SEPTEMBER.

Civil Hospitals and Dispensaries.

Reviewing the report on the — of this presidency for the triennial period 1893—95.

GOVERNMENT OF MADRAS.
PUBLIC DEPARTMENT.

READ—the following papers:—

From the Surgeon-General, No. 298, dated 14th July 1896, and No. 422, dated 10th September 1896.

ORDER—No. 1010, Public, dated 14th September 1896.

The Surgeon-General submits the report on and statistics of the civil hospitals and dispensaries of the presidency, excluding the City of Madras, for the triennial period 1893—1895. The delay in the submission of this, which was due on the 25th June, was explained by the Surgeon-General in his letter, No. 227-Tour, of that date, to have been due to the preparation at about the same time of the triennial report on medical institutions in the presidency town as well as to the fact that a large amount of extra information was requisite in connection with what has now been placed before Government.

2. The report is considerably longer than its predecessor, and paragraph 2 contains much which is irrelevant and unnecessary. The attention of the Surgeon-General will be invited to the remarks in G.O., No. 850, Public, dated 11th August 1896.

3. The number of institutions brought within the purview of the report during the triennial period above referred to appears in the sub-joined table. The location and classification is indicated in the maps prefacing the report.

1893.	1894.	1895.
Number at work on the 31st December 1892 443	Number at work on the 31st December 1893 453	Number at work on the 31st December 1894 473
Newly opened .. 17 } " included .. nil } 10	Newly opened .. 19 } " included .. 9 } 20	Newly opened .. 11 } " included .. 11 } 13
Closed 7 }	Closed 8 }	Closed 9 }
Number at work on the 31st December 1893 453	Number at work on the 31st December 1894 473	Number at work on the 31st December 1895 486
Number per mille of population 013	Number per mille of population 014	Number per mille of population 014

The number shown as "closed" covers also those "excluded" from the report. The nine institutions "closed" in 1895 are now included in the report on medical institutions in the presidency town under G.O., No. 422, Public, dated 27th March 1896. In Statement I attached to the report, eleven institutions appear as "closed," but this number includes two which were merely transferred from one class to another. The references to the foot-notes at page 39 are apparently misplaced and the word "twelfth" in the first foot-note should be "eleventh." On that page it is stated that 473 institutions were at work on the 31st December 1894, but at page 10 the figure is given as 464. The nine which were transferred in 1895 were included in the figures for 1894, and should be so shown notwithstanding that for purposes of comparison the statistics referring to them are omitted. The figure "1,000,000" in the ninth line from the bottom of page 10 is a careless error for "100,000".

The Surgeon-General has explained that the ratios of institutions to population for 1895 given in paragraph 4 of the report and in Statement I attached to it do not agree, because the former are worked on the estimated population and the latter on the census figures of 1891. In the latter the ratio *per mille* in no less than ten districts is shown to have been 0.01, whereas the ratios *per 100,000* in the same districts which are given in paragraph 4 range from 2.31 in Madura to 0.91 in Ganjam. Then, again in Statement I, the ratio *per mille* for the whole presidency is shown as 0.014 for 1894 and 1895, although there were thirteen more institutions in the latter year. This would give a ratio for 1895 of 1.44 *per 100,000*, but in paragraph 4 it is shown as 1.34. The explanation of these differences should have been included in the report. With reference to the remark in paragraph 4 that the fall in the ratio of institutions to population in several districts was due to funds being required for roads and communications, it is observed that G.O., No. 1686 L., dated 14th September 1895, directing that a fixed proportion of the income of local boards should be allotted to "Communications" did not take effect until the beginning of 1896-97.

4. The subjoined statement exhibits the results of the working of the hospitals and dispensaries and the expenditure incurred on their upkeep during the years under review:—

Year.	Number treated.			Ratio per cent. of women to men.	Mortality among in-patients.	Accommodation.			Surgical Operations.			Diets.		Gross expenditure.
	In.	Out.	Total.			Number of beds available.	Average daily sick.	Percentage of beds occupied.	Major.	Minor.	Total.	Cost per patient <i>per diem</i> .	Total cost of diets.	
1893 ..	31,463	3,222,741	3,257,204	41.42	7.51	2,898	1,558	53.75	5,345	115,693	121,038	A. P. Rs. 2 2 79,067	8,18,881	
1894 ..	35,902	3,596,005	3,631,907	42.72	6.57	2,947	1,576	53.48	5,542	124,785	130,327	2 2 78,119	9,31,017	
1895 ..	38,422	3,800,932	3,839,354	43.63	5.89	3,060	1,696	55.42	7,385	134,380	141,765	2 0 77,568	9,77,247	

* The figure 43.10 at page 12 of the report is incorrect if the totals treated are right.

5. The progressive increase in the number of patients treated is largely due to the greater number of institutions open and included in the returns during each successive year, but it may also be taken as an indication of their increased popularity. In this connection the Government is glad to observe that the percentage of women to men treated shows a gradual but steady increase. The advance in the number of surgical operations, the decreases in the percentage of mortality among in-patients and in the cost of diets are satisfactory features of this triennial report. The first is ascribed by the Surgeon-General to more attention having been paid to this branch of medical aid and to the greater accuracy observed in the registration of operations. In the second statement on page 15 the mortality attending major operations is given. The average for the triennial period is only 2.83 per cent. of persons operated on.

6. The explanation of the District Medical and Sanitary Officer, Bellary, of the statement that out of 76 deaths in his district 71 were of persons admitted in a moribund condition, will be awaited. Twenty deaths occurred in 1895 from septic causes acquired in hospital. The statement called for in G.O., No. 746, Public, dated 7th September 1895, as to the measures taken to put the institutions affected into a wholesome condition, has not been furnished. The Surgeon-General merely remarks that the number of cases is not great, considering the *unsatisfactory state of many of the hospital buildings* and the absence of adequate nursing establishments. The percentage of beds occupied during 1895 shows only a very slight increase over that for the two preceding years. The average for the triennial period is but a little over 54 per cent. As remarked in paragraph 6 of G.O., No. 746, Public, dated 7th September 1895, the demand for beds will doubtless increase with time. It appears, however, from the Surgeon-General's remark at the conclusion of paragraph 5, that the number of beds unoccupied may in some instances be due to full provision not having been made for maintaining them.

The Government does not altogether agree with the Surgeon-General that the percentages of beds occupied in South Arcot, Kistna and Madura, viz., 62.48, 62.40 and 60.49, show that those available were fairly well utilized. The best result is reported from Malabar in which the percentages for the triennial period were 67.98, 80.56 and 95.33, respectively, showing a steady and satisfactory increase.

7. In connection with the information afforded in paragraph 9 of the report as to the diseases most prevalent in the several districts during 1895, it appears from Statement III that the largest number of cases treated were for diseases of the skin,* ulcers, malarial fevers, diseases of the eye, worms, diseases of the ear and rheumatic affections. In paragraph 9 under "Diseases treated" it is stated that there were 629 deaths from small-pox in the South Arcot district, but Statement III, page 63, shows that only eleven people were treated for this disease in that district and page 90 gives the total of cases treated in all districts as 175 only.

8. Details as to receipts and expenditure for the triennial period are afforded in paragraph 11 of the report. It is satisfactory to find that the amounts of subscriptions and of recoveries from paying patients for the year 1895 were the highest for the triennial period, though the latter are still exceedingly low. The percentage of the total expenditure borne by Government was 10.21, against 9.34 in 1894 and 8.92 in 1893. The actual amount contributed by Government was Rs. 99,819, of which Rs. 27,546 was the cost of the upkeep of seventeen State institutions. At page 17 of the report the number is given as fifteen, but Statement I, page 39, shows that fourteen were at work on the 31st December 1894 and three were opened during 1895. The remarks on page 21 of the report do not explain why the average cost of diet was Rs. 1-15-7 in Bellary whereas it was only Rs. 1-5-11 in Anantapur. The Surgeon-General should bear in mind that what the Government requires is the average cost *per head per diem*.

Excluding investments, the total expenditure for 1895 was Rs. 9,72,813-5-0, as against Rs. 9,29,415-15-0 for 1894 and Rs. 8,33,476-2-0 for 1893, which gives an average cost *per mille* of patients treated of Rs. 255, Rs. 258 and Rs. 253, respectively, or Rs. 255 *per mille* for the triennial period.

The increase under "establishment" is only apparent, for the relative cost under this head is shown on page 19 to have been the same as for 1894, viz., As. 2-4 *per head*, and less than that for 1893, which was As. 2-5 *per head*. No satisfactory comparison can be instituted in regard to the expenditure on bazaar and European medicines until the drugs which are used have been properly classified. The Government trusts that the steps taken by the Surgeon-General will secure accuracy and uniformity in this matter in the next report.

9. Notwithstanding the progressive increase in the number of in-patients and the average daily sick, the expenditure on diets has fallen during the triennium under review from Rs. 79,067 to Rs. 77,568 and the cost per head of in-patients from Rs. 2-4-8 to Rs. 2-0-4. The average cost on account of diet *per patient per diem* during 1895 was 2 annas as against 2 annas and 2 pies in each of the two preceding years. The average cost including all charges (with the exception of buildings and repairs and investments) in the three years, 1893, 1894 and 1895, has remained practically unchanged at As. 3-10 *per head*.

10. The remarks on pages 20-22 of the report will be dealt with in the Local and Municipal Department. In regard to the dispensary at Chódavaramu, the Surgeon-General explains that it has only recently been taken up by Government. With reference to the concluding paragraph on page 21 it is remarked that the average cost of diet *per head per diem* would not be affected by the length of time an in-patient was under treatment. This information would be more useful for purposes of comparison than the average cost *per patient* given in column 18 at page 20.

11. The inspection work which was performed during 1895 by the Surgeon-General and the various District Medical Officers was satisfactory, with the exception

of Chingleput and Ganjám. The former is a small district and all its institutions should have been inspected. In the case of the latter the reason advanced for non-inspection, viz., that the District Medical Officer was under orders to be in readiness for field service, hardly seems sufficient. The Government fully concurs in the Surgeon-General's remarks under "*Nursing*" on page 26 of the report and regrets that the requisite funds are not at present available.

The attention of the Local and Municipal Department will be invited to the tabular statement and observations of the Surgeon-General thereon at the close of paragraph 2 and to the remarks in paragraphs 12, 13, 14 and 17 of the report, with special reference to South Arcot, Górávari, Salem and Tanjore in 12, to 13 (d) and (f), to Madura in 14 and to 17 (6) Melapalaiyam and (7) Tanjore. The statement in paragraph 16 that one bed in the female ward of the municipal hospital at Kurnool is reserved for lying-in cases also calls for notice in that department. The Government regrets to observe from paragraph 15 that nothing has yet been done towards the provision of special medical aid for women and children in the districts of Anantapur, Chingleput, Kurnool, Malabar and the Nilgiris. Steps in this direction have been taken in South Arcot, Bellary, Tanjore and Trichinopoly, while in Cuddapah, Ganjám and Nellore, although there are no separate institutions for the purpose, female hospital assistants have been provided to attend to out-patients of the same sex. The reason why the Government did not approve of the establishment of a small female dispensary at Rajahmundry referred to under "*Górávari*" on page 29 of the report was because there were other more pressing calls on the funds of the Municipality. It is observed that the Raja of Bobbili's hospital for women at Bobbili will shortly be opened as the buildings are reported to be ready.

12. The Surgeon-General should do his best to obtain the statistics for future years to fill in the blanks in the statements in paragraph 17 and also the dates of establishment which, in several cases, have been marked as "unknown" in Statements II, III, IV and V attached to the report. It is not understood why statistics were not available for the Nabob's dispensary at Banganapalle and for the Maharaja's hospital at Vizianagram. As the practitioner in charge of Cundaswamy Mudaliyar's institution at Melapalaiyam is ignorant of English he should submit the returns in the vernacular. The submission of returns from the American Mission hospital at Madura and dispensary at Pasumalai should be insisted on.

The Surgeon-General's attention will be directed to the following incorrect entries in the column "total expense" in the statement in paragraph 17 (4):—

Opposite No. 6, Rs. 1,823-5-8 for Rs. 2,633-0-0.
 " " 8 " 1,078-10-7 for " 1,823-5-8.
 " " 11 " 871-0-0 for " 1,345-3-3.

Page 157 shows that these figures have been misplaced owing to careless compilation. The figures given opposite Nos. 3, 7, 9, 24 and 25 in paragraph 17 (4) cannot be checked as these institutions do not appear in the Statements I to V. The sales of quinine through the medium of the Postal department reported in paragraph 18 (3) (a) are encouraging and will no doubt increase. It is observed that in the statement referring to this at page 36 of the report "2,803" appears instead of "20,803"—a careless blunder which could not have occurred had the proofs been properly examined. It is also observed that the municipal hospital at Guntúr has been classed as "M.H." at pages 50, 74 and 104 of the report, and as "M.D." at pages 128, 130, 154 and 169.

13. The Surgeon-General will report on the recommendation of the District Medical Officer that the dispensary at Bandamoorlanka should be abolished. With reference to the remarks on pages 22 *et seq.*, special reports should be made by the Surgeon-General in regard to the institutions at Masulipatam, Bezwada, Nuzvid and Jaggayapéta, and on the alleged necessity for a boat for inspection work in the Górávari district.

14. It is to be regretted that the report is disfigured by several inaccuracies which should have been detected and corrected before it was submitted to Government. The omission to do this is the more surprising as the Surgeon-General is allowed a

special establishment for the preparation of the report, which, it is presumed, is checked by the Secretary to the Surgeon-General, if not by the head of the department himself, before it is signed.

It is observed that G.O., No. 794, Public, dated 24th September 1895, which directs that the *department* from which a Government order issued should be quoted in addition to the number and date, has not been attended to in drawing up the report.

OFFICE OF SURGEON-GENERAL
WITH THE GOVERNMENT OF MADRAS,
MADRAS, 14 July 1896.

No. 298

From

SURGEON-MAJOR-GENERAL C. SIBTHORPE, F.R.C.P.I.,
Surgeon-General with the Government of Madras,

To

THE HON. THE CHIEF SECRETARY TO GOVERNMENT,
PUBLIC DEPARTMENT.

SIR,

I HAVE the honour to submit to His Excellency the Governor in Council the Triennial Report and Statistics of the Civil Hospitals and Dispensaries in the Presidency of Madras for the year 1895. Three maps showing the distribution of the medical institutions in the presidency are attached.

2. Administration.—

(1) *Review of 1894 report.*—On receipt of G.O., No. 746, Public, dated 7th September 1895, reviewing the Annual Report on Civil Hospitals and Dispensaries for the year 1894, I directed the attention of medical officers to the following points:—

(a) The necessity of keeping an accurate record of septic diseases treated in hospitals with the measures adopted to put the affected institutions in a whole-some condition;

(b) To the more extensive use of bazaar medicines as impressed on them by Government in their Order No. 527, Public, dated 25th June 1895, paragraph 4;

(c) To the great variations existing in the cost of diets in adjoining districts;

(d) To see that the notes for annual reports, &c., were kept up from time to time, and that the reports and returns were despatched to my office on the due dates;

(e) To submit a special report on institutions where the cost has been much above or below the average of the district;

(f) To see that more beds are provided when they have been found to be inadequate if funds are available;

(g) To pay greater attention to operative surgery;

(h) To keep down the expenditure as much as is consistent with efficiency; and

(i) To take measures to stimulate self-respect among patients by requiring them to pay for medicines and diet when they are found to be able to do so.

(2) *Concise Annual Report to Local Authorities.*—In G.O., No. 735, Public, dated 2nd October 1894, a special form of concise Annual Report for Civil Hospitals and Dispensaries to be submitted to the local authorities concerned was sanctioned. During the year under review it was supplemented by the following headings to meet the wishes of Government:—

Inspections.—(i) Steps taken to carry out the recommendations of the Surgeon-General with the Government of Madras.

(ii) Steps taken to carry out the recommendation of other inspecting officers.

(iii) Amount of recoveries from patients who have been able to pay for their diets and medicines.

(3) *Annual Review of Report by the Government of India.*—In the year under review Government, in their Order No. 527, Public, dated 25th June 1895, communicated to me certain observations by the Government of India, in reviewing the

annual returns of Civil Hospitals and Dispensaries for 1893, as to the necessity for keeping down expenditure on these institutions as much as is consistent with efficiency. This was circulated to all the medical officers as a standing order. As regards the questions raised in paragraphs 3 and 6 (1) of the above G.O., concerning eye instruments and office establishment of District Medical and Sanitary officers, these have been dealt with in G.O., No. 863 L., dated 9th May 1896, Local and Municipal, and in G.O., No. 643, Public, dated 18th June 1896.

