Civil Hospitals and Dispensaries.

Reviewing the report on, and statistics of, the — of this Presidency excluding the City of Madras for the year 1896.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following paper :—

From the Surgeon-General, dated 11th August 1897, No. 291.

ORDER—No. 1385, Public, dated 14th October 1897.

The Surgeon-General submits the report on, and statistics of, the civil hospitals and dispensaries of the Presidency, excluding the city of Madras, for the year 1896. This, with its accompanying statements and appendices, forms a rather bulky volume. The details now contained in Appendix J should, under the instructions of the Government of India communicated to the Surgeon-General in G.O., No. 120 dated 11th November 1896, be shown in the body of the report. They might, with advantage, be curtailed so as to include no officer below the rank of Assistant Surgeon while Statement V, Part II, could, by the exclusion of institutions which have invested capital, and with which therefore the statements does not deal, be confined into a very few pages. The number of institutions reported on during the past years is shown below :—

1894.	1895.	1896.
Number at work on the 31st December 1893 453	Number at work on the 31st December 1894 473	Number at work on the 31st December 1895 475
		Newly opened .. 5
		Newly included in the report .. 6
		Closed .. 15
		Omitted from the report .. 7
		Decrease .. 1
		Number at work on the 31st December 1896 475
		Number per mille of population .. 014.

The omission of the statistics of the Nellore Baptist Mission hospital is to be regretted: the Surgeon-General should make every endeavour to obtain the necessary returns in future.

2. The inspection work done during the year under review was fairly satisfactory. Ten per cent. of the total number of institutions is, however, a considerable proportion to be left unvisited by a superior officer for a whole year.

The attention of the Local and Municipal Department will be drawn to the Surgeon-General's remarks in paragraphs 2 and 3 (b) of the report.

3. The results of the working of the hospitals and dispensaries during 1896 are in the subjoined table compared with those for the two preceding years :—

Year.	Number treated.			Ratio per cent. of women to men.	Mortality among in-patients.	Accommodation.			Surgical operations.	Diets.		Gross expenditure.
	In.	Out.	Total.			Number of beds available.	Average daily sick.	Percentage of beds occupied.		Cost per patient per diem.	Total cost of diets.	
1894 ..	35,902	3,596,005	3,631,907	42.72	6.57	2,947	1,576	53.48	130,327	A. P. 2 2	Rs. 78,119	Rs. 9,31,017
1895 ..	38,122	3,800,932	3,839,054	43.63	5.89	3,060	1,606	55.42	141,765	2 0	77,568	9,77,247
1896 ..	39,020	4,003,513	4,042,533	44.62	6.44	3,168	1,665	52.56	143,770	1 11	73,872	10,07,047

It is satisfactory to note that, notwithstanding the fact that the number of institutions at work during the year was less than in 1895, there was an increase both in the in- and out-patients treated, pointing to increased popularity of these institutions. The progressive advance in the percentage of women to men treated continued.

His Excellency the Governor in Council observes with satisfaction the decrease in the cost of diets from As. 2 in 1895 to As. 1-11 in the year under report. It is not understood why in column 6 of Statement No. V, Part I, on pages 139, 141 and 143, the word "Head" has been substituted for "Diet." The average cost per patient calculated on the total expenditure is shown in Appendix I to have ranged from 2 annas 11 pies in Trichinopoly to 12 annas 2 pies in the Nilgiris, where, however, the circumstances are peculiar.

	1895.	1896.	General in paragraph 7 of his report, the incidence of disease in each district was, with slight variations, very much the same as in 1895. The largest numbers of cases treated during the year were for the diseases enumerated in the margin. There was a decline under "Malarial fevers."
General diseases—			
Malarial fevers ..	398,885	387,777	
Worms ..	243,284	259,793	
Local diseases—			
Diseases of the eye ..	344,331	488,822	
" of the skin ..	450,897	433,761	
Ulcers ..	411,381	412,094	

An epidemic of cholera during the year accounts for the increased rate of mortality, viz., 6.44 per cent. against 5.89 in 1895. The highest death-rates among in-patients were in Coimbatore 10.45, Ganjam 10.15, Chingleput and Malabar 9.84 per cent., while the lowest were in Salem 3.57, Tanjore 4.20 and South Arcot 4.07. Only two cases occurred of septic diseases acquired in hospital, against twenty in the preceding year.

