After seeing the Hospital this morning, I quite agree with the hon. Mr. P. that plans & estimates should be drawn up for erecting two side blocks at the rear & at the corners of the existing central block - each 3 stories high - and also for constructing a 3rd story over the central block - for the extra accommodation required for the nurses and the female apothecary. The old bungalow is too high to be pulled about.

Order to the Hon. Mr. P.

Hon. Mr. P. C. S. S. 4.2

Committee

The new blocks which are chiefly required as additional rooms for the delivery of patients are proposed to be attached to the existing central, administration block as shown in the sketch above. I have therefore ventured slightly to alter the wording of the G.O. as taken from H.R.'s note -

Forwards the enclosed letters from the Superintendent Lying-in Hospital Madras regarding the increased accommodation in the Central Block & improved accommodation for the nurse pupils for the favorable consideration & orders of Government

Because no estimates had been sent up.

I spent some time in the Lying-in Hospital the other day & came to the conclusion that more accommodation for the nurses was certainly required. I don't see any present prospect of funds being available but I think it would be well to begin the preparation of plans & estimates, which the Const Architect could complete at his leisure ~~as soon~~ if he were now instructed as to the requirement of the case. If H.B. in the P.W.D. concurs with me, I should like to visit the Hospital again in company with the Const Architect & Dr. Bramfort & discuss the matter on the spot.

Submitted to the Hon. Member for orders.

It has been ascertained that no provision is being made in the P.W. budget for 94/95 for the additions to the Lying-in Hospital.

The scheme in connection with the removal of the N.C. Hospital seems to be as far off a settlement as ever.

If there is any probability of the P.W.D. being able to provide funds within a reasonable time it is submitted the plans and estimates asked for may be prepared.

THE Secretary to the Surgeon General

SIR,

I have the honor to regret that the Surgeon General will be good enough to sanction certain alterations & improvements & additions to the existing accommodation of the Madras Lying-in Hospital. Since the opening of the hospital, the increase in the number of patients which has taken place within the last two years, now makes it necessary to require more space & more accommodation provided for them has been very insufficient.

I believe that the necessary improvements
can be carried out without any
great expenditure and I shall be
glad if the Consulting Architect
to Government can be asked to

SIR,

In reference to your No. 4497 dated 20 July 1893, I have the honor to request that, if possible, the desirability of increased accommodation in the Central Block and improved accommodations for the Nurse pupils may be again brought before the Government.

Since the last reference was made, the hospital was visited by the Hon'ble Mr. Blean and the necessity for further accommodation in the directions asked for was, I believe, recognized by him. A suggestion was also made that it might be better to build a 3rd story on the Central Block, rather than build on the roof of the existing Nurses and Matron's Quarters. This suggestion is, I think, an excellent one, and I should be glad to know if it is one which commends itself to the Surgeon General.

3.

If so, I would ask that the Consulting Architect to Govt might be asked to reconsider the plans for the extension of the Central Block and for building further accommodation on the roof of the Nurses Quarters and to...

SIR,
With reference to your No. 5548 dated 8th Sept 93 Communicating the Proceeding of the Madras Govt Order No. 696 dated 29th August 1893, I have the honor to bring to your notice the great necessity that exists for improving the Quarters of the Resident Apothecary. The sleeping apartments are very badly ventilated and as suggested in this Office letter No. 410 dated 17 August 93, I would strongly recommend the erection of an upper story and the raising of the roofs of the present bed rooms. In regard to the Portico, as stated in this Office letter No. 299 dated 20th June 1901 it is required to protect the front of the house from the sun and from the full force of the N.E. monsoon to which it is now exposed and which is a great inconvenience to people living in the house.