My proposals that (a) the centralisation of hospitals at head-quarters should be encouraged, that no hospital should be carried on in charge of a medical man having a less qualification than that of a Civil Apothecary or the L.M.S. of an Indian University, that the accommodation of all such hospitals should be fixed in consultation with the Surgeon-General, that they should be properly equipped and given an adequate establishment, and my proposals, (b) regarding the classes of hospitals and dispensaries to be established in up-country towns and outlying places have been referred to the Local and Municipal Department, but orders have not yet been issued on them.

(4) *Departmental Orders.*—On the 1st April 1895, I did away with the old system of departmental circulars and reprints of them with other orders in the quarterly sheet, as it was found that the system was more redundant and expensive as regards postage and stationery and also dilatory in respect of those orders which were for the first time published in the quarterly sheets. I substituted a system of standing orders which are distributed fortnightly and contain all orders concerning the Civil Medical Department.

The following are some of the important departmental orders issued during the year :—

(a) *Purchase of country-made articles up to a limit of Rs. 25 subject to budget provision*—vide G.O., No. 261-F., dated 21st March 1895.

(b) *Suggesting a minimum scale of equipment.*—A scale of equipment for Civil Hospitals and Dispensaries—vide G.O., No. 970, dated 20th December 1894.

(c) *Cholera epidemics.*—A set of instructions for working the scheme for combating cholera in municipalities and for the medical treatment of those attacked by the epidemic prepared by the Committee appointed under G.O., No. 170-M., dated 6th February 1895—vide G.O., No. 1028-M., dated 26th June 1895.

The form for reporting the results of the method of disinfecting wells by means of permanganate of potash suggested by Mr. Hankin referred to in G.O., No. 801, Public, dated 26th September 1895, was circulated for information.

(d) *Isolation hospitals for Cholera epidemics.*—The organization of isolation hospitals and divisional head-quarter medical assistance dealing with the huts and their sites, requirements, disinfection establishment, &c.—vide G.O., No. 1028-M., dated 26th June 1895, paragraph 23 of the rules.

(e) *Female Medical Practitioners.*—Rules defining the position of District Medical and Sanitary officers in relation to female medical practitioners trained under the Countess of Dufferin Fund and subsequently employed by local boards or municipal councils—vide G.Os., No. 1047, Mis., L. and M., dated 1st July 1895, and No. 1517, Mis., L. and M., dated 17th September 1895.

(f) *Vaccination.*—That District Medical and Sanitary officers should report regarding vaccination work and the maintenance of registers in municipalities, in their inspection notes to this office—vide G.O., No. 1388, L. and M., dated 8th August 1895.

(g) *Private practice.*—Rules for regulating the private practice of medical officers and subordinates employed by local boards and municipal councils—vide G.O., No. 1764 L., dated 23rd September 1895.

(h) *Medicines in Medical Store Depôts.*—Under instructions from the Government of India the list of medicines to be regularly maintained in Government medical store depôts was reduced—vide G.Os., No. 815, Public, dated 31st October 1894; No. 936, Public, dated 10th December 1894; No. 160, Public, dated 6th March 1895; and No. 537, Public, dated 2nd July 1895. This only affects Government hospitals, and medical officers in charge were permitted to make local purchases up to a limit of Rs. 5 subject to an annual limit of Rs. 50, to meet extraordinary demands.

(i) *Medicines at cost price.*—According to my suggestions Government in their order—G.O., No. 807, Public, dated 27th September 1895—stopped the supply of medicines from the medical stores at cost price in the case of—

- (1) Dispensaries in the Pudukkotta State;
- (2) Madras Railway dispensaries;
- (3) S.P.G. Mission Dispensary, Puttūr;
- (4) State Dispensary, Sandūr; but allowed it continue in the case of the Victoria Caste and Gosha Hospital, the Roman Catholic Orphanages, the Military and Civil Orphan Asylums, Madras, and the Dispensary at St. Thomé.

(j) *Cost of European medicines.*—The necessity for the insertion of a footnote explanatory of the heading 'Cost of European Medicines' in annual financial statements V, part I, of the Civil Hospitals and Dispensaries, showing—

- (i) Cost of European medicines,
- (ii) Cost of surgical instruments,
- (iii) Cost of surgical appliances,
- (iv) Repair of surgical instruments,
- (v) Repair of surgical appliances,

has been pointed out to the District Medical and Sanitary officers and Civil Surgeons—vide G.O., No. 989, Public, dated 2nd December 1895.

(k) *Duties in hill tracts.*—Medical officers and subordinates employed in hill tracts are required to attend gratuitously on Government officials, their families and servants in consideration of the higher rate of allowances they receive—vide G.O., No. 1028, Public, dated 17th December 1895.

(l) *Paucity of Muhammadan Hospital Assistants.*—It having been brought to the notice of Government that there are only a few Muhammadans either in the Civil Hospital Assistant establishment or in the Medical College under training, an order was issued to the effect that 20 per cent. of the vacancies for hospital assistants during the next two years shall be reserved for that community who have passed at least the Lower Secondary Examination before entertainment. Those who enter by general competition being excluded from this figure—vide G.O., No. 1035, Public, dated 30th December 1895.

(m) *Nursing establishment.*—At the suggestion of the Government of India it was ordered that the nursing establishment charges should be shown in a separate column in the annual financial statement, part I—vide G.O., No. 197, Public, dated 7th February 1896.

It has been found impossible to adhere to this direction during the year under review as the order was received too late. It will be attended to in future years.

(n) *Stock-book.*—A form was issued in May 1896 ~~which~~ a stock-book should be kept up in all hospitals and dispensaries showing the receipts and issues of certain medicines, all instruments and appliances, furniture, wines and spirits, hospital supplies and necessities and of bedding and clothing.

(o) *Quarters for the Government Hospital Assistants.*—With reference to G.Os., No. 365, Public, dated 14th November 1894, and No. 1796-W., dated 19th July 1895, a standard type design of these quarters was sent to all District Medical and Sanitary officers and Civil Surgeons, and they were directed to obtain from the Public Works Department estimates of the cost of accommodation attached to provincial institutions. When these subordinates are supplied with good quarters in proximity to their work, it will generally conduce to good work and to their personal comfort.

(p) *Special medical aid for women and children.*—In 1894 the attention of medical officers was called to the suggestion of the Madras branch of the Dufferin Fund Committee regarding placing female medical practitioners in charge of out-patient dispensaries entirely separate from existing institutions under male management, and that the whole personnel of the establishment should be composed of women. In continuation of this their attention was called to G.O., No. 1847, L. and M., dated 1st December 1894, in order that they should do all they could to carry out the orders of the Government of India. They have been directed to give systematic details in their administration reports regarding the work done in this direction which will be found in paragraph 15 of the report.

(g) *Midwives*.—The orders of Government were passed in G.O., No. 441, L. and M., dated 9th March 1895, on the proposals regarding the scale of pay and rates of remuneration to be given to this class of women by local authorities. This was communicated to medical officers. A form was circulated for general adoption in keeping the records of the work done by all such women working under G.O., No. 64, Financial, dated the 10th January 1880.

Regarding the training of midwives, a standing order was circulated in October 1895 calling attention to the above orders, and to G.Os., No. 600, Financial, dated 30th March 1878, and No. 737, Public, dated 31st March 1871, suggesting that it was most desirable that municipal and other local authorities should be urged to select women for training and to pay them during their period of study.

It was also suggested that all up-country lying-in hospitals in charge of a female medical practitioner, or to which a certified European or Eurasian midwife was attached, should open a school for training midwives. Certain rules for their entertainment and dealing with their course of instruction, which had been prepared in consultation with the Superintendents of the Government Maternity and Sir S. Ramasawmy Moodelliar's Lying-in hospitals, were laid down for guidance. Medical officers were directed to give full details of the work done by such women in their administration reports which are dealt with in paragraph 14 of this report.

(5) *Remarks of Director-General, Indian Medical Service, on hospitals and dispensaries*.—In forwarding the note by the Director-General of Indian Medical Service on the annual reports on hospitals and dispensaries in India for 1894, Government in paragraph 2 of G.O., No. 227, Public, dated 14th February 1896, drew my attention to certain points which are dealt with *seriatim*.

(a) *Clerical Work of District Medical and Sanitary Officers and Civil Surgeons*.—Paragraph 11 of the note.—The clerical work of the District Medical and Sanitary officers and Civil Surgeons in connection with the administration of the hospitals and dispensaries under their charge is large, and appears steadily to increase in spite of all the efforts which have been made during the last two years to do away with all useless returns and reports and to diminish correspondence. Some of the offices of these officers are sufficiently manned, though the clerks are, as a rule, under-paid and consequently the services of efficient men cannot be secured. In some of the larger districts where the work is very heavy, the establishments are undermanned. This subject has been disposed of in G.O., No. 643, Public, dated 18th June 1896.

(b) *Hospital Assistants and Compounders*.—Regarding the staff of hospital assistants and compounders for head-quarter institutions a separate communication will be laid before Government as the subject is much too large to deal with here.

(c) *Inspections*.—Under paragraph 3 of G.O., No. 57, Public, dated 24th January 1895, the services of assistants to the District Medical and Sanitary officers can, in future, be made more use of for inspection both medical and sanitary than has hitherto been the practice. These officers now take charge of all the duties at head-quarters during the absence of District Medical and Sanitary officers on inspection or other duty. It was found that District Medical and Sanitary officers were absent from their head-quarters for too long periods at a time much to the detriment of their professional and administrative work, and under paragraph 8 of that order every endeavour has been made to see that medical officers do not leave their head-quarters for more than ten days in any one month.

As it has been found difficult for the District Medical and Sanitary officer of Malabar to inspect all the dispensaries in his district for want of adequate railway provision, the inspection duty has been distributed in consultation with the Collector as follows:—By the Civil Surgeon, Cannanore—Talipparamba, Kutaparamba, Manantoddy; by the Civil Surgeon, Cannanore—Talipparamba, Kutaparamba, Manantoddy; by the Civil Surgeon, Cochin—Triprayar, and the remaining by the District Medical and Sanitary officer.

(d) *Establishments*.—paragraph 21 of the note.—That the expediency of maintaining an establishment for the treatment of in-patients in many of the district hospitals is certainly doubtful. This subject has been dealt with—vide G.O., No. 527, Public, dated 25th June 1895.

on this point (e) *Statistics and relief of clerical work*.—Paragraphs 22 and 30 of the note have been dealt with in the report on Medical institutions in the Presidency town of Madras.

(6) *Supply of medicines, instruments and appliances*.—The contract of the firm of Messrs. Burgoyne, Burbidges and Company has been renewed for the year 1896–97. This system of obtaining solid drugs from England has, on the whole, been reported favourably upon, but the system of obtaining tinctures and other spirituous preparations has not worked satisfactorily. I have placed certain propositions before Government with a view of improving it.

(7) *Quarterly Civil Medical List*.—According to the sanction conveyed in G.O., No. 1063, Financial, dated 4th December 1894, a list of all medical officers and subordinates employed in the Civil Medical Department is now published quarterly. It will be invaluable to the District Medical and Sanitary officers and others as a means of reference, besides enabling the transfers of Government medical subordinates to be exactly recorded with infinitely less trouble than before.

(8) *The Civil Medical Code*, which will, when published, be of great use to all medical officers and subordinates, is now in the press, and will shortly be submitted to Government.

(9) *Establishments, Medical*.—The following statement shows the classes and numbers of medical officers and subordinates belonging to the Civil Medical Department:—

Class of officer or subordinate.	Sanctioned establishment.	Number present on 31st Dec. 1895.	Number absent on 31st December 1895.			Remarks.
			On furlough.	On privilege leave.	On other duty and leave to be specified in remark column.	
Commissioned Medical officers—						
List 1. District Medical and Sanitary officers.	21	21	...	...	...	
(Civil Surgeons ...)	3	3	...	...	...	
Total ...	24	24	...	...	...	
List 2. Uncovenanted Medical officers as Civil Surgeons.	7	6	...	...	1	On other duty. Appointment exists only for six months.
List 3. Assistant Surgeons as Assistants to District Medical and Sanitary officers.	23	16	...	2	5	Four on other duty and one on leave without pay.
List 4. Civil Apothecaries—						
First Grade ...	42	36	...	1	5	On other duty.
Second Grade ...	96	74	...	3	19	On other duty including one under suspension.
Third Grade ...	11	7	...	1	3	On other duty.
Total ...	149	117	...	5	27	
List 5. Hospital Assistants—						
First Class ...	166	128	...	4	34	Thirty-two on other duty and two on sick leave.
Second Class ...	93	79	...	1	13	Nine on other duty, three on sick leave and one under suspension.
Third Class ...	121	87	...	1	33	One on sick leave, thirty-two on other duty.
Total ...	380	294	...	6	80	
Grand Total ...	583	457	...	13	113	

'On other duty' includes men employed in the city of Madras and acting in other appointments in police hospitals, jails, &c.

The following important changes took place among commissioned medical officers and civil surgeons during the year under review:—

Arcot, South.—Surgeon-Lieut.-Colonel H. Hyde was in charge up to 24th May when he retired, and Surgeon-Major W. A. Lee took over charge on the 9th

July and held it till the end of the year. During the interval the Assistant Surgeon was in charge.

Canara, South.—The Assistant Surgeon was in charge up to the 15th February when Surgeon-Major Lee took charge and remained till the 17th June. Surgeon-Captain C. Donovan had charge of the district for the remaining period.

Ganjām.—Surgeon-Lieut.-Colonel T. J. Hackett Wilkins was in charge up to the 5th May. Surgeon-Captain F. C. Pereira held charge for the remaining period.

Kistna.—This district was held by Surgeon-Major Thomas who was succeeded by Surgeon-Captain Vickers in the latter part of the year.

Malabar.—Surgeon-Major H. St. C. Carruthers was in charge till October when Surgeon-Lieut.-Colonel Hackett Wilkins succeeded him, and is still in charge.

Salem.—Surgeon-Major D. F. Dymott was in charge of this district up to the 2nd May when Surgeon-Lieut.-Colonel T. J. Hackett Wilkins succeeded him and held charge till the 23rd October. The permanent incumbent Surgeon-Lieut.-Colonel R. Harrison returned and took over charge on that date.

Vizagapatam.—During the year the permanent incumbent Surgeon-Lieut.-Colonel A. H. Leapingwell went on three months' privilege leave handing over charge to Surgeon-Major S. C. Sarkies.

Cuddapah.—This district was held in charge by Surgeon-Captain F. C. Pereira for the first two months and ten days and the remaining period by Surgeon-Major A. J. O'Hara.

Cannanore.—This civil station was in charge of Surgeon-Captain F. C. Pereira for two months when Assistant Surgeon Ganapathy took over charge.

Guntūr.—Assistant Surgeon Hesterlow was in charge of this civil station for two months and nineteen days during the year, and Assistant Surgeon A. P. Fernandez held charge of it for the remaining portion of the year.

Tellicherry.—Was held by Assistant Surgeon C. A. Lafrenais and Assistant Surgeon C. T. Saldanah.

The following statement shows the number of private medical practitioners employed under municipalities, local bodies, mission and other charitable associations:—

Rank.	Employed under municipality.	Local Funds.	Mission and other institutions.
Medical practitioners	...	1	6
Female medical practitioners	...	11	2
Private apothecaries	...	3	15
First-class hospital assistants	1	5	...
Second-class do. do.	...	40	...
Third-class do. do.	5	75	10
Female third-class hospital assistants	1	3	...