5. The Government notes with pleasure the commendations bestowed by the Surgeon-General on the surgical work performed by the officers named in paragraph 10 of his report.

6. The total expenditure on medicines declined from Rs. 1,91,932 in 1895 to Rs. 1,81,437 in 1896, but the decrease in the outlay on bazaar medicines was in proportion, and the Surgeon-General should continue to impress upon his subordinates the necessity for extending the use of indigenous drugs.

7. A special report should be submitted in regard to the local fund dispensary at Mummdivaram referred to in paragraph 16.

OFFICE OF SURGEON-GENERAL
WITH THE GOVERNMENT OF MADRAS,
MADRAS, // August 1897.

No. 291

From

SURGEON-MAJOR-GENERAL C. SIBTHORPE, C.B., F.R.C.P.I.,
Surgeon-General with the Government of Madras,

To

THE HON. THE CHIEF SECRETARY TO GOVERNMENT,
PUBLIC DEPARTMENT.

SIR,

I have the honour to submit to His Excellency the Governor in Council the Annual Report and Statistics of the Civil Hospitals and Dispensaries in the Presidency of Madras for the year 1896.

1. Administration.—

(a) The names of the Medical officers, who held charge of each district during the year, are shown in Appendix A, with dates giving particulars as to the cause of the changes.

(b) There were 475 hospitals and dispensaries at work on the last day of the year 1896, in charge of 473 officers and subordinates, against 486 institutions on the last day of the previous year. Full details as to the number of institutions at work in each district and the classes of officers or subordinates in charge will be found in Appendix B.

(c) Appendix C gives the total of menial establishment in each district, with particulars as regards the number of compounders, clerks, ward attendants, peons, water-carriers, toties, cooks, &c.

(d) Eleven institutions were opened and twenty-two were closed during the year. Of the 11 institutions shown as opened, 6 were already in existence, but were included for the first time in the returns. Of the 22 institutions shown as closed, 15 were closed for good, 5 institutions belonging to the Pudukkottai State have been omitted from the list of Civil Hospitals and Dispensaries and dealt with separately as Pudukkottai State Institutions, 1 (Seethanagaram) is similarly transferred to the list of Railway institutions, and 1 (Amini Devi) was closed owing to the Hospital Assistant's inability to join his duty, as there was no communication with the island. Returns from 11 institutions included under 'closed' have, however, been received for the year, as they were in existence for part of the year. Two of the institutions that were in existence on the last day of the year (Minicoy and Nellore Baptist Mission Hospital) have not submitted returns for the year, the former owing to communication between the island and the mainland being cut off and the latter owing to inability on the part of the medical officer to prepare the returns. Two hospitals (Jammalamadugu and Thamaracheri) were converted into dispensaries, and two dispensaries (Angadipuram and Vaniyambadi) were converted into hospitals during the year. The institutions at Gollitatta, Thadapelligudam and Sirvel were transferred to Uppinangadi, Pentapadu and Arlagadda, respectively. The institutions at Angadipuram, Quilandy and Kuttuparamba were closed from April to August by order of Government, and were reopened on the representation of the District Board of Malabar (*vide* Appendix D).

(e) A list of hospitals and dispensaries, which were supplied with European medicines wholly or in part at Government expense, is given in Appendix E.

(f) The special allowances granted during the year for each hospital or dispensary are detailed in Appendix F.

(g) Appendix G gives the provincial contribution made towards the pay of medical officers, from which it will be observed that the following districts show an increase under this item, viz. :—

