FORM A.

No. 1261

GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 5th July 1892.

From

J. A. JONES, Esq., MEM. INST. C.E., F.R.S.E.,

SANITARY ENGINEER TO GOVERNMENT,

To

*The Chief Secretary to Government,
Public Department.*

SIR,

*With reference to G.O., dated 27th
June 1892, no 432 A, Public, I have the
honor to forward for the information
of Government five different designs
for latrines & one design for a private
house latrine. Copies of these have
been issued for information to the
various Municipal Councils from
time to time. The same type of latrine
does not find favor with all Muni-
cipalities, some preferring the pit
system drawings no 4 & 7 and others the
dry earth system drawing no 8.*

*2. I propose to issue a further
design, a modification of no 8 with a
roof*

roof.

3. A plan for an iron latrine similar to No 2 design could also be made.

4. With these designs it will be observed that not much privacy is secured though some give more than others. Improved (though more expensive) designs of this nature can be made if Government consider it desirable.

5. The numbers awaiting on the file are designs of an iron conservancy cart & for a slaughter house. I send copies of these drawings Nos 1 and 6 respectively.

6. As to the latrine designs it is not quite clear as to what Government now desire to be framed but if Government think that one type of latrine can be selected as suitable for the whole Presidency, designs of that type for the accommodation of varied numbers might be made out as work in my office permits but I see little chance of undertaking it at present.

7. It is probable however that Government may consider that with the addition of the two designs mentioned in paras 2 & 3 sufficient information has been given to shew the type of latrines

latrines the erection of which will hereafter be approved.

I have the honor to be,
Sir,

Your most obedient servant

Sanitary Engineer to Govt

W. H.

From the Sanitary Engineer to Govt: No. 1261 dated 5. vii. 92
Indorsement thereon by the Public Dept: No. 1219 dated 12. vii.

Note by Chief Engineer, P.W.D.

The Chief Engineer considers that it is hardly practicable to draw up Type Designs of Latrines which will be applicable to all the circumstances under which such structures have to be designed, and that it will be sufficient for the needs of the Department of Public Works, if designs nos 2, 4, 7 and 8 as prepared by the Sanitary Engineer, which show generally the arrangements considered suitable for both the pail and dry earth

system, be circulated
to officers of the Depart-
ment.

2. Modifications which
circumstances may require,
such as a combination
of both systems, the
substitution of corrugated
iron for brickwork, or
the provision of roofs,
can be dealt with in
Executive Engineer's offices.
150 copies of each of the
four designs mentioned
will be required.