The following table shows the number and class in training at the Medical schools and College in Madras on the 31st December 1895:—

—	Apothecaries.		Hospital Assistants.				Remarks.
	Military Assistant Surgeons' class.	Dufferin Fund Female students' class.	Civil.		Military.	Dufferin Fund females.	
			Stipend.	Private.			
First year ...	21	6	38	5	17	...	Of these four female medical students in the apothecary class were being trained for the Travancore State, one for the Cochin State, one for the Mysore State, and three were private unaided students. Among the hospital assistant class forty-two belonged to Burmah, seven to Mysore State, two to Coorg, and 15 were private unaided.
Second year ...	15	3	33	10	16	...	
Third year ...	5	1	29	2	13	1	
Fourth year ...	3	3	...	...	...	...	
Total ...	44	13	100	17	46	1	

The following statement shows the number and class of the medical officers and subordinates in charge of the different classes of institutions included in this report:—

Class of institutions.	Nature of institutions.		Officers or subordinates in charge who made the annual report for 1895.								
	Hospital.	Dispensary.	Commissioned Medical officers.	Private Medical practitioners.	Assistant Surgeons.	Apothecaries.	Hospital Assistants.			Female Medical practitioners.	Female Hospital Assistants.
							First class.	Second class.	Third class.		
Class I—Government ...	9	8	...	...	...	1	7	2	7	...	...
Class II { Municipal ...	51	23	21	...	5	18	5	9	6	9	1
	Local Fund ...	139	228	1	1	5	86	90	85	95	4
Class III-A—Private ...	4	6	...	4	...	...	2	2	2	...	...
Class III-B—Private, aided by Government or Local bodies.	10	8	2	1	...	1	1	5	7	1	...
Total ...	213	273	24	6	10	106	105	193	117	14	1
Grand Total ...	486		486								

From the above table it will be seen that out of a total of 486 institutions, 117 or 24.07 per cent. are held by third-class hospital assistants. In this connection it may be remarked that in the Cuddapah district a hospital assistant of four years' service was replaced by another of one and-a-half month's experience in the department with the sanction of the local authorities. When this matter was brought to my notice I directed the District Medical and Sanitary officers to call attention of the President, District Board, to paragraph 5 of G.O., No. 527, Public, dated 25th June 1895, discouraging the entertainment of this class of subordinates in independent charge of even dispensaries. In the face of this order the Presidents of certain taluk boards in that district have expressed their inability to entertain higher paid men (first or second class hospital assistants) for want of funds. In such cases I consider that a better procedure would be to close the dispensary than to entrust the lives of the inhabitants to the care of men who have little actual experience.

3. Number of Institutions.—Exclusive of the medical institutions in the Presidency town of Madras there were 486 hospitals and dispensaries at work during the year against 473 during 1894 and 453 in 1893, being an increase of 33 institutions for the triennial period. The eleven institutions shown as 'closed during the year' in statement No. I include nine in the City of Madras, one in Vizagapatam and one in the Anantapur district. Under G.O., No. 422, Public, dated 27th March 1896, seven of the institutions in the town of Madras have been transferred from the statistics of this report to that on 'Medical institutions in the Presidency town of Madras' and two have been omitted, *viz. the Civil and military orphan asylum*.

The dispensary at Jeypore in the Vizagapatam district has been classed as a State institution instead of as Class III-B (private aided) as heretofore and Gooty in Anantapur district was classed as II instead of as III-B—*vide* G.O., No. 418 L., dated 3rd March 1896. Deducting these nine institutions from the total number at work in 1894, the figure against that year would be 464, or in the year under report there were 22 additional institutions at work.

The following statement shows the particulars of these 22 additional institutions:—

Class of institution.	Number.	Newly opened during the year.		Number.	Previously existing, but for the first time included in the statistics.	
		Name of hospital or dispensary.	District.		Name of hospital or dispensary.	District.
Class I—State	1	Kempola Dispensary	Askeri-Mangalore State Railway, South Canara.	1	Medical establishment, Special Assistant Agent, Polavaram.	Godavari.
Class II—Local or Municipal.	2	Caste and Gosha Dispensary, Vellore.	North Arcot.			
	3	Civil Dispensary, Chatrapur...	Ganjām.			
	4	Caste and Gosha Dispensary, Cocanada.	Godavari.			
	5	L.F. Dispensary, Coringa	Do.			
	6	L.F. Dispensary, Tadapalligudem.	Do.			
Class III-A—Private.	7	Women and Children Dispensary, Vizianagram.	Vizagapatam.	2	Kandal Dispensary	Ootacamund
	8	Women and Children Dispensary, Parvatipuram.	Do.			
	9	Kallikōta Dispensary	Ganjām.			
	10	American Baptist Mission Hospital, Nellore.	Nellore.			
Class III-B—Private, aided.	11	Mission Dispensary, Panugudi.	Tinnevely.	11	Mission Hospital Kodacal.	Malabar.

4. Adequacy of hospital and dispensary provision for the triennial period.—

Districts.	Hospitals.			Dispensaries.			Total of institutions.			Ratio of institutions per 100,000 of estimated population.			Area covered by one institution in square miles.
	1893.	1894.	1895.	1893.	1894.	1895.	1893.	1894.	1895.	1893.	1894.	1895.	
Anantapur	5	5	5	6	6	6	11	11	11	1.48	1.46	1.44	479
Arcot, North	6	6	6	14	14	15	20	20	21	0.87	0.86	1.00	363
Arcot, South	9	9	9	15	15	15	24	24	24	1.06	1.04	1.02	217
Bellary	7	7	7	13	14	14	20	21	21	2.06	2.12	2.07	285
Canara, South	7	8	8	12	12	13	19	20	21	1.76	1.83	1.90	186
Chingleput	3	3	3	12	12	12	15	15	15	1.27	1.25	1.16	189
Coimbatore	12	14	12	9	10	12	21	24	24	0.99	1.11	1.09	328
Cuddapah	6	4	7	8	10	9	14	14	16	1.06	1.05	1.26	513
Ganjām	11	6	12	5	10	6	16	16	18	0.82	0.82	0.91	465
Godavari	10	10	11	16	19	22	26	29	33	1.19	1.32	1.48	238
Kistna	9	11	16	12	13	8	21	24	24	1.08	1.21	1.18	350
Kurnool	3	3	3	15	15	15	18	18	18	2.01	2.05	2.01	417
Madura	13	13	13	25	27	27	38	40	40	2.28	2.36	2.31	220
Malabar	14	14	17	13	13	12	27	29	29	0.99	0.98	1.04	193
Nellore	10	10	11	18	18	18	28	28	29	1.82	1.79	1.81	302
Nilgiris	5	5	5	...	...	...	5	5	6	4.88	4.84	5.75	159
Salem	10	10	11	14	15	14	24	25	25	1.15	1.18	1.15	301
Tanjore	16	17	17	21	20	20	37	37	37	1.64	1.63	1.63	100
Tinnevely	16	12	15	10	16	14	26	28	29	1.31	1.39	1.43	186
Trichinopoly	3	3	4	11	11	15	14	14	19	0.99	0.97	1.30	191
Vizagapatam	17	19	21	7	5	5	24	24	26	1.21	1.19	1.29	663
Total	192	189	213	256	275	273	448	464	486	1.32	1.30	1.34	290

From the above table it will be seen that the adequacy of hospital and dispensary provision is maintained above one for every 1,000,000 of estimated population except in Ganjām which is .91. In several districts the proportion has fallen slightly on account of funds being required for roads and communications.

Madura with forty institutions and Tanjore with thirty-seven head the list. Trichinopoly, Godavari, Coimbatore and Kistna show most progress as regards the number of institutions. As to proportion to area Vizagapatam, Anantapur, Kurnool, Cuddapah, North Arcot and Ganjām show the least progress.

5. The Provision of beds for in-patients and their daily average attendance with the percentage of beds occupied for the last three years.—

Districts.	Provision of beds for			Average daily sick for			Percentage of beds occupied.		
	1893.			1894.			1895.		
	Men.	Women and children.	Total.	Men.	Women and children.	Total.	Men.	Women and children.	Total.
Anantapur	24	16	40	28	14	42	12	14	26
Arcot, North	101	76	177	107	76	183	107	76	183
Arcot, South	73	45	118	78	52	130	78	52	130
Bellary	55	35	90	56	35	91	56	35	91
Canara, South	40	29	69	35	30	65	35	30	65
Chingleput	33	34	67	36	35	71	36	35	71
Coimbatore	77	61	138	77	61	138	77	61	138
Cuddapah	62	44	106	53	39	92	53	39	92
Ganjām	72	29	101	73	29	102	73	29	102
Godavari	82	47	129	97	50	147	97	50	147
Kistna	66	48	114	93	48	141	93	48	141
Kurnool	37	23	60	40	20	60	40	20	60
Madura	96	87	183	115	80	195	115	80	195
Malabar	228	134	362	195	113	308	195	113	308
Nellore	59	36	95	54	34	88	54	34	88
Nilgiris	75	49	124	76	47	123	76	47	123
Salem	54	48	102	54	48	102	54	48	102
Tanjore	220	148	368	159	392	551	159	392	551
Tinnevely	102	65	167	94	60	154	94	60	154
Trichinopoly	64	48	112	69	57	126	69	57	126
Vizagapatam	112	64	176	133	70	203	133	70	203
Total	1,732	1,166	2,898	1,790	1,157	2,947	1,790	1,157	2,947

From this it will be seen that Coimbatore, Ganjám and South Canara have utilized the provision for in-patients the least; whereas Malabar stands first with ninety-five per cent. In South Arcot, Kistna and Madura, the accommodation has been utilized fairly well. *Provision is not always made in districts for the occupation of the entire number of beds.*

6. Statistics of the sick treated.—The annexed statement shows the total number treated in the Presidency during each year of the triennial period with the ratio per cent. of total treated to the estimated population :—

Years.	Estimated population.	In-patients treated.	Out-patients.	Total treated.	Ratio per cent. of total treated to estimated population.	Average daily attendance.
1893	33,937,219	34,463	3,222,741	3,257,204	9.59	21,857.47
1894	35,647,633	35,902	3,596,005	3,631,907	10.47	23,518.71
1895	36,166,070	38,422	3,800,932	3,839,354	10.59	24,712.98

It is satisfactory to note that there has been a steady increase during the triennial period. This is partially due to the inclusion for the first time in this report of the statistics of eleven institutions belonging to Missions, &c., that have been in existence for some time past. It is to be noted that the figures of the Madras institutions for the years 1893 and 1894 have been excluded from every statement of this report.

The subjoined table compares the statistics of the sick treated for the last three years as regards the different sexes :—

Years.	Total treated.				Ratio per cent. of women to men.	Ratio per cent. of children to men.
	Men.	Women.	Children.	Total.		
1893	1,606,128	665,287	985,789	3,257,204	41.42	61.38
1894	1,747,304	746,506	1,138,100	3,631,910	42.72	65.13
1895	1,855,664	809,734	1,173,956	3,839,354	43.10	63.26

This shows a steady increase and is partially due to the causes mentioned in the preceding paragraph. It is gratifying to note every year an increase in the number of women treated.

7. General Results among In-patients.—The following table exhibits the results of treatment among in-patients as compared with the two previous years :—

Years.	Total number of patients admitted.	Cured.	Relieved.	Discharged otherwise.	Died.	Ratio per cent. of deaths to total admitted.
1893	34,463	21,989	5,583	3,218	2,589	7.51
1894	35,902	23,169	5,938	3,292	2,358	6.57
1895	38,422	23,484	7,486	3,474	2,265	5.89

From this it will be seen that, while the column for admission shows a gradual increase, the percentage of deaths shows a very satisfactory decrease.

8. Mortality among in-patients.—The following table shows the mortality among in-patients and the prevalence of septic diseases, &c., during the year under report :—

Districts.	Number of deaths.	Number of cases admitted moribund.	Number of cases removed moribund.	Deaths from septic causes.	
				Acquired in hospital.	Acquired prior to admission.
Anantapur	21	6	1	1	1
Arcot, North	118	38	22	4	3
Arcot, South	77	22	6	2	1
Bellary	76	71	38	1	...
Canara, South	53	17	12	3	2
Chingleput	65	6	5	...	...
Coimbatore	103	29	...	...	1
Cuddapah	81	47	16	...	...
Ganjám	76	24	2	...	1
Godavari	122	35	13	2	4
Kistna	98	33	4	...	5
Kurnool	42	13	4	...	1
Madura	207	82	21	1	2
Malabar	328	47	26	...	1
Nellore	46	12	3	...	...

Salem	44	10	2	...	1
Tanjore	187	66	10	...	3
Tinnevely	148	28	8	...	...
Trichinopoly	143	20	13	...	1
Vizagapatnam	84	49	5	4	1
Total	2,265	691	217	20	29

As this information is not available for the previous years, it is not possible to effect a comparison. The importance of isolating the cases of septic diseases has been fully impressed on medical officers. The total of twenty cases acquired in hospital is not great, considering the unsatisfactory state of many of the hospital buildings and the absence of adequate nursing arrangements. Out of a total of 76 deaths in the Bellary district, 71 have been returned as admitted moribund. The District Medical and Sanitary officer has been called upon to explain this.

9. Diseases treated—Anantapur.—There was an ~~attack~~ ^{epidemic} of cholera during the year in five of the villages bordering on Cuddapah and Bellary, causing 144 attacks with 71 deaths. The largest number of admissions were for ulcers, skin diseases and injuries. Malarial fevers and eye affections showed a marked diminution, but rheumatic, respiratory and digestive diseases were on the increase. This, the District Medical and Sanitary officer attributes to climatic changes.

Arcot, North.—An epidemic of cholera that broke out in 1894 continued more or less throughout the district till the beginning of April of the year under report and caused 1,151 deaths. Diseases of the skin, of the digestive system, respiratory system and local injuries formed the most common diseases treated during the year. Diseases of eye show a great diminution in the number treated over last year.

Arcot, South.—Cholera prevailed throughout the year, but chiefly during the months of January, February, June, July and August. The number of deaths from this cause was 4,042. There was a mild epidemic of small-pox also causing 629 deaths. The principal diseases treated were affections of eye, ear, skin and connective tissue.

Bellary.—Diseases of the eye, digestive system and skin were the most common complaints in the district. Malarial fevers showed a marked decrease over last year. There were 484 cases of cholera treated in the medical institutions of the district.

Canara, South.—Worms, malarial fevers, skin affections and digestive disorders form the most common diseases treated. Almost all the diseases show a diminution over last year, which the District Medical and Sanitary officer attributes to the absence of any epidemics, the general good health that prevailed during the year and to the general transfer of most of the subordinates in the district; the latter he considers as a procedure to be discouraged as much as possible.

Chingleput.—Diseases of the digestive system, skin and eye affections, ulcers and diseases of the ear were the most prevalent diseases during the year. Three hundred and ninety cases of cholera were treated in the medical institutions of the district.

Coimbatore.—The largest number treated was for diseases of the eye. Next came in the order of frequency ulcers, diseases of the skin, malarial fevers, diseases of the digestive system, of the ear and local injuries.

Cuddapah.—Cholera appeared in three taluks during the year; there were 334 attacks with 172 deaths against 309 attacks and 144 deaths in the last year. Malarial fevers as usual show the largest number treated, after which comes ulcers, diseases of the skin and diseases of the eye.

Ganjām.—Cholera appeared in a sporadic form during the year and prevailed in several centres recording a mortality of 330. Malarial fevers, skin diseases, worms, bowel-complaints and rheumatic affections formed the most common diseases treated.

Gōdāvari.—This district was almost free from cholera. The most common diseases treated were malarial fevers, worms, rheumatic affections, diseases of the ear and skin. Malarial fevers and dysentery showed an increase in the number treated over those of the last year, but diseases of the eye showed a great diminution having fallen from 10,286 in 1894 to 6,236 in the year under report.

Kistna.—The district was free from cholera. Malarial fevers and diseases of the eye have shown a decrease in the number treated over those of the last year, whereas diseases of the skin, of the digestive system, of the ear and dysentery have shown an increase. The following few lines regarding *beri-beri* are quoted from the District Medical and Sanitary officer's report: " *Beri-beri* is endemic in the whole of the delta and half of the district and occurs in all its forms though chiefly in the sub-acute and chronic forms. It is especially prevalent in September, October and November, and in most cases there is a history of a previous attack within six months of malarial fever or dysentery. Its intimate connection with damp is well seen and cases transferred to drier parts of the district usually recover rapidly. An epidemic outbreak in a small mission school was checked at once by moving all the boys to the hospital, the cause of the outbreak being clearly the damp, ill-ventilated condition of their sleeping room." The pathology of this disease requires the investigation of a trained bacteriologist.

Kurnool.—The most common diseases treated were malarial fevers, worms, rheumatic affections, ulcer, diseases of the eye and ear. There was an outbreak of cholera during the months from July to November and 492 deaths were recorded. The disease is reported to have been introduced into the district by certain Roman Catholic pilgrims who were proceeding from Hyderabad to Negapatam for the Vélānganni festival.

Madura.—Diseases of the eye, skin, ulcers, malarial fevers, digestive disorders and diseases of the ear formed the most common complaints during the year. Cholera was prevalent in the district throughout the year though not so severe as in the last year. There were 4,819 attacks with 2,964 deaths as against 11,382 attacks and 6,594 deaths in the year 1894.

Malabar.—Diseases of the digestive system, respiratory system, worms, malarial fevers and diseases of the skin formed the most common complaints during the year. There were 169 cases of cholera treated in hospitals as against 229 of 1894.

Nellore.—The district was almost free from cholera throughout the year. The most common diseases treated were those of the digestive system, skin, malarial fevers and eye affections. The last two diseases showed a marked decrease over the figures of last year due to a more healthy year.