District.	Increase.	Cause.
Anantapur ..	RS. A. P. 1,372 6 1	Due to the promotion of the Military Assistant Surgeon attached to Sir Thomas Munro's Hospital, Gooty.
Arcot, North ..	184 8 4	Due to the promotion of some of the medical subordinates; and to the posting of 'doing duty' subordinates in four cases during the absence of the permanent men on leave drawing their whole pay from Provincial funds during the period they acted.
Arcot, South ..	425 3 2	Some institutions were in charge of subordinates of higher grade during the year, and in some instances 'doing duty' men drawing their full pay from Provincial Funds acted for permanent medical subordinates. Hence there was an increase.
Ganjám ..	3,612 15 0	Due to Senior Assistant Surgeon S. C. White being in charge of Municipal Hospital at Chicacole. He drew his full pay from Provincial funds.
Górávari ..	818 7 6	At Bhadrachalam the medical subordinate having proceeded on 2 months' privilege leave, salary during that period had also to be drawn for his <i>locum tenens</i> . There was also an increase at Chodavaram, which was due to the additional salary of the acting incumbent during the absence of the permanent subordinate on 3 months' sick leave. The substitution of a Civil Apothecary for a Second-class Hospital Assistant at Ellore, and the promotion to the First class of the Hospital Assistant at Narsapur contributed the increase under this item.
Nellore ..	117 15 11	The increase is due to the promotion of six Third-class Hospital Assistants to the second class.
Nilgiris ..	335 12 1	St. Bartholomew's Hospital at Ootacamund, and Local Fund Hospitals at Gúdálúr and Kotagiri all show an increase due to the fact that the medical subordinates attached to them during 1896 drew more pay than their predecessors in 1895.
Tinnevely ..	731 2 7	There was an increase under this head in seven institutions due in five cases to the promotion of medical subordinates to a higher grade, and in two instances to the posting of senior men drawing higher rate of pay.
Vizagapatam ..	191 15 3	The increase was due to the promotion of some of the medical subordinates to a higher grade.

There was a decrease in the provincial contribution towards the pay of medical officers in—

- (1) Canara, South, due to the closing of the Government institution at Amin Devi on account of the inability of the medical subordinate to join the place.
- (2) Bellary, due to the closing of some institutions temporarily on
- (3) Coimbatore, account of some subordinates being deputed on
- (4) Kistna, cholera duty.
- (5) Kurnool,
- (6) Trichinopoly,
- (7) Madura, due to the closing of the Government institution at Periyár, and
- (8) Malabar, due to the non-receipt of statistical and financial returns from Minicoy.

2. Countess of Dufferin's Fund Institutions.—There were 18 institutions in the presidency in charge of female Apothecaries or Hospital Assistants. In

Bellary, Madanapalle, Berhampur, Chicacole, and Nellore, female medical practitioners were attached to the Civil Hospitals and were attending to the women and children. These practitioners should be placed in charge of separate institutions, as the unavoidable commingling of the sexes in the Civil Hospitals would act as a deterrent to the furtherance of the objects of the Dufferin's Fund Committee. No female medical aid of any kind has been provided in Anantapur, Chingleput, Kurnool, Malabar, Nilgiris, Tanjore and Trichinopoly. Arrangements are being made in Tanjore and Trichinopoly to remedy the defect. Three institutions were opened during the year (Cuddalore, Tiruppattúr and Bobbili) and 1 was closed (Párvatípuram). The Apothecary at Vellore resigned her place in April: no substitute has yet been provided for want of a duly-qualified woman. These female practitioners have been doing satisfactory work on the whole, having attended to 156,639 hospital patients (1,242.48 daily). The number of surgical operations performed by them during the year was 7,045. A statement showing the working of the institutions in charge of these practitioners is appended (*vide* Appendix H).

3. Institutions inspected.—

(a) With only forty-six exceptions, all the hospitals and dispensaries in the Presidency were inspected by the District Medical and Sanitary officers or Assistant Surgeons and Civil Surgeons. Ten of these institutions were, however, inspected towards the close of the year 1895, and have been inspected again at the beginning of the current year. The way in which the inspection duty has been carried out by Medical officers is, in my opinion, highly satisfactory. In the majority of cases in which the inspections were not made, the omissions have been due to causes beyond the officers' control.

(b) During the year, I visited eleven districts and inspected twenty-eight civil hospitals and dispensaries. In nearly all of them I found the same unsatisfactory state of affairs as I pointed out in last year's report. I regret to say that the majority of local authorities take little or no interest in the working of these institutions. As the requirements of each district are now fully brought before Government in the annual administration report of each local body, I shall not enter more fully into the subject here.

4. Budget provision for the annual repairs of hospital buildings and furniture has been made everywhere. Many of the hospitals and dispensaries are now located in rented buildings quite unsuited for their purpose.

