was supposed yesterday that this
would burst either into the lungs
or into the pericardium.

2. There was a Consultation yesterday
morning of Dr. Hyde, Dr. Maurice
Smith and Dr. Oliver, Consulting
physicians of the South Indian
Railway. Dr. Taler has been sum-
moned from Tanjore today. All
has been done that could be done
in engaging a nurse etc, and the
patient took nourishment well until
yesterday. I have been eager to have
him sent to the General Hospital,
Madras, ever since I knew the case
was dangerous but there never was
a time when it could be said —
"today he ^{can} ~~must~~ be sent" and now it
is too late.

3. The Head Quarter's Deputy Collector

SIR,

In Continuation of this
Office letter No. 85 dated 1st Instt.,
I have the honour to report that
Mr. W. E. Hall's case is now considered
hopeless. The cause of the continued
fever was liver complaint brought
on by the dysentery. On Saturday
and Sunday it was believed that
he might still pull through. Now I
believe there is an abscess in the
liver in the upper part adjoining
the lungs, which has deprived him
of the use of one lung entirely. It