Nilgiris.—Diseases of the digestive and respiratory systems, of the skin, malarial fevers and worms form the most prevalent diseases in the district.

Salem.—Ulcers, skin diseases, worms and ear diseases showed a marked increase over the figures of last year, but a diminution was observed under malarial fevers, eye affections and diseases of the digestive system. Cholera and small-pox were very much less prevalent than in the previous year.

Tanjore.—The most common diseases treated during the year were diseases of the skin, eye and malarial fevers. Venereal diseases contributed 5,897 cases. There were 448 cases of cholera treated in hospitals during the year.

Tinnevelly.—The most common complaints treated were malarial fevers, diseases of the skin and eye. These headings show an increase over the figures of last year.

Trichinopoly.—Ulcers, malarial fevers, diseases of the skin, eye, ear and rheumatic affections formed the most prevalent diseases.

Vizagapatam.—Cholera appeared in an epidemic form in some parts of Párvatipuram taluk in the months of November and December. The total number attacked were 74 with 31 deaths. The largest number of admissions were for worms and malarial fevers.

10. Surgical operations.—The following statement compares the work done in this branch for the last three years:—

Districts.	1893.		1894.		1895.	
	Major.	Minor.	Major.	Minor.	Major.	Minor.
Anantapur	42	1,725	63	1,682	71	2,154
Arcot, North	265	7,737	312	7,669	488	8,370
Arcot, South	157	6,889	186	8,011	349	8,884
Bellary	170	3,999	119	3,871	259	4,148
Canara, South	197	1,827	123	2,003	197	2,359
Chingleput	204	4,149	140	3,948	237	4,376
Coimbatore	331	7,130	352	7,878	433	8,543
Cuddapah	90	2,009	110	2,109	169	2,511
Ganjām	114	2,374	140	2,629	237	2,607
Gōdāvari	417	4,159	374	4,810	367	5,525
Kistna	401	3,741	408	5,492	568	5,741
Kurnool	63	1,603	90	1,720	137	1,698
Madura	512	11,214	531	13,051	671	12,714
Malabar	540	6,612	599	7,490	746	8,645
Nellore	181	4,908	219	5,827	299	6,337
Nilgiris	88	795	57	677	90	750
Salem	95	6,833	132	7,077	151	6,801
Tanjore	975	19,520	1,006	20,760	1,262	21,885
Tinnevelly	157	5,554	146	5,913	201	7,098
Trichinopoly	118	9,145	108	8,723	202	8,864
Vizagapatam	228	3,770	267	4,385	251	4,370
Total	5,345	115,693	5,542	124,785	7,385	134,380

From this it is evident that there has been a great increase in the number of operations performed in almost every district. The marked increase seen in the year under report is due to the greater attention paid to this branch of medical aid and accuracy in registration.

The annexed statement shows the number of major operations performed during the last three years with their results and the ratio per cent. of deaths to total performed:—

Years.	Remained on the last day of the previous year.	Performed during the year.	Total.	Results.			Died.	Remained on the last day of the year.	Ratio per cent. of deaths to total treated.
				Cured.	Relieved.	Discharged otherwise.			
1893	70	5,275	5,345	4,580	341	169	158	97	2.96
1894	97	5,445	5,542	4,660	456	156	150	120	2.71
1895	120	7,265	7,385	5,969	855	191	208	162	2.82

From the above it will be seen that the number of operations performed has risen considerably during the triennial period. The death-rate remains practically the same, viz., 2.82 per cent., which is very favourable.

The following statement shows the number of operations performed by officers and subordinates, separately with the ratio per cent. of death to total treated during the year under report:—

REPORT ON THE ANNUAL RETURNS

Rank.	Remained on 31st December 1894.	Performed during the year.	Total.	Results.					Ratio per cent. of deaths to total treated.
				Cured.	Relieved.	Discharged otherwise.	Died.	Remaining on 31st December 1895.	
Medical officers ...	48	2,045	2,033	1,582	290	93	52	76	2.48
Subordinates ...	72	5,220	5,292	4,387	565	98	156	86	2.95
Total ...	120	7,265	7,385	5,969	855	191	208	162	2.82

The following statement shows the number of major operations performed by medical officers during the year 1895 as required by G.O., No. 848, of 14th October 1893, and names of medical subordinates who performed 99 or more operations:—

Station.	Rank and name.	Number of operations performed.	Period present for duty.	Remarks.
Anantapur ...	Surgeon-Major H. M. Hakim ...	22	Whole year ...	70 days spent on inspection.
Vellore ...	Surgeon-Major C. Adams ...	62	298 days.	
Cuddalore ...	Surgeon-Major W. A. Lee ...	108	298 days ...	
Do. ...	Surgeon-Lieut.-Colonel H. Hyde ...	3	4 months and 24 days.	
Bellary ...	Surgeon-Major J. W. Evans ...	103	Whole year.	29 of this were performed at Mangalore.
Mangalore ...	Surgeon-Captain C. Donovan ...	37	6 months and 10 days.	
Chingleput ...	Surgeon-Major H. A. F. Nailer ...	24	Whole year.	
Coinbatore ...	Surgeon-Lieut.-Colonel F. J. Fitzpatrick, M.D. ...	6	Whole year.	
Cuddapah ...	Surgeon-Major A. J. O'Hara ...	32	9 months ...	One operation was performed at Mangalore. 16 operations were performed at Cuddapah and four at Cannanore.
Berhampur ...	Surgeon-Captain F. C. Pereira ...	48	347 days ...	
Calicut ...	Surgeon-Lieut.-Colonel T. J. Hackett Wilkins.	24	347 days ...	
Rajahmundry.	Surgeon-Major J. C. Marsden ...	41	Whole year.	
Cocanada ...	Surgeon-Major S. C. Sarkis ...	39	Whole year ...	11 operations were performed at Vizagapatam.
Masulipatam.	Surgeon-Major W. F. Thomas ...	24		
Do. ...	Surgeon-Captain W. C. Vickers ...	86	Whole year.	
Kurnool ...	Surgeon-Major A. L. Patch ...	27	Whole year.	
Madura ...	Surgeon-Major F. C. Reeves ...	188	Whole year.	9 months and 28 days.
Calicut ...	Surgeon-Major H. St. C. Carruthers.	47	14 days.	
Cannanore ...	Surgeon-Major N. Chatterjee ...	64	Whole year.	
Cochin ...	Surgeon-Major R. Pemberton ...	67	Whole year.	
Nellore ...	Surgeon-Major W. H. Thornhill ...	12	3 months and 20 days.	On His Excellency the Governor's staff.
Ootacamund ...	Surgeon-Major G. L. Walker, M.D. ...	13	8 months.	
Do. ...	Surgeon-Lieut.-Colonel H. D. Cook ...	3		
Do. ...	Surgeon-Major W. B. Browning ...	10	347 days.	
Coonoor ...	Surgeon-Lieut.-Colonel J. A. Lancaster.	4	18 days.	2 months and 7 days.
Do. ...	Surgeon-Captain R. H. Elliot ...	5	4 months.	
Salem ...	Surgeon-Major D. F. Dymott ...	3	2 months and 7 days.	
Do. ...	Surgeon-Lieut.-Colonel A. N. Rodgers Harrison.	181	9 months.	
Tanjore ...	Surgeon-Major C. M. Thompson ...	21	Whole year.	2 months and 8 days.
Palamcottah.	Surgeon-Major K. C. Sanjana ...	74	9 months.	
Trichinopoly.	Surgeon-Lieut.-Colonel W. O'Hara ...	42		
Vizagapatam.	Surgeon-Lieut.-Colonel A. H. Leapingwell.	27	180 days.	
Ranipettai ...	Reverend L. R. Scudder ...	26	Whole year.	Whole year.
Dindigul ...	Reverend Edward Chester, M.D. ...	168	Whole year.	
Negapatam ...	Civil Surgeon N. Mahomed Oosman Sahib.	107	Whole year.	
Madura ...	Assistant Surgeon C. Munusami Mudali.	253	Whole year.	
Mannargudi ...	Civil Apothecary R. L. Davy Singh ...	179	Whole year.	Whole year.
Kumbakonam.	Civil Apothecary J. W. Wright ...	99	Whole year.	
Coimbatore ...	Female Medical Practitioner Miss L. C. Johnson.	100	Whole year.	
Vizagapatam.	Female Medical Practitioner Miss D'Prazer.		Whole year.	

I have great pleasure in bringing to the notice of Government the good work done in this branch of medical aid by Surgeon-Major F. C. Reeves, Surgeon-Major C. M. Thompson, Surgeon-Major W. A. Lee, Surgeon-Major J. W. Evans, Civil Surgeon N. Mahomed Oosman, Civil Apothecary B. L. Davy Singh, Civil Apothecary J. W. Wright, Assistant Surgeon Munusami Mudali and female Medical Practitioners Miss L. C. Johnson and Miss D'Prazer.

11. Finance—Receipts.—The following statement exhibits the different sources of income in the Presidency, exclusive of those in the City of Madras, for the year under report as compared with the two previous years:—

Sources of income.	1893.			1894.			1895.			Ratio per cent. on total income.		
	RS.	A.	P.	RS.	A.	P.	RS.	A.	P.	1893.	1894.	1895.
1. From Government ...	75,757	3	2	87,017	4	1	99,819	8	6	8.92	9.34	10.21
2. From Local and Municipal funds.	7,13,895	0	3	7,97,906	10	4	8,17,984	9	9	84.10	85.70	83.70
3. Interest on investments ...	17,457	13	6	11,468	8	11	16,873	9	11			
4. Sale of securities or withdrawals of deposits ...	9,193	5	1	733	11	7	239	4	7			
5. Subscriptions ...	19,698	14	3	20,174	10	1	26,945	8	9	6.98	4.96	6.09
6. Dues by paying patients ...	820	3	11	1,698	1	4	1,887	0	10			
7. Sale of medicines not supplied by Government ...	7,539	14	7	8,096	2	8	9,071	8	9			
8. Miscellaneous receipts ...	4,518	4	9	3,921	8	7	4,425	5	7			
Total ...	8,48,880	11	6	9,31,016	9	7	9,77,246	8	8	100	100	100

The increase in the total income is chiefly due to the inclusion of the cost of working of the following institutions, which are either newly opened or for the first time included in the statistics:—

- (1) Caste and Gosha Dispensary, Vellore.
- (2) Local Fund Dispensary, Chatrapur.
- (3) Caste and Gosha Dispensary, Cocanada.
- (4) Local Fund Dispensary, Coringa.
- (5) Local Fund Dispensary, Thadapalligundam.
- (6) Women and Children's Dispensary, Vizianagram.
- (7) Women and Children's Dispensary, Párvatipuram.
- (8) Kallicoottah Dispensary.
- (9) Mission Dispensary, Pannagudy.
- (10) Kandal Dispensary, 'Hamnett's,' Ootacamund.
- (11) Mission Hospital, Kodacal in Malabar.

Of the total income, viz., Rs. 9,77,246-8-8, Rs. 99,819-8-6 or 10.21 per cent. was contributed by Government against 9.34 per cent. in 1894 and 8.92 per cent. in 1893. This includes the cost of the upkeep of the fifteen class I institutions wholly maintained by the State against fourteen in the year 1894 and ten in 1893. Excluding the cost of working of the State institutions from all calculations, the following table represents the actual contribution given by Government and other sources and the ratio they bear to the total cost:—

Sources of income.	1893.			1894.			1895.			Ratio per cent. on total income.		
	RS.	A.	P.	RS.	A.	P.	RS.	A.	P.	1893.	1894.	1895.
From Government ...	60,377	9	8	62,257	15	4	72,272	15	2	7.24	6.87	7.61
Local and Municipal funds ...	7,13,895	0	3	7,97,906	10	4	8,17,984	9	9	85.65	88.07	86.17
Other sources ...	59,228	8	1	45,842	11	2	59,042	9	9	7.11	5.06	6.22
Total ...	8,33,501	2	0	9,06,007	4	10	9,49,300	2	8	100	100	100

Interest on investments.—The increase under this heading is due to the funded capital being raised from Rs. 3,94,867 to Rs. 3,99,061, and to the interest drawn during the year not having been wholly utilised for hospital purposes.

Sale of securities or withdrawal of deposits.—The falling off under this heading is gratifying, as it shows the solvent condition of these institutions, and that the controlling authorities who are responsible for the management of them are able to conduct them without indenting on the funded capital.

Subscriptions.—It is worthy of notice that the amount of subscriptions collected during the year is the highest during the triennial period, which is due to the fact that the attention of medical officers and subordinates has been called to the necessity of encouraging such means of support.

Recoveries from paying patients.—Though the increase under this item is not so satisfactory, it is the highest during the triennium, and may be taken as a sign that medical officers are seeing that payment is not evaded by those who can afford to pay.

Sale of medicines.—There has been a slight increase under this item. Vizagapatam, Ganjam and Tinnevely show the largest amounts realised, while Coimbatore, Cuddapah and Kurnool show the smallest proceeds.

Miscellaneous receipts.—The slight increase under this head is due to the larger amount realised from sale of unserviceable articles and old furniture.

Expenditure.—The subjoined statement represents the details of expenditure during the triennial period, exclusive of the medical institutions in the Presidency town of Madras:—

Particulars of expenditure.	1893.			1894.			1895.			Ratio per cent. on total expenditure.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	1893.	1894.	1895.
1. Establishment	4,88,242	6	0	5,28,221	1	9	5,65,126	9	5	57.52	56.73	57.83
2. Bazaar medicines	25,507	6	2	23,493	2	3	18,973	15	3	3.00	2.52	1.94
3. European medicines	1,19,824	14	7	1,74,059	12	7	1,72,957	12	7	14.12	18.70	17.69
4. Diet	79,066	8	1	78,118	10	11	77,568	2	4	9.31	8.39	7.94
5. Miscellaneous charges	74,740	14	2	84,347	12	9	85,946	7	7	8.80	9.06	8.79
6. Buildings and repairs	46,094	1	0	41,175	6	9	52,240	5	10	7.25	4.60	5.81
7. Investments	15,404	9	6	1,600	10	7	4,433	3	8			
Total	8,48,880	11	6	9,31,016	9	7	9,77,246	8	8	100	100	100

The expenditure during the year amounted to Rs. 9,77,246-8-8 against Rs. 9,31,016-9-7 in 1894.

Establishment.—Of this amount 57.83 per cent. was spent on establishment against 56.73 in 1894 and 57.52 in 1893. Although the total amount expended on establishment was comparatively great, still the ratio it bears to the total expenditure does not compare unfavourably with those of the previous years. The increase is due to the inclusion of the statistics of the eleven institutions mentioned above.

Bazaar medicines.—In many of the institutions most of the bazaar medicines are included under European medicines. Steps are now being taken in communication with other provinces to obtain uniformity as to what drugs should be styled 'bazaar medicines.'

European medicines.—The expenditure under this heading will doubtless appear curtailed in future when the correct classification is effected and when the use of bazaar medicines becomes more extensive. The increase is due to the fall in exchange and to the expense of purchasing tinctures and other preparations containing spirit in the local markets.

Diet.—There has been a gradual decrease in the expenditure on diet. This is satisfactory as it is found that there was increase both in the number of in-patients treated and in the average daily sick as per the following table:—

Year.	In-patients.		Average daily sick.		Cost of diet.		Cost per patient per diem.	Decrease.
	Number.	Increase.	Number.	Increase.	Total.	Decrease.		
1893	34,463	...	1,557.82	...	Rs. 79,066 8 1	Rs. ...	0 2 2	...
1894	35,902	1,439	1,576.02	18.20	78,118 10 11	947 13 2	0 2 2	...
1895	38,422	2,520	1,695.93	119.91	77,568 2 4	550 8 7	0 2 0	0 0 2
Total increase as regards in-patients and decrease in expenditure	...	3,959	...	138.11	...	1,498 5 9	...	0 0 2

Miscellaneous charges.—The expenditure under this item shows an increase over that of the last year and is accounted for by the increased number of patients treated.

Buildings and repairs.—The increased expenditure under this head is accounted for by effecting necessary repairs, &c., in the medical institutions in almost all districts.

Relative cost.—At first sight it may appear that these institutions are managed at a very high cost; but considering the large numbers that were relieved during the triennial period, it will be seen that economy has been effected as will be observed from the results of the following statement:—

Year.	Class of patients treated.			Establishment charges.			Bazaar medicines.					
	In-door.	Out-door.	Total.	Total.	Cost per head.		Total.	Cost per head.				
1893	34,463	3,222,741	3,257,204	Rs. 4,88,242	A. 6	P. 0	Rs. 0	A. 2	P. 5			
1894	35,902	3,596,005	3,631,907	5,28,221	1	9	0	2	4			
1895	38,422	3,800,942	3,839,354	5,65,126	9	5	0	2	4			
Year.	European medicines.			Diet.		Miscellaneous charges.		Grand total.