5. The average cost per patient on each item of expenditure for each district is given in Appendix I.

6. Cost above or below average.—

Diet. The average cost per patient per diem for the Presidency was 1 anna 11 pies against 2 annas during the previous year. The following districts showed an increase over this figure, viz. :—

District.	Average.	Increase over the Presidency average.
	RS. A. P.	RS. A. P.
1. Anantapur ..	0 2 3	0 0 4
2. Arcot, North ..	0 2 1	0 0 2
3. Arcot, South ..	0 2 0	0 0 1
4. Bellary ..	0 2 2	0 0 3
5. Canara, South ..	0 2 0	0 0 1
6. Chingleput ..	0 2 3	0 0 4
7. Coimbatore ..	0 2 1	0 0 2
8. Ganjám ..	0 2 0	0 0 1
9. Górávari ..	0 2 0	0 0 1
10. Kurnool ..	0 2 1	0 0 2
11. Nellore ..	0 2 2	0 0 3
12. Salem ..	0 2 3	0 0 4
13. Trichinopoly ..	0 2 3	0 0 4

The average for Nilgiris was 4 annas. The local circumstances of this district are such as to preclude comparison with any of the neighbouring districts.

The attention of the District Medical and Sanitary officers and Civil Surgeons has been drawn to the possibility of exercising greater economy under this item, and to the necessity of cutting down the expenditure, consistent with efficiency, under other headings where there have been variations.

7. Classes of diseases treated.—4,042,533 patients were treated in all during the year against 3,839,354 in the year 1895. The increase in the number of patients is very satisfactory, and points to the growing popularity of these institutions among the people of the Madras Presidency. Diseases of the eye, other diseases of the digestive system, skin diseases, ulcers, malarial fevers and intestinal worms were the most common diseases treated during the year. The incidence of disease in each district is more or less the same, with slight variations.

10,776 cases of cholera were treated during the year. This will be further dealt with under the head of 'epidemics.'

8. Classes and sexes treated.—Statement IV gives details of the classes and sexes of patients treated during 1896 in the different Civil hospitals and dispensaries of the Presidency, giving the average daily number and the ratio per cent. for men, women and children. The following table compares the attendance of the year under review with that of the previous year for all the institutions put together :—

Year.	Total treated.	Men.	Women.	Children.	Euro-peans.	Eur-asians.	Hindus.	Mussal-mans.	Other-classes.
1895	3,839,354	1,855,664	809,734	1,173,956	8,951	41,355	2,830,660	472,086	486,302
1896	4,042,533	1,913,879	854,098	1,274,556	10,436	43,407	2,932,112	518,705	537,873

It will be noted that proportionate to the increase in the total number treated, there has been an increase under all heads.

9. Mortality among in-patients.—The following table shows the mortality among in-patients, the number of cases admitted and removed moribund, and the deaths from septic diseases, during the year under report :—

District.	Number of deaths.	Number of cases admitted moribund.	Number of cases removed moribund.	Deaths from septic diseases.	
				Acquired in hospital.	Acquired before admission.
Anantapur ...	34	7	...	...	...
Arcot, North ...	124	30	13	...	4
Arcot, South ...	71	24	8	...	3
Bellary ...	97	27	6	...	...
Canara, South ...	44	13	...	...	...
Chingleput ...	82	15	9	...	1
Coimbatore ...	123	31	11	...	...
Cuddapah ...	95	34	4	...	...
Ganjām ...	88	48	...	...	...
Godavari ...	134	54	3	...	...
Kistna ...	109	39	17	...	...
Kurnool ...	58	19	7	...	...
Madura ...	154	30	18	...	...
Malabar ...	430	95	12	...	...

Nilgiris ...	201	77	8	...	...
Salem ...	48	10	...	...	...
Tanjore ...	211	106	27	...	7
Tinnevely ...	133	33	13	• 1	2
Trichinopoly ...	121	10	3	...	...
Vizagapatam ...	103	32	5	† 1	2
Total ...	2,513	766	180	2	19

• In Ambásamudram Local Fund Hospital. † In Párvatipuram Local Fund Hospital.

There were 2,513 deaths during the year among in-patients (6.44 per cent. of total treated), against 2,265 deaths (5.90 per cent.) in 1895. The explanation of the increase in the number of deaths and in the rate of mortality is to be found in the fact that 10,776 cases of cholera were treated during the year against 4,394 of the preceding year. The death rate ranged from 3.57 per cent. in Salem to 10.45 per cent. of total treated in Coimbatore.

