INDIA OFFICE,

London, 3rd September 1891.

Public (Emigration).
No. 95.

His Excellency The Most Honourable The Governor General of India in Council.

MY LORD MARQUIS,—In continuation of my despatch No. 57, dated 11th June last, I transmit for the information of your Excellency in Council copy of a despatch from Her Majesty's Consul at Paramaribo forwarding his Report for the year 1890 on the condition of Indian Immigrants in Cayenne.

I have the honour to be,

My Lord Marquis,

Your Lordship's most obedient, humble servant,

CROSS.

No. 34, dated Paramaribo, the 9th July 1891.

From—H. WYNDHAM, Esq., Her Majesty's Consul at Paramaribo,

To—THE MOST HONOURABLE THE MARQUIS OF SALISBURY, K.G.

Enclosed herewith, I beg to forward the Report on Immigration to French Guiana for the past year.

Report on Indian Immigration to French Guiana for the year ending December 31st, 1890,
by CONSUL W. WYNDHAM.

Dated Paramaribo, the 9th July 1891.

As previously reported, Cayenne possesses only one small plantation on which 52 indentured immigrants were working at the end of the year 1890, *i.e.*, 43 men and 9 women. There are no other estates, and no manufacturing industries employing any Indian immigrants under indenture. The mass of the immigrants are free labourers, who are either storekeepers, private servants, gold-diggers, fishermen, &c. The number in the colony on the 31st December 1889 was:—

	Males.	Females.	Total.
	1,731	862	2,593
Add births in 1890	6	12	18
	1,737	874	2,611
Deduct deaths in 1890	28	4	32
	1,709	870	2,579

It is perfectly impossible to make any report on their general treatment and prosperity as they are distributed all over the Colony, and the greater part of them are either working gold *placers* for themselves, in partnership or are engaged on very liberal wages by *placer*-owners; the profits of the gold washings being sufficient to enable the *placer*-owners paying such high wages that every one rushes off to the gold diggings deserting cultivation and domestic service for

the wages to be earned as a gold-digger. I doubt much that fifty immigrants can be found who desire to return to India and who are still entitled to free passage. Some might wish to go there for a trip to see the land of their ancestors, but it would only be to pay a visit, as the immigrants now remaining in Cayenne are all free, many very wealthy, a considerable number in easy circumstances and the remainder are to all intent and purposes identified with the colony by religious, educational, personal and family interests. I have taken steps to find out if any of the 52 indentured immigrants still desire to return to India and will report on the subject as soon as I have full information.

The death-rate of 32 in the year 1890, or only about 1.23 per cent. of immigrants shows that they are fully acclimatized and accustomed to their work. There is, besides the immigrants on the Cayenne registers, a large floating immigrant population of perhaps 4,000 or more who are free immigrants from British, Dutch and French colonies, persons who have given up all idea of returning to India, who have been induced to go to Cayenne by the success of gold-seekers there and the high rate of wages. Such immigrants have in their own colonies renounced their right to a return passage and are in Cayenne treated as free men in every respect, and are not registered as immigrants any longer.

The "Annamite" immigration of which I have made mention has not been carried further than the importation of the first ship load, who are, it is said, quiet and peaceable, but there is no agriculture to employ them on, and they do not appear to be quite trustworthy when employed as domestics. I think the colonists will not ask for another supply. Mr. Vice-Consul Waconque reports to me that he considers the "Annamite" immigration a failure, just as much as the "Kroo Coast" labour project for the importation of 20,000 men to Cayenne ended in the importation of some half hundred to that colony. The importation of Javanese labour to this colony has resulted in a very expensive experimental importation of nearly 100 Javanese, and with that batch I am inclined to believe Javanese immigration to Surinam will cease, as it began in a sentimental idea of Dutch immigrants for Dutch colonies doing away with the supervision of foreign agents.