1893	Rs. 1,19,824	A. 14	P. 7	Rs. 79,066	A. 8	P. 1	Rs. 74,740	A. 14	P. 2	Rs. 7,87,382	A. 1	P. 0
1894	1,74,059	12	7	78,118	10	11	84,347	12	9	8,88,240	8	1
1895	1,72,957	12	7	77,568	2	4	85,946	7	7	9,20,572	15	2

Invested capital.—The following statement shows the state of the funded capital as compared with the two previous years:—

Year.	Balance in the beginning of the year.	Invested during the year.	Sale of securities and withdrawal of deposits.	Closing balance.
1893	Rs. 3,88,124 9 9	Rs. 15,404 9 6	Rs. 9,528 13 10	Rs. 3,94,000 5 5
1894	3,94,000 5 5	1,600 10 7	733 11 7	3,94,867 4 5
1895	3,94,867 4 5	4,433 3 8	239 4 7	3,99,061 3 6

In the year under report a sum of Rs. 4,193-15-1 was added to the invested capital which amounted to Rs. 3,99,061-3-6 at the close of the year, which was the highest figure during the triennial period.

Cost per head.—The following statement shows the cost per patient treated during 1895 under the several heads of expenditure. This statement has been prepared with a view of showing District Medical and Sanitary officers and Civil Surgeons in what directions improvements may be possible as regards efficiency and economy:—

REPORT ON THE ANNUAL RETURNS

Cost per Patient treated under the several headings in the several Districts of the Presidency of Madras during the year 1895.

1	2	3	4	5	6	7	8	9	10	11	12
Districts.	Number of Medical Institutions.	Number of beds available.	Daily average number of beds occupied.	Percentage of beds occupied.	Total number of in-patients treated.	Total number of out-patients treated.	Total of both in- and out-patients treated.	Total cost.	Average cost per patient on total cost.	Total cost on establishment.	Average cost per patient treated on establishment.

Before explaining the variations in this statement it may be convenient to classify these districts into eight groups in relation to their geographical positions, viz. :—

- (1) Ganjām and Vizagapatam.
- (2) Górávari, Kistna and Nellore.
- (3) Bellary, Anantapur, Kurnool and Cuddapah.
- (4) Chingleput, South Arcot and North Arcot.
- (5) Tanjore, Trichinopoly, Madura and Tinnevely.
- (6) Salem and Coimbatore.
- (7) South Canara and Malabar.
- (8) Nilgiris.

Group (1).—In Ganjām there are eighteen institutions with a total treated of 170,271, in Vizagapatam twenty-six institutions with a total of 263,599 treated, or there were eight institutions and 93,328 patients less in Ganjām than in Vizagapatam.

In proportion to the number of its institutions, Ganjām ought to have treated 209,888 patients in order to have kept pace with Vizagapatam, whereas Ganjām actually gave relief only to 170,271. Hence it follows that in Ganjām, the cost of treating a patient is more than in Vizagapatam.

Group (2).—In Górávari there are thirty-three institutions, in Kistna twenty-four and in Nellore twenty-nine, the total of patients treated in each being 161,457, 174,765 and 155,304, respectively. If the standard of Kistna is to be adopted, Górávari should have treated 240,302 and Nellore 211,174.

Turning to the variations in cost under different heads, it is found that Kistna and Górávari keep pace with each other under almost every heading, except diet which can be accounted for by the fact that articles of consumption are cheaper in the latter districts.

In this connection, it may be pointed out that the average number daily sick in-patients in Kistna was 92.99 against 63.27 in Górávari during the year under review, or, in other words, some of the patients made a longer stay in the hospitals in Kistna district than in Górávari.

As regards Nellore, every institution, with the exception of Ongole, is manned by Local Fund hospital assistants, whose pay and allowances are lower than the Government hospital assistants. Therefore the cost under establishment is lower than the other two which reduces also the total cost. As the articles of diet are costlier here, the increase under cost per head of diet requires no special explanation.

Group (3).—Anantapur and Bellary.—These two districts have shown almost the same results except in European medicines and diet. In Bellary, the increase in European medicines is probably due to the fact of its having a large number of institutions, and thereby patients resorting to them more frequently than is the case in Anantapur where the dispensaries being far apart, the attendance is less. The only variation that calls for any remarks in the figures for Cuddapah and Kurnool is that on establishment, and this is accounted for by the fact that six institutions in the former district out of seventeen are held by apothecaries, whereas, in Kurnool, only two out of eighteen are under this class of subordinates.

Group (4).—There are no great variations under any of the headings in the districts of this group.

Group (5).—Madura, Tanjore and Tinnevely show results that are nearly similar. As regards Trichinopoly, the variation is chiefly in establishment, which is due to all the institutions in the district being in charge of hospital assistants, which brings down the average on total cost by one anna.

Group (6).—With the exception of the variation under establishment, these two districts have been similarly managed. The variation under establishment is due to a larger number of apothecaries being employed in Coimbatore district.

Group (7).—The total treated in the twenty-one institutions of South Canara was 85,901, whereas, in the twenty-nine institutions of Malabar, there were 221,298 treated. To keep up to the ratio of Malabar, the figure against South Canara should have been 160,250, whereas it is only about half this number. Hence it stands to reason that in South Canara it costs more for a patient than in Malabar.

Group (8).—The local circumstances of this district (Nilgiris) are such as to preclude comparison under any heading with any of the neighbouring districts.

As a matter of fact every thing is so dear here that the cost under every heading with the exception of medicines is very high.

Before closing this part of the report, it is necessary to say a few words regarding the cost of diets. The method adopted for arriving at the cost per patient under this head is to divide the total cost on diet by the total number of admissions (in-patients). This method will always be in favour of hospitals where patients make only a short stay, whereas if by any reason a hospital has to keep a few patients for a long time, it will show unfavourable results.

The following are the institutions in which the expenditure does not seem to be justified by the amount of medical relief afforded :—

The dispensary at Dhone in the District of Kurnool.—The average daily sick in this institution has been below fifteen for the year under report. As this is situated on the line of railway communication, it is reported by the District Medical and Sanitary officer to be absolutely necessary there.

In the Górávari district there are three dispensaries in which the daily average attendance has been below fifteen, viz.:—

- (1) Government dispensary, Chódavaramu.
- (2) Local Fund dispensary, Gokavaram.
- (3) Local Fund dispensary, Bandamoorlanka.

(1) As regards Chódavaramu the institution has been recently taken up by Government on account of its being the head-quarters of the agency police and of a Sub-Collector.

(2) *Gokavaram.*—This is situated on the borders of the agency tracts and no other institution exists in the neighbourhood.

(3) *Bandamoorlanka.*—The attendance at this dispensary has been steadily going down from twenty in 1893 to twelve in 1894 and again to ten in 1895. The cost of maintenance of this dispensary is consequently high. The District Medical and Sanitary officer recommends its abolition.

In the district of Kistna the special hospital for women at Masulipatam, the municipal hospital at Bezvada, the local fund hospital Nuzvid, and the local fund dispensary at Jaggayyapéta each show a large expenditure which cannot be justified by the amount of medical aid given.

In the *special hospital for women at Masulipatam* the employment of an Eurasian midwife on rupees fifty a month and the falling off in attendance due to the frequent absence of the female medical practitioner has increased the cost per patient out of all proportion. The District Medical and Sanitary officer suggests that the women's side of the main dispensary should be re-opened, the Eurasian midwife should be employed in that department and the dispensary department of the special hospital for women be reserved for caste and ghosha women and children only.

In *Bezvada* the average cost of each patient on total cost has been As. 11-7 which is markedly above the average. The District Medical and Sanitary officer reports this to be due partly to the conservative spirit of the people who do not freely make use of the hospital and partly to the inadequate arrangements for medical work in the hospital. The work done in this hospital is likely to be much improved when the new hospital with an efficient out-patient department is erected as is now contemplated and for which a site has been chosen.

Nuzvid, where the cost per patient has been As. 8-4, is a zemindari town where there are said to be a number of country quacks encouraged by the zemindar, who treat most of the cases in the place.

Jaggayyapéta Dispensary.—The cost here has been As. 7-4 per head, which is far above the district average. The District Medical and Sanitary officer attributes this to the fact of the place having a largely conservative population.

In the Malabar district in the hospital at Tamracheri and the dispensary at Sultan's Battery, the daily average sick was 10·14 and 13·64 respectively. The following table shows the daily average attendance of these two institutions for the last three years :—

Institutions.	Daily average sick.		
	1893.	1894.	1895.
Tamracheri	12·64	12·48	10·14
Sultan's Battery	16·13	13·29	13·64

From this it will be seen that attendance in these institutions has been on the decline during the triennium. The District Medical and Sanitary officer reports the fall in attendance at the former place as due to the sale of quinine by the postal authorities. The place being malarious most of the patients suffer from fever, and as there is a belief among them that quinine sold at post office is better in quality than that given at the dispensary, they resort to it.

The cause of the falling off in Sultan's Battery is attributed to the frequent absence of the subordinate in charge on other duty as attendance in courts, &c.

Now that the notice of the medical officers and subordinates concerned has been called to the working of these institutions it is to be hoped that they will see that more efficient work is performed, for there is little or no doubt that the popularity of such places largely depends on the personal character of the medical subordinate in charge.

12. District Inspections.—The following notes regarding the inspection of the various medical institutions by the District Medical and Sanitary officer of each district are taken from their individual administration reports :—

Anantapur.—All the hospitals and dispensaries in the district were inspected once during the year and some were visited several times.

Arcot, North.—All the medical institutions in the district were inspected once during the year.

Arcot, South.—All the hospitals and dispensaries in the district, with the exception of those at Chengam, Vattavelam and Streemushnam, were inspected once and some twice during the year. These dispensaries were not inspected owing to the changes of medical officers and to the deputation of the Assistant Surgeon on cholera duty.

The District Medical and Sanitary officer reports as follows :—

"The Taluk Board of Tirukkóyilúr appears averse to effecting improvements. The dispensary at Ulundúrpétai, for example, is located in a most unsuitable building, and, though this Board has been repeatedly urged to build a dispensary on the standard plan, it invariably pleads want of funds as an excuse for omitting to do so."

Bellary.—All the institutions in the district, with the exception of the one at Holagundy, were inspected once during the year.

Canara, South.—Only eight institutions were inspected during the year. The others could not be inspected, probably due to the frequent changes of the medical officers in charge. All the recommendations of the District Medical and Sanitary officer to the various local bodies are said to have been attended to.

Chingleput.—All the hospitals and dispensaries, with the exception of those at Ponnéri and Pulicat, were inspected during the year. These two institutions could not be inspected owing to the absence of the Assistant Surgeon. Most of the District Medical and Sanitary officer's suggestions have been carried out by the local bodies.

Coimbatore.—All the hospitals and dispensaries in the district were inspected during the year. The District Medical and Sanitary officer reports that, though he impressed on the wealthy inhabitants in the district during his tours of inspection that the hospitals are worthy of the assistance of the generous and charitable, he regrets that no one has come forward to support them.

Cuddapah.—All the hospitals and dispensaries in the district were inspected during the year. The District Medical and Sanitary officer says that all his suggestions regarding sanitary improvements have been attended to by the local authorities as far as funds allowed.

Ganjám.—All the hospitals and dispensaries in the district, with the exception of the Government Hospital at Gojmsur Udayagiri, and the Local Fund dispensaries at Garabanda and Gopalpur, were inspected during the year. These were not inspected, as Surgeon-Lieutenant-Colonel T. J. Hackett Wilkins, who was in charge till the 5th May, was under orders to be in readiness for field service and could not make any inspections. All the suggestions made by the District Medical and Sanitary officer were attended to by the local authorities as far as funds permitted.

The Government gives a fixed annual grant of Rs. 300 to the police hospital at Udayagiri Ramagiri to treat civil patients both in and out, but this hospital does not submit returns for the civil sick treated. The District Medical and Sanitary officer reports that steps will be taken to get all these returns in future.

Gódlávari.—Eighteen institutions were inspected out of twenty-seven that required inspection. The District Medical and Sanitary officer reports that the want of a boat was the chief cause of his inability to inspect the remaining. Representations have been made to the District Board to provide a boat. When this is done, the inspection work will be better conducted.

Kistna.—All the institutions were inspected once during the year, and seven of them twice by the District Medical and Sanitary officer. The budget provision for buildings and repairs are reported to be sufficient.

Kurnool.—All the hospitals and dispensaries in this district, with the exception of two, were inspected during the year, and most of them twice. The budget provision for repairs is reported to be sufficient.

Madura.—All the institutions were inspected during the year by the District Medical and Sanitary officer with the exception of the one at Aruppukkóttai. This was not inspected, as the medical subordinate in charge had gone to give evidence in a sessions case when the medical officer went to inspect it.

Malabar.—All except seven institutions were inspected during the year by the District Medical and Sanitary officer as well as by the respective Civil Surgeons. There is no regular means of communication with the dispensary on Minicoy Island.

Nellore.—All the hospitals and dispensaries in the district were inspected during the year.

Nilgiris.—All the institutions in this district were inspected during the year.

Salem.—All the hospitals and dispensaries in the district were inspected once, and five of them twice, by the District Medical and Sanitary officer. This officer reports that no information has been received from the Local Fund authorities regarding the budget provision made for the annual repairs of hospital buildings and furniture, and that the budget has been passed without any reference to his office. This is against the orders of Government conveyed in G.O., No. 1177 L., dated the 26th June 1894, Local and Municipal.

Tanjore.—All the institutions were inspected during the year either by the District Medical and Sanitary officer or his assistant, except the dispensary at Muttupet. The medical officer reports that he has found it very difficult to inspect out-of-the-way dispensaries in remote villages, as there are no bungalows or any sort of accommodation for him. He suggests that he should be provided with tents and camp equipage. He should address the President of the District Board on the subject.

Tinnevely.—All the institutions, with the exception of the one at Veerakeralampudur, were inspected during the year. The medical officer reports that several of his proposals regarding improvements in Local Fund and Municipal institutions were given effect to by the local bodies concerned.

Trichinopoly.—All the institutions in the district were inspected once by the District Medical and Sanitary officer.

Vizagapatam.—All except Gunipore and Bissemcuttack were inspected during the year by the District Medical and Sanitary officer.

13. Inspections by the Surgeon-General with the Government of Madras.—During the last touring season I completed my inspection of all the head-quarter stations in the Presidency, which I had not been able to inspect the previous year. I also inspected several other places which I had already seen the year before. I visited such outlying institutions as were of particular importance or had some special interest.

The following statement shows the inspections I made :—

Number of tour.	Month.	Date.	District.	Institutions inspected.
1	1895.			
	April ...	6	Coimbatore ...	Municipal Hospital, Coimbatore.
	Do. ...	9	Do. ...	Special Dispensary for Women and Children, Coimbatore.
	Do. ...	13	Nilgiris ...	Municipal Hospital, Coonoor.
	May ...	7	Do. ...	St. Bartholomew's Hospital, Ootacamund.
2	Do. ...	...	Do. ...	Lawrence Asylum, Lovedale.
	September.	2	Do. ...	St. Bartholomew's Hospital, Ootacamund.
	Do. ...	5	Do. ...	Municipal Hospital, Coonoor.
	Do. ...	5	Coimbatore ...	Local Fund Hospital, Méttupálaiyam.
	Do. ...	8	Tinnevely ...	Local Fund Dispensary, Melaveeraraghavapuram.
3	October ...	8	Do. ...	Female Dispensary, Melaveeraraghavapuram.
	Do. ...	8	Do. ...	Municipal Hospital, Palamcottah.
	Do. ...	9	Do. ...	St. Luke's Mission Hospital, Nazareth.

It is not necessary for me now to go into the details, as I did last year, on the different points I called the attention of the local authorities to, as Government has decided in paragraph 15 of G.O., No. 746, Public, dated 7th September 1895, that the local authorities must report on the steps taken to carry out such recommendations. They will also be dealt with by the Medical officers in charge in their annual concise reports to the local authorities submitted under G.O., No. 735, Public, dated 2nd October 1894, so that Government will have an opportunity of seeing what steps the different authorities have taken. This I look on as most important, as many of the local authorities appear simply to record the suggestions of the inspecting officers and to take no steps to place their medical institutions on an efficient working basis.

The following are some of the most marked defects I have noted :—

(a) The want of repairs to the buildings being carried out systematically and thoroughly, which often renders them insanitary and sometimes dangerous. I have directed all Medical officers to state in their administration reports whether sufficient budget provision has been made for such repairs.