The decrease in the number of deaths from septic diseases is highly satisfactory. Only two cases were acquired in hospital. Isolation of the patients while under treatment and disinfection of the wards, bedding, &c., used by them were thoroughly carried out in every instance.

10. Operations.—Details of all surgical operations performed during the year in the civil hospitals and dispensaries are given in statement III-A. The distinction between major and minor operations having been abolished (Home Department letter No. ^{6-Medical} _{236 245}, dated 14th March 1896, embodied in G.O., No. 402, Public, dated 23rd March 1896), this return shows for the first time in the aggregate all manipulations of a surgical nature undertaken at the several medical institutions.

The classification for each institution of all surgical operations in detail, according to the Nomenclature of Diseases, their tabulation again into district statements and their consolidation into one presidency statement, has immensely increased the clerical work of this return, and is the main cause of the delay in the submission of this report. 143,770 operations were performed in all during the year against 141,765 operations in the year 1895. A selected list of surgical operations showing the number of each performed by individual officers is also attached (Appendix J) agreeably to G.O., No. 1212, Public, dated 11th November 1896.

I have great pleasure in bringing to the notice of Government the good work done in this branch by the following officers and subordinates :—

- (1) Surgeon-Major W. A. Lee.
- (2) Surgeon-Major F. C. Reeves.
- (3) Assistant Surgeon A. P. Fernandez.
- (4) Civil Apothecary B. L. Devi Singh.

11. Medicines.—

(a) *European medicines.*—All the Government institutions and the two private-aided institutions at Ootacamund (St. Bartholomew's Hospital and Lawrence Asylum, Lovedale) were supplied with European medicines from the Government Medical Store Depot. All the local fund and municipal institutions got their supply of European medicines from Messrs. Burgoyne, Burbidges & Co., London. Opium, tinctures, spirits, ethers and acids were purchased by them from the firms at Madras or Bombay. Quinine and its alkaloids were obtained from the Government Factory at Nativattam. Details of European medicines supplied to the several districts are given in Appendix M.

(b) *Indigenous drugs.*—Every effort was made during the year to promote the use of indigenous drugs. The District Medical and Sanitary officers impressed the necessity for this on their subordinates by circulars and orally during their inspections. All the institutions were supplied with the latest edition of Waring's Bazaar Medicines. Rs. 18,895-8-0 were spent on bazaar medicines during the year against Rs. 18,973-15-3 in the year previous.

12. Special Institutions.—There were in all 15 State institutions, 3 leper hospitals, 4 private institutions, 20 mission institutions and 14 railway institutions at work during the year. All the State institutions were entirely supported by public funds. Of the leper hospitals, one is a Government institution, the two others being worked by missionary bodies. All the private institutions were entirely unaided. Seven of the 20 mission institutions were unaided. Of the railway institutions, 9 belong to Government and 5 belong to the companies. The one institution belonging to the Madras Railway is Government aided. Details of the working of the State, leper, private, mission and railway institutions are given in Appendix K.

"The Cundasamy Mudaliyar's Charitable Institution" at Melapalyam in the Tinnevely District has not worked well during the year. 6,783 patients were treated during the year with an average daily attendance of 22.36 against 7,476 patients with an average daily attendance of 48.15 in the previous year. As remarked in the last year's report, it is in charge of an unqualified practitioner ignorant of English.

There were no isolation hospitals, properly so called, except at Conjeeveram, Cuddapah, Madura, Tellicherry, Tanjore and Trichinopoly. But isolation sheds were erected whenever necessary for treating cholera cases, and there were 16 such in use during the year. These were mostly attached or close to the main hospitals and were very useful for the destitute and the homeless. The necessary steps were taken to carry out the provision of G.O., No. 1028, L. & M., dated 26th June 1895, as far as funds permitted.

13. Midwives and their work.—There were 280 midwives employed during the year (exclusive of deaths and dismissals) against 275 in the year previous. Eight midwives were entertained during the year and 26 were under training, 17 at the Government Maternity Hospital, Madras, and 9 under District Medical officers.

19,624 cases of labour were attended by these women during the year against 19,333 in 1895.

There were 177 beds available in the various hospitals of the Presidency for the accommodation of lying-in cases, 27 being in the delivery and 150 in the lying-labour wards. 3,609 women were treated in these wards, 3,073 being cases of natural labour and 536 otherwise.

