slips in cuttings or embankments ...						
23. Fire in trains ...						
24. Fire at stations, or involving injury to bridges or viaducts ...						
25. Other accidents...						
Total all Railways						

PART I.

RETURN OF ACCIDENTS TO TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

ACCIDENTS TO TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

	18.	EAST INDIAN—										
	October 26th ...	A goods train parted inside the up distant signal at Baidyabati, actual cause unknown; the front portion was taken on to Bhadreswar in spite of signals shewn by the staff. The parties in fault were punished.	18	...	...	...	...	...	...	...	...	...
	" 27th ...	A Pilot engine was derailed at Cawnpore causing several detentions to the Up Mail and other trains.	6	...	...	...	...	...	...	...	...	...
		Total	...									
N.B.—Only such accidents, included in the Return, attended with injury to life or limb, should be coming under these heads in this column.												

N.B.—Only such accidents, included in the Returns of "Failure of tyres," "Failure of axles," "Failure of wheels," attended with injury to life or limb, should be entered in this Return; but care should be taken to show the total number of coming under these heads in the columns provided for them in Table 1.

* In classifying the accidents in this column the word "Causes" should be put above the number in order to show which were reported to the Local Government under section 83 of the Indian Railways Act No. IX of 1900.

PART I.

RETURN OF ACCIDENTS TO TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued.)

Return of the FAILURES of TYRES, reported by the _____ RAILWAY during the _____ quarter of 18 ____.

Date of failure.	Name of Railway, with nature and cause of failure.	FAILURES OF TYRES.
18	Rajputana-Malwa. An engine of Dübs and Co's. make attached to a local train failed at mile 150 between Bhankori and Dausa owing to the tyre of the right hand centre wheel of the tender working off.	
May 11th ...	East Indian. The right hand middle tender wheel tyre of the engine working the up mail broke into pieces near Shikoad. Cause unknown.	
December 19th ...	Southern Maratha. Engine of No. 113 up mixed train failed within Badami Station yard owing to the tyre of the left hand tender wheel having come off.	

4
PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

Return of the FAILURES of AXLES, reported by the _____ RAILWAY during the _____ quarter of 18 _____.

FAILURES OF AXLES.	Date of failure.	Name of Railway, with nature and cause of failure.
18		Rajputana-Malwa.
December 27th ...		While shunting at Bandikui the axle of a covered goods wagon broke owing to a flaw in the metal.
January 2nd ...		The left hand trailing journal of a goods wagon broke between Sendra and Beawar owing to a previous fracture.
July 1st ...		Whilst a local mixed train was running near Umardehi the driving axle of the engine broke, owing to a flaw in the metal. The engine was of Dübs and Co's. make and was placed on the rails in 1884.

PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

Return of the FAILURES of WHEELS reported by the _____ RAILWAY during the _____ quarter of 18 _____.

Date of failure.	Name of Railway, with nature and cause of failure.	FAILURES OF WHEELS.
18		Morvi.
December 24th ...		A lower class carriage on an up passenger train was derailed between miles Nos. 58 and 57 owing to a wheel being loose on the axle. The carriage was thrown off the rails and the train proceeded. No damage was done to Rolling-Stock or Permanent-Way, nor was any one hurt.
		The Gaekwar's.
August 12th ...		The front wheel of a wagon attached to a goods train broke at mile 8 between Philapur and Kelanpur. The wagon was derailed.
		Darjeeling-Himalayan Railway.
August 27th ...		The flange of a wheel of a wagon attached to a goods train broke at mile 43½ and the wagon was derailed.

PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

Return of RAILS found FRACTURED in the permanent-way, reported by the _____ RAILWAY
the _____ quarter of 18 _____

BROKEN
RAILS.FAILURE
AXLE

Date when found fractured.	Name of Railway, with nature and cause of fracture.
18 December 1st	East Indian. As No. 14 Down Goods train was drawing into Dadri Station, a rail was found broken near the point where the train came to a stand and the rail was replaced.

PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(continued).

Return of cases reported during the _____ quarter of 18 _____ of trains running through level-crossing gates over cattle straying on _____ Railway, or other obstructions, but in which no personal injury was caused, nor any damage done to the trains or permanent-way.

Date of accident.	Name of Railway, with nature and cause of accident.	Running through level-crossing gates, over cattle and other obstructions.
18	East Indian.	
October 3rd	A bullock was run over and killed at mile 278 between Burhee and Mokameh by an up special goods train. The engine was not fitted with a cowcatcher, but the fencing was good.	
	Southern Maratha.	
" 20th	A mixed train ran through the level-crossing gate near Bellary Cantonment owing to the gateman not having opened it in time.	
	East Indian.	
" 30th	A passenger train ran over and killed a buffalo at mile 819½ between Ferozabad and Tundla. The engine was fitted with a cowcatcher and the fencing was good. The animal got on to the line through a level-crossing gate which had been left open.	

PART I.

RETURN of ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c.—(concluded).

Return of the damage done to the PERMANENT-WAY of the _____ Railway by FLOODS reported during the _____ quarter of 18 _____.

FLOODS.	Date of accident.	Name of Railway, with nature and cause of accident.
18		Southern Maratha.
October 18th	...	Owing to excessive rain a large gap was caused in the earthwork in the south end of the Yerla bridge between Ashta Road and Sangle.
		Rajputana-Malwa.
July 3rd	...	Owing to very heavy rain the whole of the line from mile 385 to 389½ between Ajanta and Ghaspura was under water and dangerously cut in many places.
		North-Western.
July 15th	...	The line between Nasik and Hurnai stations was partially breached and washed away. The traffic was interrupted for about 5 hours and the embankment was slightly damaged.

PART II.

RETURN of ACCIDENTS to PASSENGERS, Persons passing over LEVEL CROSSINGS, TRESPASSERS, and others on _____ Railway during the _____ quarter of 18 _____, exclusive of those killed or injured by accidents to trains, &c., reported in Part I.

KEY.

This table indicates the circumstances under which the accidents in this Part occurred, and is referred to by figures in the column

	PASSENGERS.	
	Killed.	Injured.