(b) *Equipment.*—Scarcely any hospital or dispensary that I have seen is properly equipped. I have, as shown in paragraph 4 (b) under 'Administration,'

issued a minimum scale which Medical officers should try and get the local authorities to work up to.

(c) *The Medical Subordinate Establishments.*—This is often inadequate in numbers in the larger hospitals and dispensaries. In some hospitals there are only Hospital assistants in charge which is contrary to the repeated orders of Government. Some of the dispensaries are in charge of Third-class Hospital assistants, who have neither the training nor the experience to fit them for such independent charges as has been recognized by Government in paragraph 5 of G.O., No. 527, Public, dated 25th June 1895.

(d) *Nursing.*—This, in the modern scientific acceptation of the term, may be said to be absent, and in my opinion it is most desirable that local authorities should be convinced that no hospital is worthy of the name, unless adequate medical and nursing establishments exist for attending to patients at all hours by day and night. In their present financial state local authorities could not afford to have in all their hospitals trained European or Eurasian nurses; but wherever a hospital is established for over fifty beds, there should be a trained European or Eurasian nurse as matron; and in the few hospitals organized for one hundred beds and over, there should be at least two more European or Eurasian nurses, one for day and one for night duty. These women should look after and assist in the training of the male and female ward attendants who should be, as far as possible, caste men and women (*vide* G.O., No. 923, Public, dated 14th November 1889) and able to read and write in their own vernaculars. They should be trained in their medical duties by the medical subordinate and in their nursing duties by the trained nurses. They should be in the proportion on duty of not less than one attendant to every ten beds. It would be desirable to provide both the nurses and attendants with quarters in the vicinity of the hospital.

(e) *Midwives.*—Many of the authorities controlling both the hospitals and dispensaries have not yet provided themselves with midwives and have taken no steps to get them. I hope the result of my calling the attention of Medical officers to the orders of Government and of the suggestions I have made regarding the training of these women alluded to in paragraph 2 (4g.) of this report under administration will lead to a greater number of women being trained and employed in the near future.

(f) *Buildings.*—In few of the hospitals or dispensaries are the arrangements for dealing with out-patients quite satisfactory. A standard plan dispensary, which provides for the proper segregation of the sexes, has been approved by the Sanitary Board, and it is most desirable that provision should be made for such buildings where necessary.

Provision for the separate treatment of females suffering from venereal diseases has not been made in many hospitals.

Provision for the treatment of high caste patients according to G.O., No. 923, Public, dated 14th November 1889, has not been made in most of the hospitals. Provision for dealing with lying-in cases, as directed in G.O., No. 64, Financial, dated 10th January 1880, has only been made in a few hospitals. A standard plan for such hut buildings has been approved by the Sanitary Board and is available for issue.

The rooms provided in most of the hospitals for operations are, as a rule, quite unfitted for the purpose.

The kitchens in most of the hospitals are simply disgraceful. The adoption of the range and chimney invented by Lieutenant-Colonel Brooke Anderson of the Indian Staff Corps, of which plans are available at Messrs. Arbuthnot and Co., Madras, would tend to a much better state of affairs, but in most of them the kitchen requires reconstruction on the standard plan proposed by the Sanitary Board, which will shortly be laid before Government.

14. Midwives and their work.—The following statement shows the work done by midwives during the year under report as compared with the previous year:—

Districts.	1894.		1895.	
	Number of midwives.	Total number of cases conducted.	Number of midwives.	Total number of cases conducted.
Anantapur	5	308	6	366
Arcot, North	15	1,001	19	1,125
Arcot, South	16	823	20	1,011
Bellary	18	2,384	18	2,228
Canara, South	9	944	9	984
Chingleput	12	632	14	801
Coimbatore	7	507	7	557
Cuddapah	14	691	16	835
Ganjām	4	334	4	330
Gōdāvari	7	439	8	638
Kistna	15	880	17	897
Kurnool	4	143	4	129
Madura	23	1,600	26	1,572
Malabar	8	509	8	483
Nellore	26	1,773	28	2,002
Nilgiris	1	64	1	51
Salem	7	405	7	323
Tanjore	22	1,623	24	1,804
Tinnevelly	13	654	13	820
Trichinopoly	12	939	14	1,074
Vizagapatam	14	1,725	12	1,303
Total	250	18,378	275	19,333

The following are extracts from the reports submitted by the District Medical and Sanitary officers:—

Anantapur.—There were six midwives at work during the year as against five in 1894, one having been newly entertained at Dharmavaram.

Arcot, North.—The services of one midwife were dispensed with during the year. The District Medical and Sanitary officer reports that a Taluk Board was requested to sanction the training of a midwife when the following reply was received:—

“The Board considers it unnecessary to train a midwife when the services of trained midwives are to be dispensed with for want of funds.”

Arcot, South.—Midwives are not trained at Cuddalore now, as the number of women delivered in the hospital is small.

Canara, South.—All the midwives have been trained in the Government Maternity hospital. Two pupils were entertained by the Mangalore Municipality during the year, and they have now applied to be sent to Madras for training.

Coimbatore.—All the midwives have been trained in the Government Maternity hospital, Madras. Provision has been made to entertain three more midwives, but they could not be secured. There are special lying-in wards at Coimbatore and Pollachi, and forty-eight cases were confined at the former.

Ganjām.—There were four midwives at work; three of them got their training in Madras and one in the Cuttack Medical school.

Kistna District.—There are three pupil midwives now undergoing training in the Government Maternity hospital at Madras.

Madura.—There were twenty-six midwives at work, who in all conducted 1,572 cases during the year. Almost all of them have been trained in the Madura Lying-in hospital. The District Medical and Sanitary officer reports that, as a rule, these midwives seldom do good work. Young women are trained and sent to different places where they have no relatives and soon become bad characters. Instead of helping the villagers in labour cases, they get the permission of the people to witness confinements in the houses and count such cases as having been conducted by them when the barber women of the villages actually attend to the cases.

Malabar.—Eight midwives worked during the year. They have all been trained in the Madras Maternity hospital.

Nellore.—There were twenty-eight midwives, all of whom were trained in the Nellore Lying-in hospital.

Tanjore.—Applications were made to the Superintendent, Government Maternity hospital, and Rajah Sir Ramaswamy Moodalliar Lying-in hospital, Madras, for the services of trained midwives, but with negative results. It has therefore been proposed to the President, District Board, to select women and send them to Madras for training. There are still sixteen institutions in the district to which midwives are not attached.

Tinnevely.—There were thirteen midwives in the district; of these five were trained at Madras and the rest locally.

Vizagapatam.—There were twelve midwives at work in the beginning of the year. Three resigned and three joined after completing their course in Madras. As the number of midwives was found inadequate, it was resolved, with the sanction of the President, District Board, to send three more pupils for training in Madras. The District Medical and Sanitary officer has arranged that all midwives in his district should have six months' duty in turn at the Victoria Gosha hospital, Vizagapatam, under the female medical practitioner in charge, as he thinks this course will considerably benefit them.

It is most desirable that the suggestions regarding the training of these women alluded to under administration in paragraph 2 of this report should be acted upon, or that local candidates should be selected and sent up to the Government Maternity hospital, Madras, to be trained.

15. Special medical aid for women and children.—The following information regarding the special aid under the suggestions of the Committee of the Lady Dufferin's fund for the classes of women who will not or cannot attend the ordinary dispensaries is abstracted from the District Medical and Sanitary officer's reports:—

Anantapur.—No institutions of this class have been established in this district.

Arcot, North.—On the 8th August of the year under report, a separate dispensary was opened at Vellore in a small out-building just outside the municipal hospital compound. On the 1st December it has been removed to a building in the fort. The attendance is gradually increasing. This dispensary was supplied with medicines, instruments, &c., from the municipal hospital. It is in charge of a female medical practitioner.

Arcot, South.—There are no special female dispensaries in this district; but Surgeon-Major W. A. Lee advised the opening of a women and children's hospital in Cuddalore to be maintained jointly from Municipal and Local Funds. This proposal has been approved of by the bodies concerned and is now awaiting the sanction of Government.

Bellary.—None in this district. A lying-in hospital has been completed and a female dispensary has been sanctioned, but they have not yet been opened.

Canara, South.—A hospital for women and children, which was opened at Mangalore in 1894, is now doing good work. During the year female medical

practitioner Miss Trutwein resigned and was succeeded by Miss Austin who is still in charge.

Chingleput.—None in this district.

Coimbatore.—The three female dispensaries at Coimbatore, Pollachi and Karur have all done good work. The total treated by these three female medical practitioners was 55,811 during the year against 30,523 in the previous year, the daily average attendance being 347.93 against 320.69 in 1894.

Cuddapah.—There are no special hospitals or female dispensaries in this district; but a third-class female Hospital assistant attends to the female out-patients in the Madanapalle hospital.

Ganjām.—There are no hospitals or female dispensaries in the district; but two female medical practitioners are attached—one to the Jubilee hospital, Berhampur, and the other to the Municipal hospital, Chicacole. They work in the main hospital in separate places set apart for the purpose.

Gódvári.—There is one special hospital at Cocanada. It is doing excellent work in charge of a female medical practitioner. ✓

The establishment of a small female dispensary was proposed in Rajahmundry and sanctioned by the municipality, but Government did not approve of it. The District Medical and Sanitary officer made the proposal for the current budget but the municipality rejected the proposal themselves. The District Board has sanctioned the construction of a special hospital for women and children at Cocanada.

Kistna.—There is a special hospital for women at Masulipatam opened in the year 1894 with provision for ten beds. The total treated in this hospital has fallen off a great deal during the year owing to the ill-health and consequent frequent absence of the female medical practitioner in charge. A male Hospital assistant had to be put in charge during these periods with the result above mentioned.

The District Medical and Sanitary officer has submitted certain proposals with a view of improving the working of the institution, but his proposals regarding the employment of a female Hospital assistant cannot be approved, as a Hospital assistant is not qualified for such a charge.

At Guntur the American Lutheran Mission has a dispensary for women and children. This was opened in 1894, but had to be closed several times owing to the frequent absence of Medical missionary. The dispensary is open every day except Sunday and Wednesday and treats all classes; but the majority of the patients are high caste Hindus. This institution is in charge of a Lady Doctor Miss A. Khugler, M.D., who is paid by the mission. During the year under report, 3,400 patients were treated in this. The mission have erected a special hospital for women, to the support of which the District Board proposes to give a contribution.

Kurnool.—There are no special hospitals or dispensaries in this district. Attempts have been made by the District Medical and Sanitary officer to persuade the District Board and Municipality to establish a special hospital but the Municipality pleaded financial difficulty.

Madura.—There are two special dispensaries in the district—one at Madura and the other at Dindigul. Both these institutions did excellent work during the year. Both are in charge of female practitioners.

Malabar.—None in this district. Recommendations were made to the Calicut and Palghat municipalities for the establishment of two special dispensaries, but no provision has been made in the budget.

Nellore.—There are no institutions that come under this heading but two female Hospital assistants do special female medical work in the Jubilee hospital.

Nilgiris.—Nothing has been done in this district.

Salem.—There is one special dispensary at Salem which worked satisfactorily throughout the year in charge of a female medical practitioner. There is another female medical practitioner attending to the women and children in the Municipal hospital at Tiruppattūr. The establishment of a separate dispensary at Tiruppattūr is under consideration.

Tanjore.—There is no special hospital or dispensary in this district; but, at present, a female medical student for Civil Apothecary grade is undergoing training in the Medical College at the expense of the District Board and in connection with the Dufferin fund.

Tinnevely.—There is one special dispensary in this district at Melaveeraghavapuram. The female medical practitioner attached to it has done satisfactory work during the year.

Trichinopoly.—There is no institution of this nature in this district. The Local Fund Board has nominated a female student to undergo training for the Apothecary grade.

Vizagapatam.—There are two special dispensaries and one hospital in this district. The designation of the women and children hospital at Vizagapatam was changed into 'Victoria Caste and Gosha Hospital,' Vizagapatam, with the sanction of Government. This, though designated as above, treats all castes, as the District Medical and Sanitary officer thinks it would be a mistake to restrict it to gosha patients before it becomes well known. It has done excellent work during the year. At Vizianagram the Maharajah has provided a native house in which the dispensary is working since July 1895 and treats women and children. The other special dispensary is at Párvatipuram, there is no separate building for this, but patients are seen in a tatty shed in the compound of the Local Fund hospital where the prescriptions are made up. All these institutions are in charge of female medical practitioners.

The following statement gives a short review of the progress made during the year 1895 in special medical aid for women:—

Number.	Name of hospital or dispensary.	Class and how supported.	Date of opening.	Accommodation for in-patients.	Establishment and cost.			Total treated.			Average daily attendance.	Opera-tions.		Labour cases.		Cost per patient.

16. Lying-in hospitals or provision for treatment of lying-in cases.—In Madura and Nellore there are special hospitals for the treatment of these cases with arrangements for the training of midwives. In the former, six midwives have been trained and two given certificates. In the latter place there are three undergoing training and two passed during the year.

Though in some of the districts there is no special accommodation for these cases, women in labour are never refused admission in any of the hospitals. In the following places special provision for lying-in cases exists.

In the district of Coimbatore there are separate wards at Coimbatore and Pollachi. Forty-eight cases were treated at the former place during the year. In the Gódvári district at Rajahmundry, Cocanada, Ellore and Narsapur, separate provision exists. In Kurnool there is no special ward but one bed in the female ward is reserved for such cases which is most unsatisfactory and contrary to the orders of Government.

In Madura and Nellore there are separate lying-in hospitals as stated above, besides these, in Madura district there are separate wards in Pámban and Ramnad.

In the Nilgiris separate accommodation for both Europeans and natives exists in Saint Bartholomew's hospital, Ootacamund, and in the Municipal hospital, Coonoor.

17. Special hospitals and dispensaries.—(1) *State Institutions.*—The following statement shows the State institutions in the Presidency that are entirely supported by Public funds:—

No.	District.	Name of institution.	Date of opening.	Total treated.	Average daily sick.	Total cost of maintenance.	Remarks.
1	South Canara ...	Amini Devi Dispensary ...	1876	2,182	12.46	RS. A. P. 1,413 13 6	There is no Local Board being on an island.

24	Do. ...	S.P.G. Mission Dispensary, Alam-bakam.	1895	7,970	53.13	532 11 10	Unaided.
25	Do. ...	S.P.G. Mission Dispensary, Puthur.	1882	5,823	34.24	609 12 9	Do.

It is to be noted that in Trichinopoly district the two unaided institutions of the S.P.G. Mission are in charge of compounders said to have practical knowledge. This is against all modern principles of medical administration.

(5) The following are the State Railway medical institutions :—

No.	District.	Name of institution.	Remarks.
1	South Canara ...	Askiri-Mangalore State Railway, Kempola Dispensary.	Statistics already given.
2	Ganjam ...	East Coast Railway Hospital, Chatrapur ...	Statistics not available.
3	Godavari ...	East Coast Railway Hospital, Rajahmundry ...	Opened on 4th December 1891. Total treated 2,097. Average daily sick 9.03. Total cost Rs. 1,015-8-1.
4	Vizagapatam ...	East Coast Railway Hospital, Waltair.	

(6) *Special institutions of a temporary or permanent character.*—In the Ganjam district there was a temporary hospital working for about three months in connection with the Mahasinghi works. There is a Hospital assistant attached to the Rushikulya project.

In Tinnevely district at Melapalayam there is a medical institution called "Cundasawmy Moodelliar's Charitable Institution," this is in charge of an unqualified practitioner who does not know English. It is strange to find that such an institution is aided by Local Funds in the shape of money (Rs. 200 per annum)—*vide* G.O., No. 79, dated 14th January 1878. It has been in existence from 7th July 1874. Total treated during the year under report 7,476; average daily sick 48.15; total cost Rs. 307-15-5. The District Medical and Sanitary officer has addressed the Taluk Board regarding this.

(7) *Isolation hospitals for cholera.*—In G.O., No. 1028 M., Local and Municipal, dated 26th June 1895, it was directed that the rules proposed by the Committee appointed specially for the purpose of working the scheme for combating cholera in municipalities be made applicable to certain municipal towns and as regards the rest to adopt this system as far as their funds would permit.

The following information regarding isolation hospitals is abstracted from the reports of District Medical and Sanitary officers :—

Arcot, South.—There are two isolation sheds in the hospital compound at Cuddalore, but not a special one on the standard plan.

Godavari.—The District Medical and Sanitary officer reports that though there are no standard plan isolation huts built as yet the Rajahmundry Municipality has made provision in the current budget for the necessary works. At present in the district there are eleven beds provided for cholera cases.

Kistna.—At Guntur an isolation shed for cholera cases exists outside the town.