Of the 3,609 cases, 360 required operative interference; 3,543 patients recovered, 58 died and 8 continued under treatment on the last day of the year.

14. Special medical relief.—Medical subordinates were attached to the Collectors' establishments at Cuddapah, Ganjam, Kurnool and Vizagapatam; the Senior Assistant Collector's establishment at Párvatipur; the Special Assistant Agents' establishments at Russellkonda, Polavaram and Vizagapatam; and the Deputy Collector's establishment at Peapully. 2,276 patients were treated in all during the year by the subordinates attached to these establishments.

15. Special supplies of medicines.—

(a) One hundred and seven indents were received and passed during the year:—53 of these were from the Salt and Abkari Department, 27 from the Land Revenue Department, 11 from the Forest Department, 7 from the Department of Public Works, 8 from Presidents of Local Boards (indent for cholera medicines) and 1 from the No. 19 Party, Survey of India.

(b) Rs. 3,256-1-6 were realized during the year from the sale of quinine by postal authorities, 312,585 packets having been sold. The statement of the Postmaster-General showing the receipts and expenditure of quinine powders is attached (Appendix L).

16. Institutions where the expenditure does not seem to be justified by the amount of medical relief afforded.—Sriperamputhur in Chingleput, Mimisal, Manamalgudi and Valangulam in Tanjore, and Mummdivaram in Gódvári, were the only institutions in the Presidency, excepting those reported upon last year, whose attendance roll was considered comparatively small by the District Medical and Sanitary officers of the respective districts. The three institutions in Tanjore are maintained by Chatram Funds and are intended for the benefit of travellers. The District Board President of Chingleput has recommended a further trial to be given to the hospital at Sriperamputhur, till arrangements are made for the accommodation of in-patients at Tiruvallur.

17. Epidemics.—During the year, cholera existed in an epidemic form almost throughout the whole Presidency. South Canara was the only district in which the disease did not assume an epidemic type. The disease prevailed in a mild form in Nellore, Nilgiris and Kistna. All the other districts suffered severely.

10,776 cases were treated in the various hospitals and dispensaries of the Presidency as in- or out-patients. Details of all these cases were submitted to me in C.M.F. No. 17. Disinfection of drinking water wells with potassium permanganate was largely adopted during the year. The occurrence of the Pushkaranam festival at Rajahmundry contributed largely towards the spread of the disease in the northern districts. Small-pox existed in all the districts, but was comparatively severe in its effects in North Arcot, Ganjam and Kurnool, the deaths in these three districts being more than half the total number of deaths in the whole Presidency. The necessary steps were taken by Municipalities and Local Boards for the prevention of the spread of infectious diseases as far as funds permitted in consonance with G.O., No. 1028, L. & M., dated 26th June 1895.

18. General remarks.—The State railway medical institutions and those belonging to the Pudukottah State which were included in the last year's report with the civil hospitals and dispensaries have this year been shown separately, their statements also being separately published. (The financial statements of Pudukottah State were not available.) The Residency Hospital, Trivandrum, has been, for the first time, included with this report; its statements are likewise shown separately.

Two dispensaries were opened during the year in the Pudukottah State. 92,742 patients were treated during the year in all the institutions of that State with an average daily attendance of 449.07, and 2,256 surgical operations were performed in them.

13,946 patients were treated in the State railway institutions with an average daily sick of 105.41, the number of operations performed in them being 247; while in the Residency Hospital at Trivandrum 2,248 patients were treated with an average daily attendance of 6.16.

19. Inventory of valuable Government property.—The inventories of valuable stock have been checked and found correct.

20. Service registers.—The service registers have all been duly verified except a few in Ganjam, the verification of which is receiving the best attention of the District Medical and Sanitary officer.

I have the honour to be,

Sir,

Your most obedient servant,

C. N. Moube.

Surgeon-Major-General,

Surgeon-General with the Government of Madras.

ANNUAL RETURNS.

STATEMENTS I—V.

STATEMENTS I-V.

HOSPITAL AND DISPENSARY STATISTICS.

* Mission funds. † The heavy contribution from Government for these institutions is due to the entertainment of "doing duty" subordinates who drew pay from provincial funds during the absence of the permanent men on sick leave, during the absence.
‡ For erecting a dead-house.
§ The whole pay and charge allowance is paid by Government.
¶ For meeting contingent charges.

