~~Government of India~~
Lyonsdy
11th March 1892

My dear Galton.

I return the "mortality" Telegram Papers. The Governor is much obliged for the trouble you have personally taken.

He would like Sir Symonds' remarks with enclosure, communicated to all District Medical and Sanitary officers of each district except Kinnaird and Bellary to know if they endorse his conclusions and to ask for their personal opinions as to the health of the people in their respective districts.

yours &c.
(sd) C. F. Macartney.

Average monthly mortality per mille for October.
The average monthly mortality for October.

er, November and December 1891, compared with
November and December for the 10 years ending 1890.

Districts.	Average monthly mortality for October, November & December 1891.	Average monthly mortality for October, November & December for 10 years ending 1890.	Increase or decrease in 1891.
1. Salem.	3.1	1.8	1.3
2. Chingleput.	4.3	2.2	2.1
3. Nellore.	1.9	1.3	.6
4. Anantapur.	1.6	1.8	.2
5. Buddapak.	2.5	1.9	.6
6. Coimbatore.	3.2	1.7	1.5
7. North Arcot.	2.9	1.8	1.1
8. South Arcot.	4.6	1.9	2.7

Remarks.

Very marked results for not common mortality. bowel chol increase of mortality. Increase mainly due to cholera which "fevers" is the same causes as produce famine. Considerable increase due to "fevers" is rather less than the normal rate. Increase mainly due to cholera and "all other" ailments which are associated with famine. Some increase due to figures connected with famine. people to increase of mortality. Increase due to cholera, fevers and "all other" causes. associated diminished mortality. This may be due to migration of the mortality for districts. to small increase of mortality. Mainly due to cholera which is nearly always Very marked with famine. complain nearly double the normal rate. Increase mainly due to cholera. "fevers" no longer is certainly associated with famine & probably latter also. mortality increase of mortality. Increase mainly due to cholera & bowel due to fevers which are associated with famine. Some increase due to increase of famine. considerably more than double the normal rate. Increase mainly due to bowel complaints generally associated with famine. Some increase probably not connected with famine.

AVERAGE monthly mortality per mille for October, November and December 1891 compared with the average monthly mortality for October, November and December for the 10 years ending 1890.

Districts.	Average monthly mortality for October, November and December 1891.	Average monthly mortality for October, November and December for 10 years ending 1890.	Increase in 1891.	Decrease in 1891.	Remarks.
1. Salem	3.1	1.8	1.3	..	Very marked increase of mortality. Increase mainly due to cholera which results from the same causes as produce famine. Considerable increase due to "fevers" not connected with famine.
2. Chingleput	4.3	2.2	2.1	..	Mortality nearly double the normal rate. Increase mainly due to cholera and bowel complaints which are associated with famine. Some increase due to "fevers" is not connected with famine.
3. Nellore	1.9	1.3	.6	..	Rather large increase of mortality. Increase due to cholera, fevers and "all other causes."
4. Anantapur	1.6	1.8	..	.2	Figures show diminished mortality. This may be due to migration of the people to other districts.
5. Cuddapah	2.5	1.9	.6	..	Rather large increase of mortality. Mainly due to cholera which is nearly always associated with famine.
6. Coimbatore'	3.2	1.7	1.5	..	Mortality nearly double the normal rate. Increase mainly due to cholera, partly to small-pox. Former is certainly associated with famine and probably latter also.
7. North Arcot	2.9	1.8	1.1	..	Very marked increase of mortality. Increase mainly due to cholera and bowel complaints which are associated with famine. Some increase due to "fevers" not due to famine.
8. South Arcot	4.6	1.9	2.7	..	Mortality considerably more than double the normal rate. Increase mainly due to cholera and bowel complaints generally associated with famine. Some increase due to fevers probably not connected with famine.