Madura.—In Madura there is an isolation hut situated about one-and-a-quarter mile distant from the town.

Nilgiris.—At Coonoor there are two isolation sheds for cholera and small-pox cases on a low hill about half a mile from the town, each containing two beds.

Tanjore.—Isolation sheds exist at Negapatam for four males and four females for cholera and small-pox cases in an isolated part of the hospital compound.

Though in some of the districts the District Medical and Sanitary officers have represented this want to the local authorities and got them to sanction money for the necessary works they have not done anything towards it on the plea of the orders of Government on the subject not being definite.

Medical Institutions that are aided by Public Funds, but do not submit returns.—Cundasawmy Moodelliar's Charitable Institution at Melapalayam in Tinnevely. This institution, as mentioned above, does not submit returns being in charge of an unqualified practitioner who does not know English.

American Mission hospital, Madura.—This large institution, which has given relief to more than 47,000 people during the year, though it receives an annual contribution of Rs. 500 from the Madura Municipality and Rs. 500 from the District Board, does not submit returns.

American Mission dispensary, Pasumalai.—In the same district also receives an aid from the Local Fund Board, but no returns are submitted. Dr. Van Allen, who is in charge of these institutions, has promised to furnish returns in future. Besides these the several dispensaries in connection with the East Coast Railway have not submitted the required returns. Steps will be taken during the current year to get the necessary returns from these institutions.

13. Special forms of medical relief.—(1) *Medical work done in Collector's establishments.*—The following table shows the grade of subordinates attached to the different Collectorates during the year :—

Districts.	Establishment.	Grade of subordinate attached.
Cuddapah ...	Collector's ...	Third-class Hospital Assistant.
Kurnool ...	Do. ...	Civil Apothecary.
Ganjam ...	Chatrapur Collectorate ...	First-class Hospital Assistant.
Do. ...	Special Assistant Agent's establishment at Russelkonda.	Second-class Hospital Assistant.
Godavari ...	Special Assistant Agent's establishment, Polaveram.	Third-class Hospital Assistant.
Vizagapatam ...	Special Assistant Agent's, Koraput ...	Civil Apothecary.
Do. ...	Collector's, Vizagapatam ...	Civil Apothecary.
Do. ...	Head Assistant's establishment, Narasipatnam.	Third-class Hospital Assistant.
Do. ...	Senior Assistant Collector's establishment, Parvatipuram.	Third-class Hospital Assistant.

The subordinate attached to the Cuddapah Collectorate has treated 92 patients with a daily average of 1.66. The apothecary attached to the Kurnool Collectorate treated 773 cases with a daily average of 4.75, while at Polaveram 189 cases were treated with a daily average of 1.63.

(2) (a) *Special medical relief.*—One first-class Hospital assistant was deputed to go with the Collector of Malabar to the Laccadive Islands. He visited the following islands and gave medical relief as follow :—

- (1) Kalpani Island—111 patients were treated and 50 cases vaccinated.
- (2) Kavarathy—125 patients treated.
- (3) Agathy—129 patients were treated and 45 vaccinated.
- (4) Androth—203 sick treated and 46 vaccinated.

(b) The Deputy Commissioner of the Salt and Abkari Revenue, Central division, reported to the Revenue Board regarding an epidemic outbreak of fever in the village of Puldivak in the Chingleput district and in the adjoining villages. A copy of this report was forwarded to me by the Board for the necessary action on receipt of it I directed the District Medical and Sanitary Officer of Chingleput to inspect the locality and submit a report. A special Hospital assistant was deputed to give medical aid duly equipped with medicines. The epidemic prevailed from 7th September to 22nd December 1895, during which period 72 attacks were recorded with no deaths. The District Medical and Sanitary officer himself went to the spot, and reported that the cause of the epidemic was due to bad water-supply which is drained from the village on higher ground.

(3) *Special supplies of medicines.*—(a) *Sale of quinine by Postal authorities.*—Permanent advances for quinine were held by post offices in the five selected districts of Kurnool, Cuddapah, Malabar, Ganjam and Vizagapatam from the month of July 1895. The subjoined statement shows the results obtained therefrom for the quarter ending 30th September 1895 :—

Consolidated statement showing the account of permanent advances for quinine for the quarter ending 30th September 1895.

	Kurnool.		Cuddapah.		Malabar.	
	Number of powders.	Cost at two pies each.	Number of powders.	Cost at two pies each.	Number of powders.	Cost at two pies each.

Received during the quarter ...	34,320	357 8 0	44,862	467 5 0	27,000	281 4 0
Total ...	34,320	357 8 0	44,862	467 5 0	140,080	1,459 2 8
Sold during the quarter ...	11,204	116 11 4	12,358	128 11 8	167,080	1,740 6 8
Balance on the last day of the quarter ...	23,116	240 12 8	32,504	338 9 4	35,057	365 2 10
					132,023	1,375 3 10

The Postmaster-General has also supplied information regarding the Malabar district for the quarter ending 31st December 1895. The sale effected in this district during the last quarter was for 5,229 packets at two pies each amounting to Rs. 54-7-6. This is most satisfactory and shows we may expect a considerable demand for this article in the near future.

(b) *Supply of medicines to Revenue, Abkari and other departments.*—During the year under report there were seven indents from the Forest, fifty-five from the Salt and Abkari, four from District and Taluk Boards, three from the Land Revenue and one from the Engineering departments. All these indents have been passed; the chief medicines indented for were cholera pills and tinctures.

19. Inventory of valuable Government property.—The inventory of valuable stock has been verified in the Provincial State Hospitals.

20. Service books.—The service books in all districts, except one in Gódvári and one in Trichinopoly, have been duly verified. I shall take steps to see that they are all verified without any further delay.

I have the honour to be,

Sir,

Your most obedient servant,

P. S. S. S.

F.R.C.P.I., Surgeon-Major-General,

Surgeon-General with the Government of Madras.

ANNUAL RETURNS.

STATEMENTS I—V.

HOSPITAL AND DISPENSARY STATISTICS—cont.

No. III-A.—Statement showing the Results of the Major Surgical Operations performed by District Medical and Sanitary officers and Civil Surgeons among In- and Out-patients in the Hospitals and Dispensaries in the Presidency of Madras during the year 1895.

Class of Operations.	Nature of Operations.	Remained on 31st December 1894.	Per-formed during the year.	Total.	Results.				
					Cured.	Re-lieved.	Dis-charged other-wise.	Died.	Remain-ing under treatment on the 31st Dec. 1895.
Removal of tumours from parts.	Removal of all other tumours.	3	238	241	213	18	2	3	5
Removal of foreign bodies.	Removal of deep-seated foreign bodies	1	12	13	10	2	1	...	...
Opening of abscesses and incisions, unspecified.	Incision of large abscesses or those in an important region or dangerous neighbourhood.	8	218	226	186	24	7	2	7
Operations on the eye and its appendages.	Operations on the eyelids—								
	For entropion	...	1	1	1	...	...	...	...
	For ectropion	...	1	1	1	...	...	...	...
	For hypopion	...	3	3	3	...	...	...	...
	For trichiasis	...	2	2	2	...	...	...	...
	For restoration of eyelids	...	1	1	1	...	...	...	...
	Operations on other appendages of the eye—								
	For pterygium	...	22	22	21	1	...	...	...
	For fistula lachrymalis and lachrymal obstructions	...	20	20	16	4	...	...	...
	Operations of the eyeball—								
	Tattooing for opacity of cornea	...	5	5	3	...	2	...	...
	Artificial pupil	...	5	5	5	...	...	...	...
	Incision of cornea for suppurative keratitis.	...	8	8	7	...	...	...	1
	Iridectomy	...	64	64	42	17	5	...	...
	Iridotomy	...	3	3	3	...	...	...	...
Operations on the ear.	Solution of lens	...	2	2	2	...	...	...	...
	Extraction of the lens	4	216	220	174	8	17	...	21
	Extraction of lens with iridectomy	...	22	22	16	2	3	...	1
	Laceration of opaque capsulo.	...	5	5	...	1	4	...	...
	For staphyloma	...	11	11	9	...	2	...	...
	Excision of the eyeball	...	28	28	21	5	2	...	...
	Evisceration	...	3	3	2	1	...	...	...
	Removal of polypus	...	8	8	7	1	...	...	...
	Plastic operation for repair	...	2	2	2	...	...	...	...
	Extraction of nasal polypus—								
Operations on the nose.	(a) Through the natural passages.	...	49	49	49	...	...	...	...
	Removal of naso-pharyngeal polypus.	...	1	1	1	...	...	...	...
	Trephining	...	1	1	1	...	...	...	...
	Removal of tonsils	...	2	2	2	...	...	...	...
	For harelip, plastic operation	...	12	12	11	...	1	...	...
Operations on other parts of head and face including the mouth.	Plastic operation for cancer of cheek after excision	...	5	5	3	2	...	...	...
	Removal of tongue	...	2	2	2	...	...	...	...
	For salivary fistula	1	...	1	1	...	...	...	...
	Removal of lower jaw	...	5	5	4	...	...	1	...
	Ligature of artery	...	6	6	6	...	...	...	...
Operations on the circulatory organs.	For varicose veins	...	1	1	1	...	...	...	...
	Tracheotomy	...	1	1	1	...	...	...	...
	Paracentesis of pleura	...	7	7	2	4	...	1	...
	(a) With excision of part of rib	...	1	1	...	...	...	...	1
	Incision and drainage of pleura	...	1	1	...	...	...	...	1
Operations on the digestive organs.	Colotomy—								
	(a) Inguinal	...	1	1	...	1	...	...	...
	For stricture of the rectum—								
	(a) By incision	...	3	3	2	...	1	...	...
	Division of the sphincter ani	1	11	12	9	3	...	...	...

* One-eighth pay of the Medical subordinate for November 1894, having been drawn only in January 1895 is included in this amount. † Hospital Miscellaneous, &c., are included in this amount. ‡ For Medical purposes.

§ From January to July the hospital was under a Civil Apothecary whose pay was Rs. 75 with charge allowance Rs. 50, and from July to November, under another Apothecary on Rs. 100-50, and from November to December under a Temporary Assistant Surgeon on Rs. 100-50 with charge allowance Rs. 50. The right of the pay and allowances of these officers against this hospital as being contributed by Government.

|| The increase in the Provincial contribution by Rs. 137-4-0 was due to a Doing Duty Hospital Assistant being posted to the temporary charge during the absence of the permanent incumbent on privilege leave for three months.

†† The increase in the Provincial contribution by Rs. 126-3-10 in consequence of the permanent incumbent being placed in charge during the absence of the permanent incumbent on privilege leave for three months.

‡‡ The excess of Rs. 5-11-10 over the one-eighth pay of the Civil Apothecary's pay and charge allowance is borne by Government. vide G.O., No. 815, dated 18th October 1895.

§§ The whole of the Civil Apothecary's pay and charge allowance is borne by Government. vide G.O., No. 128, dated 28th September 1894 and Rs. 100-4-0 spent on buildings and Rs. 100-4-0 on travelling allowance of the Medical subordinate and the remainder for miscellaneous items such as bedding and clothing, &c.

¶¶ This includes Rs. 100-4-0 spent on buildings and Rs. 100-4-0 on travelling allowance of the Medical subordinate and the remainder for miscellaneous items such as bedding and clothing, &c.

*** The annual grant paid by Government towards the treatment of the police sick, vide, G.O., No. 48, dated 10th January 1895.

(d) No payment was made for the Medicines supplied during the year.

(e) This includes Rs. 95-14-3 being the subscriptions and sale of medicines credited to the treasury and also Rs. 4-2-0 being the sale proceeds of condemned stores credited.

(a) Includes Wynad allowance of Rs 15
 (b) The increase is due to the fact that the Civil Apothecary, who has drawing higher rate of pay and allowance, was in charge till 13th September 1895.
 (c) The increase is due to the fact that the Civil Apothecary, who was drawing higher rate of pay and allowance, was in charge from May 1895.

the current.

Subject.

Forwarding the
Triennial Report of the
Civil Hospitals and
Dispensaries.

No. , PUBLIC, JULY 1896.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following paper :—

Read the following letter from the Surgeon-General, No. 298, G.O., dated 14th July 1896.

ORDER—No. 1010, Public, dated 14th August 1896.

The Surgeon-General submits the report on and statistics of the civil hospitals and dispensaries of the presidency, excluding the City of Madras for the triennial period 1893-1895. The delay in the submission of this, which was due on the 25th June, was explained by the Surgeon-General in his letter, No. 227-Tour, of that date, to have been due to the preparation at about the same time of the triennial report on medical institutions in the presidency town as well as to the fact that a large amount of extra information was requisite in connection with what has now been placed before Government.

2. The report is considerably longer than its predecessor, and paragraph 2 contains much which is irrelevant and unnecessary. The attention of the Surgeon-General will be invited to the remarks in G.O., No. 85-G, Public, dated 11th August 1896.

3. The number of institutions brought within the purview of the report during the triennial period above referred to appears in the sub-joined table. The location and classification is indicated in the maps prefacing the report.

The number shown as "closed" covers also those "excluded" from the report. The nine institutions "closed" in 1895 are now included in the report on medical institutions in the presidency town under G.O., No. 422, Public, dated 27th March 1896. In Statement I attached to the report, eleven institutions appear as "closed," but this number includes two which were merely transferred from one class to another. The references to the foot-notes at page 39 are apparently misplaced and the word "twelfth" in the first foot-note should be "eleventh." On that page it is stated that 473 institutions were at work on the 31st December 1894, but at page 10 the figure is given as 464. The nine which were transferred in 1895 were included in the figures for 1894, and should be so shown notwithstanding that for purposes of comparison the statistics referring to them are omitted. The figure "1,000,000" in the ninth line from the bottom of page 10 is a careless error for "100,000".

General.

Chief Secretary.

The Surgeon General has explained,

latter on the census of 1891.

That the ratios of institutions to population for 1895 given in paragraph 4 of the report and in Statement I attached to it do not agree. In the latter the rates per mille in no less than ten districts is shown to have been 0.01, whereas the ratio per 100,000 in the same districts which are given in paragraph 4 range from 2.31 in Madura to 0.91 in Ganjam. Then, again in Statement I, the ratio per mille for the whole presidency is shown as 0.014 for 1894 and 1895, although there were thirteen more institutions in the latter year. This would give a ratio for 1895 of 1.14 per 100,000, but in paragraph 4 it is shown as 1.34. The explanation of these differences is

1. The subjoined statement exhibits the results of the working of the hospitals and dispensaries and the expenditure incurred on their upkeep during the years under review:—

Year.	Number treated.			Ratio per cent. of women to men.	Mortality among in-patients.	Accommodation.			Surgical Operations.			Diets.		Gross expenditure.
	In.	Out.	Total.			Number of beds available.	Average daily sick.	Percentage of beds occupied.	Major.	Minor.	Total.	Cost per patient per diem.	Total cost of diets.	
1893	34,463	3,222,741	3,257,204	41.42	7.51	2,898	1,558	53.75	5,315	115,030	121,038	2 2	79,067	8,48,881
1894	35,992	3,596,005	3,631,997	42.72	6.57	2,947	1,776	59.48	5,512	124,785	130,327	2 2	78,119	9,31,017
1895	38,122	3,850,532	3,888,654	43.63	5.89	3,060	1,696	55.42	7,385	134,380	141,765	2 0	77,568	9,77,247

* The figure 43.10 at page 12 of the report is incorrect if the totals treated are right.

5. The progressive increase in the number of patients treated is largely due to the greater number of institutions open and included in the returns during each successive year, but it may also be taken as an indication of their increased popularity. In this connection the Government is glad to observe that the percentage of women to men treated shows a gradual but steady increase. The advance in the number of surgical operations, the decreases in the percentage of mortality among in-patients and in the cost of diets are satisfactory features of this triennial report. The first is ascribed by the Surgeon-General to more attention having been paid to this branch of medical aid and to the greater accuracy observed in the registration of operations. In the second statement on page 15 the mortality attending major operations is given. The average for the triennial period is only 2.83 per cent. of persons operated on.

6. The explanation of the District Medical and Sanitary Officer, Bellary, of the statement that out of 76 deaths in his district 71 were of persons admitted in a moribund condition, will be awaited. Twenty deaths occurred in 1895 from sceptic causes acquired in hospital. The statement called for in G.O., No. 746, Public, dated 7th September 1895, as to the measures taken to put the institutions affected into a wholesome condition, has not been furnished. The Surgeon-General merely remarks that the number of cases is not great, considering the unsatisfactory state of many of the hospital buildings and the absence of adequate nursing establishments. The percentage of beds occupied during 1895 shows only a very slight increase over that for the two preceding years. The average for the triennial period is but a little over 54 per cent. As remarked in paragraph 6 of G.O., No. 746, Public, dated 7th September 1895, the demand for beds will doubtless increase with time. It appears, however, from the Surgeon-General's remark at the conclusion of paragraph 5, that the number of beds unoccupied may in some instances be due to full provision not having been made for maintaining them.

