GOVERNMENT PRESS, MADRAS,

11th September 1891.

R. HILL,

Superintendent.

Office Note from R. HILL, Esq., Superintendent, Government Press, to the Chief Secretary to Government, dated Madras, 11th September 1891, No. 2989.

The Superintendent submits, for the information of Government, detailed statements showing the approximate weight, quantity, and value of the plant of the Government Press and of the Penitentiary Branch up to the end of June 1891, as far as it could be ascertained without breaking up the formes.

2. In paragraph 2 of G.O., dated 7th July 1880, No. 1031, Government were pleased to direct that the stock-taking of the plant should be done once in five years, but the undersigned regrets that stock has not been taken since 1880, owing to the retirement of Mr. Keys early in 1886, the want of satisfactory help given by the late Deputy Superintendent in 1887, and the vacancies in the appointment of Deputy Superintendents in 1886 and 1888-89.

3. Stock-taking was commenced in August 1890, but owing to pressure of work and other causes it had to be suspended several times. Care has been taken to ensure a most thorough and complete statement of the value of plant, and the services of the Deputy Superintendent were utilised in valuing the plant of the Book department, where the greatest varieties of type are used and mixed together, and the Storekeeper has assisted throughout in weighing up, measuring off, and preparing the statements.

4. The value of the plant when last taken (in May 1880) amounted to Rupees 2,38,589-10-5. After deducting for depreciation, sale of old type, &c., the value of the whole, as it now stands on the books of the Press, amounts to Rs. 2,40,380-10-8, viz. :-

The value for the plant being Rs. 3,26,633-9-0, and for office furniture Rs. 8,266-2-0, total Rs. 3,34,899-11-0.

6. The great difference between the book valuation and the actual value at the present time is accounted for by the high rates of depreciation in force for many articles, and in consequence the annual value of the plant has been unduly depreciated. As an instance, one press has been in use for 37 years and is likely to last another 15 years, yet the presses are depreciated at 4 per cent., so that the value of each

press is written off in 25 years. A detailed list has been carefully prepared showing the percentage at which depreciation should be adopted in future, and sanction is solicited for its adoption. The depreciation rates in force are—types 12 per cent., rules, leads, &c., 10 per cent., machines 8 per cent., and presses 4 per cent.

7. There are 388,686 lb. of english types, 42,116 lb. of vernacular types, and 26,299 lb. of leads in use at the Government Press. At the Penitentiary Branch there are 6,513 lb. of english types and 7,405 lb. of vernacular types in use.

8. The following list shows the additions made to the plant since last stock taking:—

For orders whether  
the Supt's explanation in  
para: 2 may be accepted  
and whether the propo-  
sed rates of depreciation  
may be approved:

I think that it would be  
better to defer sanction until  
stock has been taken which  
ought to be done without delay  
11 years having been allowed  
to pass without it. These  
results will furnish better  
data than Mr. Hill's conjecture  
for fixing the rates of depreciation  
to be adopted.

W.S.

It is respectfully  
submitted that  
stock of plant has  
already been taken  
at the printed state-  
ments attached  
give the results.
