A A

is required for the storage of lamps and oil. To effect these changes it is proposed to build a new room for Stationery and stores, in the Square against the South block and a small room for lamps &c in the South east corner of the square. The present store room will then be used to carry out the above extensions.

(3) A new room is required at the South end of the Type store room. This addition will give increased accommodation for the Book and Job Departments.

(4) A new binding room is required to be built in the square adjoining the present binding and to be connected by a covered way with skylights, the present Verandah being removed. This room will enable one to put on an extra establishment when the large indents for blank forms and books are received from the Separate Revenue Department and to put through more quickly the District Gazette Supplements each month.

(5) A room double the size of the present room is required for the carpenter. It can be built against the North wall of the adjoining room.

The Superintendent submit that these buildings

are very necessary and if sanction is given for the Public Works Department to prepare plans and estimates a special indent will be submitted for the necessary printing materials and furniture required for them.

R. Hill

Superintendent

To

The Chief Secretary
to Government.

No. 571

Government Press,
Madras6th May, 1893.

Office Note.

The Superintendent, Government Press, submits that every available room in the press portion of the Mint Buildings is occupied, and that additional rooms are required to meet the progressive increase in work and to undertake new work when required. The following additions and alterations are required:-

(1) A new composing room is required to be built at the north end of the west block of buildings - from the main building to within a few feet of the godown and to be continued in an easterly direction to the covered way leading to the godown. The new buildings will enable me to put more men upon the Revenue Board's Proceedings and upon the old record index and increase the number of men upon the Local & Municipal proceedings.

(2) It is necessary that the present machine room be wholly devoted to machines, the galley composing room adjoining requires more space, and a new room