The Government does not altogether agree with the Surgeon-General that the percentages of beds occupied in South Arcot, Kistna and Madura, viz., 62.48, 62.40 and 60.49, show that those available were fairly well utilized. The best result is reported from Malabar in which the percentages, for the triennial period were 67.98, 80.56 and 95.33, respectively, showing a steady and satisfactory increase.

7. In connection with the information afforded in paragraph 9 of the report as to the diseases most prevalent in the several districts during 1895, it appears from Statement III that the largest number of cases treated were for diseases of the skin,† ulcers, malarial fevers, diseases of the eye, worms, diseases of the ear and rheumatic affections. In paragraph 9 under "Diseases treated" it is stated that there were 622

† Malarial fevers	..	..	398,885	} general diseases.
Worms	..	..	213,284	
Rheumatic affections	..	..	180,707	
Diseases of the skin	..	..	450,897	} local diseases.
Ulcers	..	..	411,381	
Diseases of the eye	..	..	341,331	
.. .. ear	..	..	212,521	

have been included in the report with ref. to remarks in p. 4 that the ratio of institutions to popn. in some districts was due to funds being required for roads & c. it is observed that S.O. No. 1686 L. d/14.9.95 directing that a proportion of the income of some institutions should be allotted to "communication" did not take effect until beginning of 1896/97.

deaths from small-pox in the South Arcot district, but Statement III, page 63, shows that only eleven people were treated for this disease in that district and page 90 gives the total of cases treated in all districts as 175 only.

8. Details as to receipts and expenditure for the triennial period are afforded in paragraph 11 of the report. It is satisfactory to find that the amounts of subscriptions and of recoveries from paying patients for the year 1895 were the highest for the triennial period, though the latter are still exceedingly low. The percentage of the total expenditure borne by Government was 10.21, against 9.34 in 1894 and 8.92 in 1893. The actual amount contributed by Government was Rs. 99,819, of which Rs. 27,546 was the cost of the upkeep of seventeen State institutions. At page 17 of the report the number is given as fifteen, but Statement I, page 39, shows that fourteen were at work on the 31st December 1894 and three were opened during 1895.

Excluding investments, the total expenditure for 1895 was Rs. 9,72,813-5-0, as against Rs. 9,29,415-15-0 for 1894 and Rs. 8,33,476-2-0 for 1893, which gives an average cost *per mille* of patients treated of Rs. 255, Rs. 258 and Rs. 253, respectively, or Rs. 255 *per mille* for the triennial period.

The increase under "establishment" is only apparent, for the relative cost under this head is shown on page 19 to have been the same as for 1894, viz., As. 2-4 *per head*, and less than that for 1893, which was As. 2-5 *per head*. No satisfactory comparison can be instituted in regard to the expenditure on bazaar and European medicines until the drugs which are used have been properly classified. The Government trusts that the steps taken by the Surgeon-General will secure accuracy and uniformity in this matter in the next report.

9. Notwithstanding the progressive increase in the number of in-patients and the average daily sick, the expenditure on diets has fallen during the triennium under review from Rs. 79,067 to Rs. 77,568 and the cost *per head* of in-patients from Rs. 2-4-8 to Rs. 2-0-4. The average cost on account of diet *per patient per diem* during 1895 was 2 annas as against 2 annas and 2 pies in each of the two preceding years. The average cost including all charges (with the exception of buildings and repairs and investments) in the three years, 1893, 1894 and 1895, has remained practically unchanged at As. 3-10 *per head*.

10. The remarks on pages 20-22 of the report will be dealt with in the Local and Municipal Department. In regard to the dispensary at Chódavaramu, the Surgeon-General explains that it has only recently been taken up by Government. With reference to the concluding paragraph on page 21 it is remarked that the average cost of diet *per head per diem* would not be affected by the length of time an in-patient was under treatment. This information would be more useful for purposes of comparison than the average cost *per patient* given in column 18 at page 20.

11. The inspection work which was performed during 1895 by the Surgeon-General and the various District Medical Officers was satisfactory. The attention of the Local and Municipal Department will be invited to the tabular statement and observations of the Surgeon-General thereon at the close of paragraph 2 and to the remarks in paragraphs 12, 13, 14 and 17 of the report, with special reference to South Arcot, Gódávári, Salem and Tanjore in 12, to 13 (d) and (f), to Madura in 14 and to 17 (6) Melapalaiyam and (7) Tanjore. The statement in paragraph 16 that one bed in the female ward of the municipal hospital at Kurnool is reserved for lying-in cases also calls for notice in that department. The Government regrets to

observe from paragraph 15 that nothing has yet been done towards the provision of special medical aid for women and children in the districts of Anantapur, Chingleput, Kurnool, Malabar and the Nilgiris. Steps in this direction have been taken in South Arcot, Bellary, Tanjore and Trichinopoly, while in Cuddapah, Ganjam and Nellore, although there are no separate institutions for the purpose, female hospital assistants have been provided to attend to out-patients of the same sex. *The reason why, the foot did not*

The Surgeon-General should do his best to obtain the statistics for future years to fill in the blanks in the statements in paragraph 17 and also the dates of establishment which, in several cases, have been marked as "unknown" in Statements II, III, IV and V attached to the report. *approved the*
The Surgeon-General's attention will be directed to the following incorrect entries in the column "total expense" in the statement in paragraph 17(4):— *retabulation of a small fund*

Opposite No. 6, Rs. 1,823-5-8 for Rs. 2,633-0-0.
" 8, " 1,078-10-7 for " 1,823-5-8.
" 11, " 871-0-0 for " 1,345-3-3.

Page 157 shows that these figures have been misplaced owing to careless compilation. The figures given opposite Nos. 3, 7, 9, 24 and 25 in paragraph 17 (4) cannot be checked as these institutions do not appear in the Statements I to V. The sales of quinine through the medium of the Postal department reported in paragraph 18 (3) (a) are encouraging and will no doubt increase. It is observed that in the statement referring to this at page 36 of the report "2,803" appears instead of "20,803"—a careless blunder which could not have occurred had the proofs been properly examined. It is also observed that the municipal hospital at Guntur has been classed as "M.H." at pages 50, 74 and 104 of the report, and as "M.D." at pages 128, 130, 154, and 169.

It is to be regretted that the report is disfigured by several inaccuracies which should have been detected and corrected before it was submitted to Government. The omission to do this is the more surprising as the Surgeon-General is allowed a special establishment for the preparation of the report, which, it is presumed, is checked by the Secretary to the Surgeon-General, if not by the head of the department himself, before it is signed.

It is observed that G.O., No. 794, Public, dated 24th September 1895, which directs that the department from which a Government order issued should be quoted in addition to the number and date, has not been attended to in drawing up the report.

(True Extract.)

To the Surgeon-General.

J. F. PRIOR,
Chief Secretary.

deaths from small-pox in the South Arcot district, but Statement III, page 63, shows that only eleven people were treated for this disease in that district and page 90 gives the total of cases treated in all districts as 11 only. In paragraph 9 it is stated that the District Medical Officer, South Arcot, treated to inter alia the general transfer of the subordinates in the district. It seems clear that a blunder has been made in the Surgeon-General's office in compiling the report which should be taken suitable notice of.

8. Details as to receipts and expenditure for the triennial period are afforded in paragraph 11 of the report. It is satisfactory and that the amounts of subscriptions and recoveries from paying patients for the year 1895 were the highest for the triennial period. The percentage of the total expenditure against 9.34 in 1894 and 8.92 in 1893. The amount contributed by Government was Rs. 99,819, of which Rs. 27,546 was for State institutions. The report gives the number of the subordinates in the district for the triennial period. It seems clear that a blunder has been made in the Surgeon-General's office in compiling the report which should be taken suitable notice of.

Excluding the investments the total expenditure for 1895 was Rs. 9,72,813-5-0, as against Rs. 9,29,415-15-0 for 1894 and Rs. 8,33,476-2-0 for 1893, which gives an average cost per mille of patients treated of Rs. 255, Rs. 258 and Rs. 253, respectively, or Rs. 255 per mille for the triennial period.

The increase under establishment is apparent, for the relative cost under this head is shown on page 19 to have been the same as for 1894, viz., As. 2-4 per head and less than that for 1893, which was 2-5 per head. No satisfactory comparison can be instituted in regard to the expenditure on bazaar and European medicines until the drugs which are used have been properly classified. The Government trusts that the steps taken by the Surgeon-General will secure accuracy and uniformity in this matter in the next report.

9. Notwithstanding the progressive increase in the number of in-patients and the average daily sick, the expenditure on diets has steadily fallen during the triennium under review from Rs. 79,067 to Rs. 77,568 and the cost per head of in-patients from Rs. 2-4-8 to Rs. 2-0-4. The average cost on account of diet per patient per diem during 1895 was 2 annas as against 2 annas and 2 pies in each of the two preceding years. The average cost including all charges (with the exception of buildings and repairs and investments) in the three years, 1893, 1894 and 1895, has remained practically unchanged at As. 3-1-1 per head.

10. The remarks on pages 20-22 of the report will be dealt with in the Local and Municipal Department. In regard to the dispensary at Chódavaramu, the Surgeon-General explains that it has only recently been taken up by Government. With reference to the concluding paragraph on page 21 it is remarked that the average cost of diet per head per diem would not be affected by the length of time an in-patient was under treatment. This information would be more useful for purposes of comparison than the average cost per patient given in column 18 at page 20.

11. The Government notes with satisfaction the work of inspection, which was carried out during the year by the Surgeon-General and the various District Medical Officers. [In this connection the Government desires to impress on the Surgeon-General the necessity for avoiding as far as possible frequent changes of District Medical Officers and their assistants.] The attention of the Local and Municipal Department will be invited to the remarks in paragraphs 12, 13, 14 and 17 of the report, with special reference to South Arcot, Gódavari, Palaiyam and (7) Tanjore. The state-ment in paragraph 16 that one bed in the male ward of the municipal hospital at Kurnool is reserved for lying-in cases calls for notice in that department. The Government regrets to observe from para-

Note
The light having been in
charge of dispensary does
cause a falling of 1 1/2 owing to institutions
being to be closed at times for want of
an officer on charge & because
the people do not go to a dispensary

this matter to require no cautioning on
the subject.
The statement and observations of the Surgeon
General hereon at the close of para
2 and to the

99 are apparently misplaced and the "twelfth" in the first foot-note should be "eleventh". On that page it is stated that 473 institutions were at work on the 31st December 1894, but at page 10 the figure is given as 464. The nine which were transferred in 1895 were included in the figures for 1894, and should be so shown in comparison with the statistics for 1894. The figure "1,000,000" in the ninth line from the bottom of page 10 is an error for "100,000".

Referring to these

Carley's

4. The subjoined statement exhibits the results of the working of the hospitals and dispensaries and the expenditure incurred on their upkeep during the year under review:—

Year.	Number treated.			Ratio per cent. of women to men.	Mortality among in-patients.	Accommodation. Number of beds available.	Per cent. of beds occupied.	Surgical Operations.			Diets.		Gross expenditure.
	In.	Out.	Total.					Major.	Minor.	Total.	Cost per patient per diem.	Total cost of diets.	
1893 ..	34,463	3,222,741	3,257,204	2,898	41.42	7.51	5	1,558	53.75	115,693	121,038	A. P. 2 2 79,067	RS. 8,48,881
1894 ..	35,902	3,596,006	3,631,907	2,947	42.72	6.87	52	1,676	53.48	124,785	130,327	2 2 78,119	9,31,017
1895 ..	38,422	3,800,932	3,839,354	3,060	43.63	5.89	55	1,696	55.42	134,380	141,765	2 0 77,568	9,77,247

This is altogether wrong, vide original table

* The figure 43.10 at page 12 of the report is incorrect if the totals treated are right.

5. The progressive increase in the number of patients treated is of course considerably due to the greater number of institutions open and included in the returns during each successive year, but it may also be taken as an indication of their increased popularity. In this connection the Government is pleased to observe that the percentage of women to men treated shows a gradual but steady increase. The advance in the number of surgical operations, satisfactory features of this triennial report, among in-patients and the cost of diets and to more attention having been paid to The first is ascribed by the Surgeon-General to the accuracy observed in the registration of operations. In the second statement on page 15 the mortality attending major operations is given. The average for the triennial period is only 2.83 per cent. of persons operated on.

1894

6. The explanation of the District Medical Sanitary Officer, Bellary, of the statement that out of 76 deaths in his district 71 were of persons admitted in a moribund condition, will be awaited. Twenty deaths occurred in 1895 from septic causes acquired in hospital. The statement called for in G.O., No. 746, Public, dated 7th September 1895, as to the measures taken to put the institutions affected in a wholesome condition, has not been furnished.

and

The Surgeon-General merely remarks that the number of cases is not great, considering the unsatisfactory state of many of the hospital buildings and the absence of adequate nursing establishments. The percentage of beds occupied during 1895 shows only a very slight increase over the two preceding years. The average for the triennial period is only a little over 54 per cent. As remarked in paragraph 6 of G.O., No. 746, Public, dated 7th September 1895, the demand for beds will however, from the Surgeon-General's remark at the conclusion of paragraph 5, be doubtless increase with time. It appears that the number of beds unoccupied may in some instances be due to full provision not having been made for them.

7. In connection with the information furnished in paragraph 9 as to the diseases most prevalent in the several districts during 1895, it appears from Statement II that the largest number of cases treated were for diseases of the skin,† ulcers, malarial fevers, diseases of the eye, worms, diseases of the ear and rheumatic affections. In paragraph 9 under "Diseases of the skin" it is stated that there were 629

† Malarial fevers ..	398,835	} general diseases.

No. 4, PUBLIC, JULY 1896.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

Read—the following paper :—

Read the following letter from the Surgeon-General, No. , G.

ORDER—No. , Public, dated ^{August} July 1896.

The [Surgeon-General submits the report, and statistics of the civil hospitals and dispensaries/ ~~in the~~ presidency, excluding the City of Madras, for the triennial period 1893-1895. The delay in the submission of/ ~~the report~~, which was due on the 25th June, was explained by the Surgeon-General in his letter, No. 227-Tour, of that date, to have been due to the preparation at about the same time of the triennial report on medical institutions in the presidency town of ~~Madras~~, as well as to the fact that a large amount of extra information was requisite in connection with the report. ~~has now been placed before Govt~~

2. With reference to paragraph 2/ the attention of the Surgeon-General will be directed to the remarks in G.O. No. , Public, dated August 1896, in regard to ~~the unnecessary length of reports in special reference to the inclusion therein of irrelevant details.~~ The attention of the Local and Municipal Department will be invited to the statement on page 9 from which it appears that nearly a quarter of the total number of medical institutions in the presidency were in charge of third class hospital assistants, 101 out of 117 of these being classed as either "Municipal" or "Local Fund." The Government has already expressed its opinion on this matter in paragraph 5 of G.O. No. 527, Public, 25th June 1895.

3. The number of institutions brought within the purview of the report during the triennial period/ ~~in question is shown in the table below.~~ The location and classification of these institutions is/ ~~indicated~~ in the maps prefacing the ~~present~~ report :—

1893.		1894.		1895.	
Number at work on the 31st December 1893 443		Number at work on the 31st December 1893 443		Number at work on the 31st December 1894 473	
Newly opened .. 17	} 10	Newly opened .. 19	} 20	Newly opened .. 11	} 13
included .. nil		included .. 9		included .. 11	
Closed 7		Closed 8		Closed 9	
Number at work on the 31st December 1893 453		Number at work on the 31st December 1894 473		Number at work on the 31st December 1895 486	
Number per mille of population 013		Number per mille of population 014		Number per mille of population 014	

The number shown as "closed" in the above statement ^{Covers} includes also those excluded from the report. The nine institutions "closed" in 1895 are now included in the report on medical institutions in the presidency town of Madras under G.O., No. 422, Public, dated 27th March 1896. In Statement I attached to the report, eleven institutions/ ~~are shown~~ as "closed," but this number includes two which were merely transferred from one class to another. The references to the foot-notes at page

The report is considerably longer than its predecessor and para 2 contains much which is irrelevant and unnecessary.

The attention of the S. G. will be directed to

the remarks in G. O. Public dated August

1896

above referred to appears in the subsequent table

which contains much irrelevant and unnecessary matter which is not only

unnecessary matter which is not only

appear