** For treating Police sick—G.O., No. 46, dated 10th January 1883.

SUBJECT.

Annual Report and
Statistics of the Civil
Hospitals and Dispensaries

FOR ORDERS.

Draft review on the
above report is submitted.

The report was registered
in the office on the 16th August
and the Enata (C 3191) on
the 25th idem. It was
however not referred
till the middle of September
this delay is due to the
Public Reference being
placed on other duty
and the falling ill of
the two men who were
set to do his work. The
file was sent to up by the
Reference on the 17th Sept.

A draft was then
put up. 2/17. 9. 97. This
was only possible
by working during
spare

line one then
mainly
been copied
no printing.
AK

space lower at home with
a spare copy of the
report.

The draft of the report was sent
to press by the U.S. on the
23rd ult.

The Surgeon General should
have submitted the
report on the 15th July. The
delay he says is
mainly due to the
increased clerical
work under necessary
under India's instructions.

- has recorded in G.O. 402 dated 23.10.96 and G.O. 969 dated 12.12.96 vide para 10 of the report page 9.

Please see also G.O. 20.7.97

It is submitted that
in forwarding the report to
India it may be suggested
that the date of its submission
should be changed to
the 1st September.

W

At present both
this report and that on the
madd institutions in the
Punjab are due with
India on the 15th July and with
India on the 1st August
at the very earliest. These
dates were fixed when
the reports consisted

"In fact this is the date of dispatch
under G.O. 39 dated 26.7.90 for
the 5th biennial report. The heading at
the end of the report appears to
refer to the triennial reports

of brief notes vide para
3 on page 4 of G.O. 376 dated
12.5.91. They now con-
-stitute a bulky volume
Each. It is thus obviously
impossible that, even if
sent from the Surgeon
General by the due date,
they can be reviewed
and sent up to
India in time.

No 1385 PUBLIC,
GOVERNMENT
PUBLIC D

READ—the following paper :—
From the Surgeon-General, dated 1897, No. 291.

ORDER—No 1385 Public, dated 14. Sept. 1897, No. 291.

and will be done before the end of the year.

This. They

The Surgeon-General submits the statistics of the civil hospitals and dispensaries of the Presidency, with its statements and might, with advantage, be curtailed and Assistant Surgeon, while Statement VI, institutions which have no invested capital, be to a considerable saving in printing. The past three years is shown below :—

1894.		1896.	
Number at work on the 31st December 1893		Number at work on the 31st December 1894	
453		473	
		Number at work on the 31st December 1895	
		486	
		Newly opened	
		5	
		Not included in the report	
		6	
		Closed	
		15	
		Omitted from the report	
		7	
		Decrease	
		11	
		Number at work on the 31st December 1896	
		475	
		Number per mille of population	
		1014	

The omission of the statistics of the hospitals is regretted: the Surgeon-General shows that the returns in future.

2. The inspection work done during the year was fairly satisfactory. The ten per cent. of the total number of hospitals is, however, a considerable proportion to the number of hospitals visited by a superior officer of the report.

The attention of the Local Authorities is drawn to the fact that the number of hospitals and dispensaries during 1896 is two preceding years :—

3. The results of the working of the hospitals compared in the subjoined table with the results of the two preceding years :—

Year.	Number treated.			Ratio per cent. of women to men.	Mortality among patients.	Percentage of beds occupied.	Surgical operations.	Diets.		Gross expenditure.
	In.	Out.	Total.					Cost per patient per diem.	Total cost of diets.	
1894	35,902	3,596,005	3,631,907	42.72	6.67	53.48	130,327	A. P. 2 2	78,119	9,31,017
1895	38,422	3,800,932	3,839,354	43.63	6.67	55.42	141,765	R. 2 0	77,568	9,77,247
1896	39,020	4,003,613	4,042,633	44.62	6.67	52.56	143,770	1 11	73,872	10,07,047

It is satisfactory to note that, notwithstanding the fact that the number of institutions at work during the year was less than in the two preceding years, there was an increase both in the in- and out-patients treated, pointing to the popularity of these institutions. The progressive increase in the percentage of patients to men continued.

advance

The details now contained in Appendix J should, under the instructions of the G.O.I. communicated to the S.G. in G.O. no 1212 Ptd. d 11-11-96, be shown in the body of the reports.
